PREFACE

I SUBMIT for your consideration the Fifth Class Report, which needs no explanation, as its form follows the preceding Report

issued five years ago.

With the feeling that each Report should be complete in itself, effort has been made to have the narratives cover the whole period since leaving college and written in such form that this Report would not be a perfunctory recital of facts, devoid of color, but a book of reference for the Class, setting forth the activities of its various members in an instructive and interesting way. The book is yours, as you made it, and each of you can tell in looking it over if your own contribution succeeds as its part in making up an attractive whole. For such shortcomings as may appear atonement can be made in the Report for our Twenty-fifth Anniversary.

The names of fourteen men who heretofore have been on our inactive list have been transferred to our active list. The inactive list may still contain the names of men who, as they did not complete their college course, feel that they have no real place in our organization. I suggest, therefore, that even at this late date, if anyone knows of such a case, he will let me know of it.

I trust that each of you will carefully read your own record and inform me if you find any inaccuracy in it, particularly in respect to the statistics; also I shall appreciate any information regarding the lost men and in fact any criticism or suggestion in the manner or method of presentation of the material of this

Report.

As usual I wish to thank those of you who promptly replied to my circular and particularly others who have aided in the preparation of this Report, the publication of which in its various steps has been most interesting and an advanced course in the study of human nature. The cover design was drawn by Philip Richardson.

> John J. Hayes, Secretary.

TREASURER'S REPORT

TO THE MEMBERS OF THE CLASS:

You will note that the invested funds of the class amount to a par value of \$4600.00, giving an annual income of \$181.00. The fund has been reduced by \$1000.00 par value since the Treasurer's report issued May 1, 1911. This was necessary in order to pay for the Fourth Class Report. Payment for the fifth class report will have to be made before the end of the current year, and this will more than use up the cash on hand, making a further necessary inroad on principal.

Subscriptions to the class fund have practically ceased, although there are many men who have never subscribed at all and others who have not paid the full amount of their subscriptions. The treasurer hopes that at least enough new subscriptions to the fund will be made so that further inroads upon capital will not

be necessary.

Apart from the Class Report, the annual income from the fund is sufficient to meet running expenses.

Robert H. Hallowell, Treasurer.

I have published school editions of half a dozen English classics, and a number of articles on the teaching of English, in the School Review, the English Journal, the New England Leaflet, the Teachers

College Record, the Illinois Bulletin, etc.

On June 10, 1915, I began a trip to South America from which I have just returned, March 2d, and which covered the Argentine, Uruguay, and Brazil, from the Amazon to the Rio Grande. In the principal cities of the countries named we now have our own agents.

Right here the Secretary's injunction, "Don't be too modest in saying something about yourself," permits me to say that I believe there are very few Americans who know more than myself of South America—its conditions, its people and its languages. This knowledge and a very satisfactory family are my best acquisi-

tions during the twenty years since '96.

Publication: My only literary effort worth mentioning is a translation of the "Drago Doctrine" as first enunciated, which its author, Dr. Luis Maria Drago, regards as "the authoritative English version."

A Professor of English Literature I shall probably remain the rest of my working days. My hobby has been foreign travel; partly for work, partly for play. Occupation: Educator.

Address: (business) Lynn English High School, Lynn, Mass.; (home) 158

Crest Ave., Revere, Mass.

A FTER a period of study in the Harvard Graduate School, specializing in History, in 1900 I took up again the purpose for which I had originally entered college and began the theological course at Andover Seminary. In 1902 I received the S.T.B. degree. My bent for history, however, was too strong, and as no opportunity could readily be found for combining the work in that field with the work of the church, I again became a teacher of history and have continued in that field ever since. Since November, 1906, I have been head of the department of history at the Lynn English High School. I still keep up my close association - begun while a Sophomore at college - with the historical and patriotic work at the Old South Meeting-house in Boston, and am a member of the Board of Managers of the Old South Association.

THOMAS WOOD ANDREWS

Born at Hyde Park, Mass., May 28, 1874.

Parents: William Henry Harrison, Elizabeth (Wood) Andrews.

School: Roxbury Latin School, Boston, Mass.

Years in College: 1892-96.

Degree: A.B. Unmarried.

Occupation: Textile Manufacturer.

Address: (business) 22d and Spring Garden Sts., Philadelphia, Pa.; (home)

Merion, Pa.

A FTER graduating I came to Philadelphia and entered the Pequea Mills, William Wood & Company, manufacturers of woolen and worsted cloths, with whom I have been associated ever since. I became interested in the "preparedness" idea before it grew to be so popular and fashionable and in 1898 enlisted in the Pennsylvania National Guard and served in the Second Troop, Philadelphia City Cavalry, for seventeen years finally with the rank of First Lieutenant. About a year ago a regiment of cavalry was organized in Pennsylvania and I was appointed Captain and Inspector of Small Arms Practise. About two years ago I had the pleasure of assisting in the organization of the Merion Civic Association which has had remarkable success in all its activities in the suburb of Merion.

WILLIAM SUMNER APPLETON

Born at Boston, Mass., May 29, 1874.

Parents: William Sumner, Edith (Stuart) Appleton.

School: Hopkinson's, Boston, Mass.

Years in College: 1892-96.

Degree: A.B. Unmarried.

Occupation: Antiquarian.

Address: (business) 9 Ashburton Place, Boston, Mass.; (home) 3 Spruce St., Boston, Mass.

THE 1911 class book found me newly installed as corresponding secretary of The Society for the Preservation of New England Antiquities. This position I have filled ever since and

have had the satisfaction of seeing this society grow rapidly in material wealth, public esteem, and power for good. It now has about 1500 members and some \$35,000 worth of property. Almost all my time has been spent in Boston, with the exception of the summer months. These are largely spent at Manchester, Mass., New Ipswich, N.H., Squam Lake, N.H., and North East Harbor, Maine. I have acquired a small country place at New Ipswich, N.H., being the old ancestral farm-house built by my great-grand-father about 1756, in which my grandfather was born. I am getting a great deal of pleasure in repairing and restoring the old structure and hope to be at home to any '96 men some time next summer. My only traveling was a nine weeks' trip to the Pacific slope last summer, during which I saw both Fairs and also the Grand Canyon, Yosemite Park, Yellowstone Park, Canadian Rockies, Mt. Rainier Park, etc. It was a grand trip and I had the time of my life.

My literary efforts have been confined to editing the *Bulletin* of my antiquarian society, of which some thirteen numbers have appeared. I am a strong believer in naval and military preparedness for the United States, and have done my modest "bit" to help along the cause.

RAYMOND CLARE ARCHIBALD

Born at Stewiacke, Colchester Co., Nova Scotia, Oct. 7, 1875.

Parents: Abram Newcomb. Mary (Mellish) Archibald.

School: Mount Allison Academy and Mount Allison University, Sackville, New Brunswick, Canada.

Years in College: 1895-96.

Degrees: A.B.; A.M. 1897; A.B. (Mount Allison Univ.) 1894; Ph.D. (Strassburg Univ.) 1900.

Unmarried.

Occupation: Educator.

Address: Brown University, Providence, R.I.

A FTER leaving Harvard in the spring of 1898 I spent a year studying mathematics at Berlin University under Schwarz, Fuchs, and Schlesinger. I also carried on violin study. As a doctor's degree was not available at Berlin without three years of residence, I went to Strassburg and pursued the study of mathematics and astronomy under Reye, Weber, and Becker. In August, 1900, I received the degree of Ph.D. "cum laude." I was the first English speaking person to get this degree in mathematics from Strassburg; E. N. Huntington, '97 (Harvard), was the second. From 1900 to 1907 I was professor of mathematics and librarian at the Mount Allison Ladies' College, Sackville, N.B. I also had charge of the violin department in the Con-

servatory. During 1907–08 I was professor of mathematics and head of the department at Acadia University, Wolfville, N.S. In 1908 I was appointed instructor in mathematics at Brown University with the understanding that I might spend the year following, 1909–10, in study at the Sarbonne and the Collège de France in Paris. This plan I carried out. Returning to Brown in the fall I have been teaching there ever since. I was made assistant professor in 1911. I have graduate as well as undergraduate instruction with two of the four other members of the mathematical department.

I am a member of the Nova Scotia Historical Society, the Edinburgh Mathematical Society, the London Mathematical Society, the Mathematical Association (England), the Société Mathématique de France, the Deutscher Mathematiker Vereinigung, the American Mathematical Association, the New England Association of Mathematical Teachers; a life member of the American Mathematical Society, and a Fellow of the American Association for the Advancement of Science. I am a member of the Executive Council of the American Mathematical Association.

I have published numerous notes and problems in The Educational Times (London), Mathematical Gazette (London), Notes and Queries (London), L'Intermédiaire des Mathématiciens (Paris), and American Mathematical Monthly. Many articles have also appeared in Bulletin of the American Mathematical Society (of which I am one of the editors), American Mathematical Monthly, Proceedings of the Edinburgh Mathematical Society, Nieuw Archief roor Wiekunde, School Science and Mathematics, and Annals of Mathematics. Longer papers: "Bibliography of the Life and Works of Simon Newcomb" and "Mathematical Instruction in France" have appeared in Transactions of the Royal Society of Canada.

In September, 1909, John Lane, London, published my book entitled "Carlyle's First Love, Margaret Gordon, Lady Bannerman. An account of her life ancestry and homes — her family and friends . . . with twenty-one illustrations in color." The first edition of 1020 copies is now pretty well exhausted. A relative of Margaret Gordon was a student at the Mount Allison Ladies' College. In December, 1915, the Cambridge University Press, (England), published: "Euclid's Book on Divisions of Figures (περί διαι ρέσεων βιβλίον) with a Restoration based on Woepcke's Text and on the Practica Geometriae of Leonardo Pisano." There were 750 copies in this edition. During the present year the National Academy is to publish a greatly enlarged edition of Simon Newcomb's "Bibliography" and the Bureau of

Education at Washington is to publish my *Bulletin* on "The Training of Teachers of Mathematics for the Secondary Schools of the countries represented in the International Commission on the Teaching of Mathematics."

EDWARD DOW ARMSTRONG

Born at Lawrence, Mass., Sept. 3, 1872.

Parents: George David, Emma Josephir e (Dow) Armstrong.

Occupation: Manufacturer of Explosives.

Address: Hercules, Cal.

NTIL November, 1902, I was with the Lewiston Bleachery and Dye Works, Lewiston, Maine, a cotton textile finishing concern. I took a position as chemist with the Climax Powder Manufacturing Co. at Emporium, Pa., which was a few months later taken over by the E. I. duPont de Nemours Powder Co. of Wilmington, Del. They transferred me as superintendent to the Hartford City, Ind., plant in September, 1903; to the Emporium, Pa., plant in April, 1908; to the Senter, Mich., plant in November, 1910, and to the Hercules, Cal., plant February, 1912, where I am located at present.

At the dissolution of the du Pont Company in January, 1913, this plant was assigned to the Hercules Powder Co. and I am acting in the same capacity for this concern. I had planned to celebrate with you in June but the extreme activity in our line of business at present makes it impossible for me to make the trip.

HAVE no great and noble deeds to report, for I have been, as I am now, merely an inoffensive and inconspicuous member of the profession of the pedagogue. After two years of "hard

labor" in the South, I turned to Normal School work, for that, you know, is not labor at all, and I have remained in it ever since. From 1899 to 1912 I had varied and valuable experiences at the State College for Teachers at Albany, N.Y., and then I assumed my present task as Principal of the State Normal School at Worcester, Mass. During the years 1902-04, I followed my Baedeker about Europe and incidentally "pursued" some studies at the Universities of Grenoble and Paris: and in 1910 I took a more extended but less serious trip through the countries of the near East. In the natural course of my reflective moments I have penned about the average number of magazine articles designed to speed the pedagogical traveler on his way. How many have been contemplated which the dear public has been spared, the world will never know and consequently can never be adequately grateful. One book is all (so far) that I have tempted unsuspecting persons to buy. As you probably would not suppose, there has never yet been a long line waiting to get a chance at it, and I doubt therefore if I'll have the heart to inflict the populace with another. Among my "diversions," besides occasional golf and cross-country tramping, I have edited a series of monographs, conducted for four years annual conferences for rural uplift, given numerous lectures before a variety of organizations including "Women's Clubs," taught in the Summer School of the University of Vermont and served on the Committee on Relations with Secondary Schools for the New England Federation of Harvard Clubs. From my own institution, of course, I don't send many students to Harvard for those in my gentle care are mostly the fairer folk, the proportion being about six times "41 to 0." But I am still loval to old Harvard and I am a very proud "ninety-sixer."

The book I have written is entitled "Outlines of the History of Education." 1911.

CHARLES FENNER ATWOOD

Born at Johnston, R.I., June 22, 1874.

Parents: Henry Harrison, Emma Frances (Fenner) Atwood.

School: Johnston (R.I.) High School. Years in College: 1892-93, 1894-96.

Degrees: A.B.; M.D. 1900.

Married: Adah C. Gorton, June 26, 1900, Providence, R.I.

Children: Boy, Aug. 20, 1906, died Aug. 20, 1906; Charles T., June 14, 1908: Westcott G., Jan. 20, 1910; Robert G., July 10, 1914.

Occupation: Physician.

Address: 821 Massachusetts Ave., Arlington, Mass.

THE short and simple annals of the past five years are quickly told. I am at the same old job practising general medicine at nearly the same old place. In October, 1912, I removed to 821 Massachusetts Ave., Arlington, Mass., a few doors above my old location, and, I trust, am permanently settled here. My chief avocation is the innocent one of raising small fruits, vegetables, and posies in the rather large back yard. My specialty is irises of which I have more than one hundred varieties. In July, 1914, our fourth son was added to the family circle. This is my only claim to fame. If all Ninety-sixers could show a like record there would be no talk of the race of college men dying out.

HE was registered in the Harvard Law School in 1897-98. His occupation later was that of a tutor. He has not given for the class reports any account of his activities. The only information the Class Secretary could obtain for this report was that he died on the above date after a long illness.

ONFORMING (under protest) to the rule that each report is to be complete in itself, not a mere continuation of the last report, I will condense by saying that after one year in the Graduate School I had to give up my ambition to be a professional zoölogist and went into the law instead, beginning active practise in 1900 in the office of Dunbar & Rackemann (succeeding Balch & Rackemann), in Boston, with real property, conveyancing, trust, and probate law as specialties. I have been hard at it ever since, scrabbling for a living with the rest, maintaining zoölogical work (with Malacology as my specialty) as a hobby. and getting drawn more deeply than I ever intended into the "reform" (beastly word!) politics of my native city. With a happy home life to turn to from the worries of active practise and a slim pocket-book, and with an absorbing hobby, the years fly by unmarked by much of anything except occasional illnesses, vacations, bits of travel, etc.; the occasional excitements of city politics; and the children's growing up.

When I closed my last report I was in poor health from overwork and had had to shut down on some of my activities. next spring (1911) I had a memorable trip with Bob Morse ("Up the Street") through the Lesser Antilles to Trinidad and return. We were, most of the way, on the little Pickford & Black packetboat "Sobo," Halifax to Demerara, and if any classmate wants a really charming and novel spring outing, let him try the same thing. It did me a world of good and ever since I have been up to my work again. In June, 1912, my term as a member of the Boston Finance Commission expired and, feeling that I had done my share for the time being, I declined reappointment and also declined appointment to the State Board of Economy and Efficiency which was created to do similar work along state lines. Since that time my political activities have simmered down to work for the Boston Charter Association, with the Good Government Association, and as vice-chairman of the Chamber of Commerce Committee on Metropolitan and Municipal Affairs.

My law partner, Carleton Hunneman ('39), agreed with me that we could pull better apart than together and on April 1, 1913, we amicably dissolved partnership after nine years of double-harness. I practised alone until January 1, 1914, when I formed a partnership with David A. Ellis ('94) under the name

of Ellis & Balch with offices in the same building (60 State St.) where I have been since 1904. In November and December, 1915, emergency law business took me to London — a trip which by reason of bad weather and war conditions I found rather hard, but mighty interesting. The sight of that great capital at the very crisis of the war was well worth while, and I had, besides, opportunities for watching from the inside how some of the political wheels went round. I find that otherwise than as above what I had to say in my last report is still applicable.

SINCE the last Class Report my short political experience has ended as abruptly as it began. The political reaction of the last few years has left those of us who hold aggressive liberal views on government, without influence, at least for the present. My time has been spent partly in travel, but chiefly on my farm in New Hampshire, first to regain the health which five years of continuous strenuous political fighting had weakened, and secondly in the study of various problems in economics and government which have been of late so glibly discussed upon the stump. I do not expect again to be active politically, but shall continue to have a keen interest in most of the great questions which we must inevitably act upon in the next few years. It is hard to realize what wonderful times we live in, or to appreciate how far-reaching are the issues now at stake not only in Europe but also right here at home.

THEODORE CHAPIN BEEBE

Born at Springfield, Mass., April 11, 1874.

Parents: Theodore Chapin, Amanda (Ellis) Beebe.

School: Springfield (Mass.) High School.

Years in College: 1892-96

Degrees: A.B. (1897); M.D. 1900.

Married: Ethel Haskins Rust, Aug. 22, 1914, London, England.

Occupation: Physician.

Address: 61 Mt. Vernon St., Boston, Mass.

AFTER finishing my hospital service at the Boston City Hospital, I went into practise in Boston in 1902. For several years I was Surgeon to the Boston Dispensary and Instructor in Surgery in the Tufts College Medical School. Finally becoming especially interested in vaccine therapy and bacteriology I gradually took up the study and practise of these subjects, and have been busy with them for the past five years. During the first month of the war I went over to London and was married to Ethel Haskins, widow of Dr. F. L. D. Rust, '95. She was in Austria when the war broke out and had a difficult time getting back to England through Germany. In May, 1915, we went over to England, where by great luck I was taken on by the British Red Cross, and sent to Calais as bacteriologist, being the only American whom they have taken on for medical service on

the continent. Calais, being on the line of communications, was most interesting, and there was a good deal that was exciting and diverting. There were a number of air raids, which did little damage, and a favorite amusement was watching mines being blown up by the crews of trawlers off the port. The work at the hospitals varied, being heavy at times and dull at others. I had an opportunity to go into Belgium along part of the line near the sea which was very interesting. On finishing my service at Calais I was offered, and accepted, the position of pathologist to the American Ambulance at Neuilly (Paris), which post I am holding at present. We have had a great deal of work here since the Champagne battle in September, 1915, and at present (February 24, 1916) we are evacuating all the wounded we can, in preparation for the great German drive which is developing. I hope to stay here until the end of the war, much as I hate to miss the twentieth reunion of the class.

HECTOR LOUIS BELISLE

Born at Worcester, Mass., Oct. 8, 1873.

Parents: Alexandre, Marie (Dorval) Belisle.

School: Classical High School, Worcester, Mass.

Years in College: 1892-96.

Degree: A.B.

Married: Mildred Grace Potter, June 28, 1905, Boston, Mass.

Children: George Edmond, April 1, 1906, died Aug. 23, 1911; Anna Marie, June 10, 1907; Alexander, Aug. 9, 1908; Eugene Louis, Jan. 13, 1910; Elisabeth, Oct. 2, 1913.

Occupation: Educator.

Address: (business) Anawan St., Fall River, Mass.; (home) 488 June St., Fall River, Mass.

POR four years after graduation I was a teacher in the Lawrence (Mass.) High School, teaching classes in French chiefly. In 1900 I entered upon grammar school work as master of the John R. Rollins School in same city. In 1904 I was appointed to the Lawrence Board of Teachers' Examiners and in 1912 Supervisor of Evening Schools. Since the summer of 1913 I have been Superintendent of Schools at Fall River, Massachusetts. About 1901 I became interested in the problem of retardation and elimination of backward pupils in the elementary schools and experimented in methods to remedy the existing conditions. The results of ten years of pioneer work in this field appeared in an article published in the Journal of Education. During the winter of 1909 I visited elementary and secondary schools throughout

France, observing carefully industrial as well as academic instruction. With Barrett Wendell and other exchange professors I agree that much of the education "made in France" is well

worth studying.

I have considered it my duty to take an active part in organized movements which could contribute to the community welfare. I have held the following positions: treasurer and councillor Essex County Teachers' Association, 1901–03; assistant-secretary Franco-American Historical Society since 1905; vice-president Lawrence Harvard Club, 1910–13; vice-president Chadwick Club (musical), 1906–13; president Bristol County Teachers' Association, 1914–15; vice-president Massachusetts Schoolmasters' Club, 1914–16; president Fall River Branch Massachusetts Peace Society, 1914–16; director Fall River Chamber of Commerce, 1915–16; Member National Education Association, Massachusetts Teachers' Association, Harvard Teachers' Association, and other educational organizations. My hobbies are: Youngsters, golf (?), music, and some work.

P.S. If Carney has found his generous manager I should like his address, as Chamberlin, '95, and I can offer him an operatic gold mine. Musical critics tell me that New York '96ers should educate the "tired man of Broadway" up to something really

good. We have it.

I LIVED in California because of eye trouble until 1900, when I entered the offices of Burr, Coombs & Wilson, attorneys, in Brooklyn, N.Y. I was admitted to the bar while in that office. I was called to Maine the following year by the death of my father and remained there for a year, after which I practised in Boston

for three years. In 1905 I went back to Brooklyn and took a position with the Cross, Austin & Ireland Lumber Company, as secretary and counsel, which 'position I held until May, 1914. This work proved too confining and too much of a strain for me and I was advised by my doctors to give it up. Since resigning that position in 1914 I have made no permanent connection; I have spent the greater part of the time resting.

CINCE the latter part of the year 1899 I have been practising law and since June, 1908, have done so in the Law Department of the government of the City of New York as an assistant corporation counsel. The special work assigned to me has been in connection with the interpretation of the Civil Service Law of the State of New York and other statutes relating to the employment and removal of employees and their resultant rights. The performance of these duties requires frequent appearances in the courts and the preparation of letters of advice to the heads of the various other city departments. I was smitten with "preparedness" in 1915, and as a result attended the camp of the business and professional men at Plattsburg in August, when I met such other ornaments of the Class as H. N. Arnold, H. S. Grew, F. L. Huidekoper, K. H. Lewis, D. P. Rodgers, H. S. Satterlee, J. McC. Sturgis, John Warren, and George Wrenn. Needless to say '95 was not so conspicuously represented.

HARRY AUGUSTUS BIGELOW

Born at Norwood, Mass., Sept. 22, 1874.

Parents: Erwin Augustus, Amie Leighton (Fisher) Bigelow.

School: Norwood (Mass.) High School.

Years in College: 1892-96. Degrees: A.B., LL.B. 1899.

Married: Mary Parker, April 12, 1902, Honolulu, H.I.

Occupation: Educator.

Address: (business) University of Chicago, Chicago, Ill.; (home) 5533 Blackslone Ave., Chicago, Ill.

A FTER graduation from the Law School in '99, I worked in the office of Mr. James Carret, in Boston. His practise was chiefly in conveyancing and I was by way of becoming a historian on a small scale of certain Boston holdings when in the early part of 1900 I received an opportunity to go to Honolulu. This offer came through Dean Ames from Ballou, a Harvard man of about '95 law, who had been in practice in the Hawaiian Islands with two other practitioners. They had prospered to such a degree that they needed some one to devil for them. I was glad to take the chance that was offered and went out for one year. At the end of that year I was offered an interest in the firm. This offer I was glad to accept and my return to Boston was indefinitely postponed. I had the usual ups and downs of practise, won my fair share of cases, acted on one or two occasions as temporary

justice of the Supreme Court of the territory in the disqualification of one of the regular members of the court. While in Honolulu I met the lady who subsequently became Mrs. Bigelow and we were married there in 1902.

At the time of my graduation from the law school I had told Dean Ames that I hoped ultimately to get into the teaching of law. After four years of practise I decided to make my final choice, and in 1903 I wrote the Dean asking him to keep me in mind for that kind of work. Almost by return mail I received a letter telling of the organization of a law school at the University of Chicago and asking me if I would accept an appointment as a member thereof. I did so, and began my work here in January, 1904. I have been here ever since, enjoying my work more all the time; which, I suppose, is true of all of us. I have joined the usual number of clubs; and have written various works on legal topics. I read with a certain gentle interest the article which Bob Raymond, '95, contributed to the Atlantic a year or two ago on the recompenses of not being too young or words to that effect.

Editor, third ed. "May's Criminal Law"; author of article on Insurance in "American Law and Procedure," and of various

articles in the law magazines.

A FTER graduation I entered the employ of Flint & Company, running a line of clipper ships from New York to San Francisco. Mr. Flint, a few months later, transferred me to his export office, that is, Flint, Eddy & Company, where I stayed for a year or more. I then entered the employ of J. H. Lane &

Company, wholesale dry goods merchants, New York City, and after six months spent in the employ of that firm, down in the subcellar, started in as a salesman with Grinnell Willis & Company, selling agents for the Wamsutta and other well known cotton mills. Not liking the dry goods business, I employed my evenings studying bookkeeping one winter, and taking a few months of the law course at night-school in New York University, in order to find out whether I cared enough for the law to take up a regular course, also wishing to hold on to the dry goods proposition as a means of supporting myself in the meanwhile. In 1900 or thereabouts I made up my mind that the banking district was the place for me, so I started in all over again at twenty-five dollars a month with the old firm of Vermilye & Company. A few months later my firm started me on the road selling bonds, my route extending from Cleveland, Ohio, to San Francisco, Seattle and Portland. In 1902 William Procter, Yale Scientific School, 1894, asked me to join him in forming the partnership of Procter & Borden, dealers in securities. The association has been a pleasant one.

HORACE BRIGHT BRAINARD

Born at Thompsonville, Conn., Aug. 9, 1874.

Parents: Horace King, Rachel Frances (Bright) Brainard.

Years in College: 1892-95.

Married: Edith Maria Campbell, Nov. 16, 1898, Thompsonville, Conn.

Occupation: Purchasing Agent.

Address: 126 Pearl St., Thompsonville, Conn.

TMMEDIATELY after leaving college I became associated with my father in business, remaining with him until April 1, 1905, when I accepted an offer to become the purchasing agent of the Hartford Carpet Corporation, the mills of which were located in Thompsonville, Conn. During the nine years that followed my taking up this work I had the time of my life. I smoked good cigars, I played golf whenever I cared to, — I was the happiest and most contented fellow you could imagine. Incidentally when Waldo Farrar called and tried to sell me dye stuff I pitied him and tried to show my sympathy for him in his work by much kind advice and few orders. In the month of July, 1914, the Hartford Carpet Corporation bought the Bigelow Carpet Company forming the Bigelow Hartford Carpet Co., with the result that on August 1, 1914, I was appointed purchasing agent for the three mills, one at Lowell. Mass., one at Clinton, Mass., and the other at Thompsonville, Conn.

I have every reason to believe that I should have continued to enjoy my work were it not for the fact that certain gentlemen in Europe had a slight misunderstanding, the results of which were that among other things they decided to stop wholly or in part the shipment to America of everything that is necessary in the manufacture of carpets and rugs. The problem of supplying these mills, employing some seven thousand hands, with material has brought gray hair, sleepless nights, constant worry and lots of hard work. I quite envy Mr. Farrar now and do wish he would have pity on a poor unfortunate purchasing agent who would be glad of just one pound of dye stuff. I would also like to suggest that Mr. Farrar be allowed to pay the expenses of the celebration this year, realizing that one who had made money so easily and so fast should be given such a privilege.

After spending that summer in travel abroad, I began the practise of law in my home town, and have continued to practise to the present time. In 1902 I became a member of the firm of Jennings, Morton & Brayton (Andrew J. Jennings, James M. Morton, Jr.) and in 1912 when Mr. Morton went on the bench, joined with Mr. Jennings in the firm of Jennings & Brayton and am now in business in that partnership. In 1909 and 1910 I was elected a representative to the Legislature and during the succeeding four years was an alderman in this city. At the present time I am Vice-President of the B. M. C. WILLIAM LAWTON SLADE BRAYTON

Born at New York, N.Y., Nov. 13, 1872.

Parents: Hezekiah Anthony, Caroline Elizabeth (Slade) Brayton.

School: Phillips Academy, Andover, Mass.

Years in College: 1892-96.

Degree: A.B.

Married: Mary Easton Ashley, June 18, 1903, Fall River, Mass.

Children: Lawton Slade, June 20, 1904; Lincoln Darol, Oct. 21, 1905; Constance, March 22, 1907; Ruth Sherman, April 17, 1908; Perry Ashley, May 25, 1910; Mary Elizabeth, June 11, 1912; Richard Anthony, June 19, 1913; Sherman, July 19, 1915.

Occupation: Manufacturer.

Address: 425 Cherry St., Fall River, Mass.

A FTER leaving college, I entered the office of the Sagamore Manufacturing Co., manufacturers of cotton goods in Fall River. I stayed there for about six years, then organized the cotton brokerage house of Waring & Brayton, dealing in actual cotton, buying from the South and selling to the mills. In 1908, on the death of my father, I was elected treasurer of the Sagamore Manufacturing Co., a cotton goods mill of 90,000 spindles. The same year I started to erect the third mill of this corporation, having in all 150,000 spindles, the largest public corporation in the city. Since then I have been much engrossed in my work, going frequently to New York and farther West to sell goods. I am director in the First National Bank, and B. M. C. Durfee Trust Co. of this city, also in the Durfee Mills and Fall River Electric Light Co. In Boston I am a director of the American Mutual Liability Co. I belong to the Harvard Club of Boston,

which by the way is as fine a club as any man could wish for, also the University Club and Merchants Club of New York. I have not held political honors, although I was a member of the Fall River Port Improvement Board, and after serving three months on the board, I found the State Land and Harbor Board didn't like our interfering with their political field and they put us out of business. I am glad I do not have to depend upon politics for a living. I come across a great many Harvard men in my business life, in cloth, cotton, machinery, insurance, and banking, and after meeting and talking with them I always come away with the thought that it is most fortunate to be thrown in with such a fine, honorable set of men.

Parents: Charles Ingersoll, Evelyn Day (Weld) Brown. School: The Beverly (Private) School, Beverly, Mass.

Degrees: A.B.; B.D. (Camb. Epis. Theol. Sch.) 1904.

Occupation: Minister.

Address: 19 Beacon Ave., Norwood, Mass.

THE first five years after graduation I devoted to dodging the ministry. There were five weeks with the Consolidated and McKay (predecessor of the United) Shoe Machinery Company: then school teaching and private tutoring in Salem and Beverly. It did not work. In the fall of 1901 I entered the Episcopal Theological School, Cambridge, taking my degree June 1, 1904, on the day of my ordination to the ministry. First steps in the practical work of the ministry I got as assistant in St. James Church, Roxbury, where I remained until July 31, 1906, and a wider experience as assistant in St. Stephen's Church, Lynn, where I had the pleasure of sharing the development of the Order of Sir Galahad, for boys, an organization since made a department of the Knights of King Arthur and now becoming well known in the Episcopal Church. Several of the rituals were my most permanent contribution to the order. On April 16, 1909, I took charge of a vacant lot of land in the center of the town of Norwood with a debt of a thousand dollars on it, where now stand a dignified church building with commodious parish hall in the basement (a "hall" by courtesy, in deference to what it may become with well tinted plaster walls and hardwood floor) and a handsome rectory. Here I still am, trying to do my duty

as a citizen, like thousands of other parish priests, in a life full of eventfulness to me but not differing from the experiences of the rest, nor particularly interesting to others.

I came to Minneapolis in the spring of 1904 and have been here ever since except for a season's work in Alaska in 1905. Experience here has taken me through times with the Minneapolis Steel and Machinery Company and the Cadwell & Brown Company up to September, 1910, when I entered into partnership with Edwin H. Hewitt, making the firm Hewitt & Brown, architects and engineers.

I was elected a member of the American Institute of Architects in 1912, and at the last annual convention, held in Washington last December, was honored by being elected a member of the Board of Directors for the next three years. THE most important event since my graduation, in my personal history, was my marriage. Of our six children, four are living. The two oldest are boys, fifteen and seventeen years of age respectively, both six feet in height. They will, I trust, make good material for Harvard undergraduates. The only living daughter is a curly head of two years, a veritable sunbeam,

and the youngest boy a babe of one month.

The first few years of my post graduate life were spent in teaching, interrupted within parts of two years in a few short-lived business undertakings. These years were spent in Ohio, Connecticut, Massachusetts, and Missouri. From St. Louis, Mo., I came to Washington, D.C., in 1901. Since then I have been on the examining corps of the United States Patent Office, finding the work congenial, interesting, and instructive. I have also taken a course in general law, graduating at the National University Law School with the degree of Bachelor of Laws in 1904; also with the degree of Master of Patent Law at George Washington University in 1906. In addition to my home and office duties I have tried to find some time for Bible School and church work as well as other community enterprises. I find living conditions in Washington quite satisfactory and will probably spend the remainder of my days in the National Capital.

tion, Philadelphia, Pa.

The Seybert Institution is an endowed corporation supported by the income of funds left by the late Henry Seybert to provide care for poor boys and girls. The corporation has a principal of \$1,400,000 invested in municipal and railway bonds and in coal lands; it also holds real estate in the city and suburbs to the value of about \$500,000. As Superintendent it was my job to develop the work of the Institution into an organization which included: (1) An investigation and admission division known as the Children's Bureau. (2) A central headquarters for the emergency care, treatment and study of dependent children, known as the Temporary Shelter. (3) A model village for the training and more extended observation of dependent children and those whose mentality is in question. (4) A bureau for the study of records, methods of work, and efficiency of organization. known as the Bureau for Social Research. With the landscape and general architects we worked out a scheme for the development of the tract of 300 acres in the suburbs of Philadelphia as a model village for children.

From June, 1915, to date, while acting superintendent of the New York City Children's Hospitals and Schools, Randall's Island, the management of these institutions has been reorganized and a plan for the physical development of the Island for the purposes of an institution for the care of feeble minded children has been worked out. Address: (business) Harvard Medical School, Boston, Mass.; (home) 2 Divin-

ity Ave., Cambridge, Mass.

A FTER graduation I became a student in the Harvard Medical School and have continued in association with it as teacher and investigator since I received my M.D. degree in 1900. In 1906 I was appointed George Higginson Professor of Physiology. The main events since 1900 have been associated with educational improvements and physiological investigations. A paper which I wrote as a medical student, in 1900, on the "Case Method of Teaching Systematic Medicine," offered a suggestion which has been made use of by a number of teachers who have prepared case books in various aspects of medical practise, for example, surgery, neurology, obstetrics and gynecology.

As an undergraduate in the Medical School I began studies of the activities of the digestive canal by means of the then newly discovered Röntgen rays, and was fortunate in being the first to make use of the admixture of bismuth salts with the food — a method now being used all over the world — in studying the normal and abnormal activities of the stomach and intestines. A score or more of papers on the mechanical activities of the digestive canal resulted from these early investigations conducted in the Harvard Physiological Laboratory.

After completing the series of researches on digestion my students and I began, in 1911, studies of the influence of intense emotional states on the body. The accounts of these studies have been collected and published in a separate volume. At present I am busy investigating certain aspects of the physiology of the

ductless glands — a fascinating field for research.

Following is a list of the Societies to which I have been elected to membership: American Association for the Advancement of Science, American Physiological Society (Treas., 1906–1912; Pres., 1914–), Society for Experimental Biology and Medicine, American Medical Association, American Gastroenterological Association (Pres., 1910–1912), American Philosophical Society, Philadelphia (elected 1908), American Psychological Association, American Academy of Arts and Sciences (elected 1906), Massachusetts Medical Society, Boston Society of Medical Sciences (Pres., 1908), American Röntgen Ray Society (Honorary member, elected, 1913), New York Röntgen Society (Honorary member, elected 1914), National Academy of Sciences (elected 1914), Association of American Physicians (elected 1914).

Teaching and investigation are somewhat restricted in their immediate influences. I have had opportunity to come into relations with larger services as a member of the National Council on Health and Public Instruction of the American Medical Association, as a member of the Hygeine Reference Board of the Life Extension Institute, and as a Trustee and a member of the Executive Committee of the Harvard Medical School of China. Since the organization of the Harvard University Press I have served

as one of the Syndics.

As Harvey lecturer in New York, in 1911, I reported new observations on the nature of hunger which have been followed by numerous investigations on this subject at the University of Chicago. And on the basis of the studies of the bodily effects of emotional states, I gave, in 1914, the Wesley Carpenter Lecture before the New York Academy of Medicine, on the physiology of Medicine, on the physiology of the martial emotions.

Life as a teacher and investigator is a quiet one, without many exciting incidents. My chief diversions have been found in the hills and mountains of New Hampshire during the summer months.

I have written the following books: "A Laboratory Course in Physiology," 1910, 1911, 1913; "The Merchanical Factors of Digestion," first in a series of International Medical Monographs, 1911; "Bodily Changes in Pain, Hunger, Fear and Rage," 1915.

Lane, New Rochelle, N.Y.

EVERY year, as I have observed, a number of bright youngsters just out of college drift into publishers' offices, with the idea that as publishing is the missing link between business and a profession, it offers an inviting career. Shortly after leaving college I was such a youngster, — with the quality of brightness open to question. I obtained my wish, started work in the publishing business, and there have been times when I wished I had never had anything to do with the making and marketing of books, and times when I was glad that I'd made it my life work.

I can't say that my life has been one of violent changes, as I have been with one publishing firm eighteen years. During that time I have held about every job they had to give — shipping clerk, manufacturing assistant, traveling salesman, advertising man, etc., etc. At present I am secretary of the publishing house of Dodd, Mead & Company. My particular job is to oversee the process of turning a manuscript into a book, and a very complicated, exasperating, and fascinating process it is. Anyone who has made a book knows the thrill, — akin I imagine to the feelings of an architect when he sees the completed building he has designed — when after a couple of months of planning and work your book comes through, and is all right.

I am also business manager of a magazine, *The Bookman*, and have an interesting struggle to see that we get enough subscribers to satisfy the advertisers, and enough advertisers to satisfy us.

I have never been elected to a position of public trust, even that of juror, although I have always been ready to heed my country's demands. Once I was nearly appointed to the library board of the town I live in; but at the last minute the mayor changed his mind, fearing I suppose, that I would try to fill the public library with books all of one brand.

My favorite amusement used to be a trip, every summer, with a single companion, far into the woods of Northern Canada. We would go, without guides, quite off the map, trusting to luck to get back on again. But in recent years, out of regard for the insurance companies, and my wife and kiddies, I have confined myself to the milder pleasures of tennis, swimming, and a wretched kind of golf.

There's a sturdy small boy growing up in my house who wears a crimson sweater upon which is sewed a large H. From which fact I imagine that there will be at Harvard, say in the Class of

'32, another Arthur M. Chase.

Publications: I am the author of no books; but have written about forty or more short stories and articles in magazines.

In 1900-01, I was Master in Greek and Latin at St. Mark's School, Southborough, Mass. Since September, 1901, I have been teaching at Harvard, as instructor in Greek and Latin (1901-03), tutor in Greek (1903-04), instructor in Classical Archæology (1904-06), and (since 1906) assistant professor of Classical Archæology. With these two exceptions, I have been out of Cambridge only for short periods. I have contributed articles and book reviews to various periodicals, especially to the Harvard Studies in Classical Philology, The American Journal of Archæology, the Classical Journal, and the New York Nation, and have written one book. FOR five years I worked in and for the bond business of N. W. Harris & Co., Boston. Then for five years I lived in Holden, Mass., and worked on, over, and around the Worcester and Holden Street Ry. Co., the last year as superintendent of the road. I can thank Mr. Mellen for the fact that I am no longer interested in trolley lines. They are the nearest to Home Missionary work

that I have yet undertaken. Since leaving Holden my home has been in Wellesley Hills, Mass., and now our town, thanks to Wellesley College, Roger W. Babson, and a few of us who are willing to put our money into it, is fast becoming the best known suburb of Boston. As you may have already judged from the above, I am interested in the real-estate development of this town and am well satisfied with the progress we are making.

SINCE graduation I have attempted to be a lawyer, a politician, a social uplifter, an author, a Secretary of the Humane Society of Massachusetts, a School Committeeman, an Athletic Trainer, a business man, and a Napoleon of Finance. Marking myself upon the scale in vogue in our dear old undergraduate days, I should say that I ought to receive an average somewhere between D — and E+, although it is a common failing with all of us to rate ourselves more highly than we deserve. But in my love, loyalty, and devotion to the grand old class of '96, I shall give myself an A. Long may she endure, to provoke, by her presence, the plaudits of an admiring world.

Mr. Clark is also the Assistant Graduate Treasurer of the

Harvard Athletic Association. — Ed.

Publications: I have written eight or ten books and some magazine articles.

MY leisure has been devoted mainly to literary work of which the following results have been printed: "Compression in the old Spanish Poema del Cid"; "A Bibliography of Spanish American Literature"; and "A Practical Spanish Grammar." The grammar has become one of the most widely used text books in the study of Spanish now being rapidly introduced into

the secondary schools of our country. I have now in the press of the Macmillan Co. "A Literary History of Spanish America," to be published in the autumn. This book is the result of five years' labor and research in a neglected field. There is no book in English concerning the literature of Spanish America nor one in any other language which adequately presents the subject. In recognition of my endeavors in the study of Spanish the Hispanic Society of America has elected me a corresponding member.

GEORGE LEMAN COLLINS

Born at Standing Rock Indian Agency, North Dakota, Feb. 19, 1874.

Parents: Colonel Edward, Rachel Boardman (Leman) Collins.

School: Milton Academy, Milton, Mass.

Years in College: 1892-96. Degrees: A.B.; M.D. 1900.

Unmarried.

Occupation: Commissioned Medical Officer, U. S. Public Health Service.

Address: c/o Surgeon General, U. S. Public Health Service, Washington, D.C.

A FTER finishing my term as house officer at the Carney Hospital, Boston, in April, 1901, I took a competitive examination for appointment as First Lieutenant, United States Army Medical Corps (Regulars) in May, 1902, before a Board in Washington examining one hundred and twenty-nine doctors. Came out first, making 983 out of a possible 1,000. With the seventeen other successful candidates was commissioned First Lieutenant. United States Army, in June, 1902. I was detailed to attend the 1902-03 session of the United States Army Medical School in Washington, graduated, and served mostly in artillery garrisons. After successfully passing a competitive examination for commission in the United States Marine Hospital Service, I resigned from the Army and accepted this commission in October. 1903. I served about five years in quarantine duties at Reedy Island, Del., and at Fort Monroe, Va. I was promoted to the grade of Passed Assistant Surgeon in June, 1908, passing first of the class examined for promotion. I was detailed at the United States Marine Hospital, Stapleton, Staten Island, N.Y., in June. 1909, having charge of the surgical and genito-urinary wards for about two years and putting in my afternoons and evenings and leaves of absence in special postgraduate instruction in eye and ear surgery at the New York Post Graduate Medical School and Hospital.

I then served for short periods at the United States Marine Hospital, Chelsea, Mass., and at Ellis Island, New York. I was then ordered to the U.S. Coast Guard Cutter Unalga. After short cruises along the Atlantic Coast we sailed for Port Townsend, Washington, via the Suez Canal. The Unalga was a little vessel only 190 feet long and of 808 gross tonnage. We coaled for about a week each at Gibraltar, Naples, Malta, and Port Said. When nearly through the Red Sea we were ordered back and remained at Port Said until the end of the first Balkan war. Then resumed cruise, coaling at Aden, Colombo, Singapore, Manila, Yokahama, and Honolulu. Took in sights at these ports and environs. At Port Townsend was granted leave of about a year, mostly without pay, and proceeded at once across continent and via Boston, London, and Paris to Vienna where I studied eye, ear, nose, and throat until the leave was exhausted. Proceeded through the Balkans via Belgrade and Sophia to Constantinople, then on ship via Dardanelles to Smyrna, Greece. and Egypt, and home via Paris and London.

I was detailed in charge of a small Government trachoma (contagious eye disease) hospital in the Kentucky mountains twenty miles in from the railroad and the next spring was ordered to the U. S. Marine Hospital, Chelsea, Mass., for a short period; then to U. S. Coast Guard Cutter Winona at Mobile, Ala. I was next sent to Valparaiso, Indiana, to collect statistics relative to the condition of eyes and ears of typical American rural school children, and then to Washington, D.C. I have been promoted to the grade of Surgeon. In Washington I am making an extended investigation of the condition of eyes of Government employees engaged in different occupations under different conditions of lighting.

EDWIN HENRY COLPITTS

Born at Point de Bute, N.B., Jan. 19, 1872.

Parents: James Wallace, Celia Eliza (Trueman) Colpitts. School: Point de Bute (N. B.) Public School, and tutor.

Years in College: 1895-96.

Degrees: A.B.; A.M. 1897; A.B. (Mt. Allison) 1893.

Married: Annie Dove Penny, Aug. 17, 1899, Carbonear, New Foundland.

Child: Donald Bethune, Sept. 30, 1900.
Occupation: Electrical Engineer.

Address: (business) 463 West St., New York, N.Y.; (home) 136 South

Munn Ave., East Orange, N.J.

A FTER about two years and a half in the Graduate School. A I entered the employ of the American Bell Telephone Company, and was engaged in engineering work in what was known as the "Mechanical Department." The work was actually in the nature of research applied to telephone engineering problems. After a few years the so-called "Mechanical Department" of the American Bell Telephone Company was merged into the Engineering Department of the American Telephone and Telegraph Company, with a consequent broadening of the problems handled by the group of men with whom I was associated. In 1907, the engineering work of the American Telephone and Telegraph Company and Associated Companies, including the Western Electric Company, was reorganized and I was assigned to work in the Engineering Department of the Western Electric Company in New York City. Since then I have been located at the New York Offices of the Western Electric Company, at first in charge of the work of the physical laboratory and later as research engineer.

While, on the whole, my life and professional career have

perhaps been rather uneventful, it has been my good fortune and privilege to have been interested in many engineering matters of large importance to the telephone system, among the more recent of which were the accomplishment of extreme long distance telephony and wireless telephony. From the beginning of my business career I have also been extremely fortunate in that I have found the men with whom I was associated and with whom I had to deal to be men of the very highest type.

Incidentally, I may mention that in addition to membership in various other societies I am a Fellow of the American Institute of

Electrical Engineers.

HENRY SEYMOUR COLTON

Born at Calumet, Mich., Nov. 24, 1872.

Parents: Henry Roderick Seymour, Elizabeth (Pope) Colton.

School: Phillips Exeter Academy, Exeter, N. H.

Years in College: 1892-96.

Degree: A.B.

Married: Helen Richards Williston, June 13, 1901, Cambridge, Mass.

Child: Seymour, Feb. 24, 1902.

Address: (business) P. O. Box 113, Passaic, N.J.; (home) 61 Howe Ave.,

Passaic, N.J.

A FTER I left College I attended the Harvard Law School a vear; taught school several weeks (Holbrook Military School, Ossining, N.Y.); and was accountant three years at the Merchants' and Miners' Bank, Calumet, Mich. As though that little work had broken my health, I entered Butler Hospital, Providence, R.I., for a protracted stay and emerged therefrom with loss of home, business, and about all except my wits. But I found a job in Boston as porter in a restaurant, then truckman at the North Station, Boston, and finally spent a summer in the office of the Armstrong Transfer Co., Boston. I couldn't stay indoors, so I quit again to take a short trip to Europe (I had enough money to live comfortably). This determined my future. Let me insert here the fact that I was married in 1901 and divorced in 1909. The latter year I came to Passaic, N.J., to visit relatives and here I have been ever since. I am now a jack-of-all-trades and lend my hand in all matters practical when called upon. I am the housekeeper's friend here, a marketer, tinker, carpenter, and entirely altruistic. But on the other hand, I take great pleasure in affairs more idealistic. I walk many miles in the country of North Jersey, and read good books such as George Eliot, Shakespeare, Emerson, James, thanks to college fostering and training. I read them too with more penetration and broader interpretation. I also read modern novelists such as H. G. Wells. But my experience so far has been rather negative and I hope for a less restricted and limited life. I am, pacifist at heart but would take up arms to repel an actual invader. Best wishes to the class.

DURING the three years after graduation, I did work in Economics and History in the Graduate School. In September, 1899, I began work as Assistant Professor of Sociology and Economics in the University of Kansas. On December 1, 1910, I resigned an associate professorship in the same department and University, on account of ill health, which had made it necessary for me to give up my work for some months in that and the preceding winter. Since January 1, 1911, when my resignation was accepted, I have been engaged in farming and stock-breeding, Guernsey cattle of the leading strains being my specialty.

THERE are no changes since my last report to Class Secretary. After graduating from college I became an executor of the Corbin Estate, in charge of various properties, and a junior partner in the Corbin Banking Co. Later I became a director in the Mt. Vernon Trust Co., the Coal and Iron National Bank, New York, President of the Manhattan Beach Co. and the Manhattan Beach Estates, Treasurer of the New England Mortgage Security Co., and an officer in various smaller companies. Since 1907 I have tried to terminate my business interests in New York and devote most of my time to a large orchard I purchased in the Rogue River Valley, Oregon. I find it easier, however, to get into things than to get out of them, and I am still President of the Manhattan Beach Co., Treasurer of the New England Mortgage Security Co., and busily engaged in helping liquidate the assets of various other companies in which I am interested.

The thoroughbred horse business has been practically put out of commission through the interference of our late good and godly, gallery-playing Governor Hughes, but I still continue with a very much reduced stud. I live here at Maplehurst on the farm where I was raised and hope I shall never have to change my address."

Occupation: Educator.

Address: Hotchkiss School, Lakeville, Conn.

CINCE leaving college I have become what I never thought myself capable of being — a school master. I have taught in several schools east and west, but chiefly in the Hotchkiss School at Lakeville, Connecticut. In all I have been here for fifteen years. It is a place of unusual personal freedom and my associations here are all most congenial. A man can have no quality of mind or heart which he cannot here find ample opportunity to exercise. The long summer vacations I spend in the woods in Canada and in the garden at home. The children are now coming on and I am teaching them to ride a horse and in general to be "prepared" for what is coming to them. Life for Creelman, '96, is passing on. He is still poor, still cheerful, and still hopeful. They tell him he is somewhat useful; and he is surely contented, and very happy. The class reunions are bright spots ahead, and there are others, as everyone knows. And my only worry is that my daughter may marry. Later I may worry because she doesn't!

THE past three years have been given exclusively to the reproduction for Harvard of the most active and spectacular American volcano, Kilauea on the island of Hawaii. Three months were spent in the crater making a photographic survey, and a kite photographer put in half a year taking aerial views over the volcano, giving us perhaps the most complete data yet collected for land modeling. Came home from Hawaii by the western way, climbing other volcanoes in Japan, the Philippines, and Java, and seeing more coral reefs in the Pacific, Indian Ocean, and Red Sea. Also tried to find out what the Orient and Europe have in naturalistic land relief work, "the last of the great natural arts." It seems quite safe to say that Harvard leads.

POR two years after leaving college I worked for a lumber and mining company in the Great Smoky Mountains of East Tennessee. My title was chief engineer. We surveyed a twenty-three mile road, a part of which was afterward built; but the concern was weak financially, soon after my resigning it came to an end. I claim no responsibility for its death but call attention to the coincidence. After this I worked under Howard

Elliott, then general manager of the C. B. & Q. R.R. at St. Louis, Mo., in the engineering department as assistant engineer, finally acting chief engineer. In 1904 I went into the lumber business, first in the South, with the Missouri Lumber and Mining Company at Grandin, Mo., then on the Pacific Coast. Since 1907, with my brother Paul Day, have organized and run the Federal Lumber Company; for the past three years being located in Vancouver, B.C. Whenever any '96 man is in this vicinity, I shall count it a great favor if he will let me entertain him. This is a region of limitless possibilities about which we love to brag. I am a member of the University Club in Seattle, Washington, and Vancouver, but have done nothing noteworthy of interest to the class.

POR the time between graduation and 1911 see previous report. I now hold the following medical positions: Ophthalmic surgeon. Massachusetts Charitable Eve and Ear Infirmary: medical director and ophthalmologist, Infants' Hospital; assistant ophthalmologist, Massachusetts General Hospital. I am a member of the council of the Boston Medical Library; secretary of the section on ophthalmology of the American Medical Association, and a member of the Thesis Committee of the American Ophthalmological Society. I might add that δφθαλμός is Greek for eye. I was not sure of this until the Century Dictionary confirmed it. I am now serving my fourth year as president of the Union Boat Club and the best fun I have had since our quindecennial was going to England and seeing the Union Boat Club row the Harvard Second at Henley, on July 4, 1914, in the finals of the Grand Challenge Cup. I feel sure that if we had had some of the '96 crew in the shell that day we should have won. As it was we licked the Germans handily on July 3, and that is more than anyone has been able to do since. I could tell you lots about the secret medical history of members of the class but it would not get by the censor and I must close this now or Jack Hayes will send me another insulting post card.

After a year there I went to Newark, N.J., and was appointed medical examiner for the John Hancock Life Insurance Co., as well as taking charge of a small hospital. I remained a few years and then "crossed the sea" to New York where I have remained since and expect to remain permanently, as I realize I am getting senile and must settle down. I am doing fairly well and enjoy our little gathering of the Harvard Medical Society of New York of which I have the honor of being a member. I never miss any contests in which Harvard and Yale or Harvard and Princeton engage.

▲ FTER leaving Cambridge I spent four years in the College A for Physicians and Surgeons in New York City. I was a surgical externe in Bellevue Hospital for a year, and during my service with the hospital I married Helen K. Muir. When I left I came here to Detroit and began the general practise of medicine. It was my desire to become a surgeon and I was fortunate enough to become associated with Dr. Walter P. Manton, Detroit's best known gynecologist, as his assistant. I was with Dr. Manton for seven years, and found at the end of that time about seventyfive per cent of my work was the care of babies. I was put on the staff of the Children's Free Hospital, The Woman's Hospital and Infants Home, and the House of Providence. About this time I became interested in the problem of infant mortality, and with Dr. Guy L. Kiefer, who was then Health Officer for the City of Detroit, started a Mothers' Clinic. I was in charge of this clinic for three years, and at the end of that time a great many reforms were instituted here in Detroit, all tending to the reduction of infant mortality. The last few years I have become so busy with my practise that I have had to resign from all the hospitals, and I now am connected with the Board of Health in an advisory capacity. In order to let up on the strain of a large general practise in the last few years, Mrs. Duffield and I bought a farm outside of Detroit, and we are now enthusiastic farmers.

Address: 178 Marlborough St., Boston, Mass.

IN/HILE in college I never intended to study medicine, and returned to Cambridge in the autumn of 1896, expecting to study in the Graduate School. Right after my return I became disgusted with the outlook, and acting on a sudden impulse. registered in the Medical School. I received the degree of M.D. in June, 1900. From February 1, 1900, until August 1, 1901, I was Medical House Officer at the Massachusetts General Hospital. Upon completing this service, I went to Europe for the purpose of studying medicine. I remained in Europe until September, 1902, spending most of my time in Vienna, and specializing in Pathology and Pediatrics. I was House Officer at the Children's Hospital from January 1, 1903, until July 1. 1903. After completing this service, I began to practise medicine in Boston, specializing in diseases of children. In 1903 I was appointed to the staffs of the Infants' Hospital and of the Children's Hospital, and also became Assistant in Pediatrics in the Harvard Medical School. From this time on I have continued to practise in Boston, and have been very busy with my teaching and hospital work. In 1913 I resigned from the Children's Hospital in order to devote my time to work at the Infants' Hospital. In 1914, upon the death of Prof. Thomas Morgan Rotch, I succeeded him as physician to the Infants' Hospital. In 1915 I became a member of the Faculty of Medicine, with the title of Instructor in Pediatrics.

ITH the exception of fifteen months of study and travel abroad my entire time since graduation has been given to teaching. For three years I served my apprenticeship as an assistant teacher of numerous subjects, the usual lot of a beginner. then became principal and have remained in the administrative work ever since. My service has been varied, covering both the classical and the manual training high schools and ranging, geographically speaking, from Maine to Michigan. Principals are always drafted into service as "officers" in all educational associations and societies, and so it came my turn to serve as vice-president of the Kennebec Teachers' Association; president of the New Jersey High School Teachers' Association; vicepresident and president of the Schoolmasters' Association of New York and Vicinity: president of the Outlook Club of Montclair; president of the Teachers' Club of Monclair, and vicepresident of The Association of Colleges and Secondary Schools of the Middle States and Maryland. On and off the public platform I have worked vigorously for a modification of the college entrance requirements, and for the reorganization of secondary education. The former is well accomplished: the latter is rapidly taking place all over the country. Harvard has played a large and important part in the great work, particularly in initiating and establishing a new plan of entrance requirements that bids fair to be the standard of the eastern colleges. My life work seems now well established, a pedagogue to the end of my time.

Most of the time was spent at the University of Berlin, Ecole de Droits at Paris, and at Oxford. My traveling was almost entirely on a bicycle and off the tourist paths. It was a period full of interest and profit. In 1898 I entered the law school of Lake Forest University, got my degree of LL.B. and was admitted to the bar in Illinois in the Spring of 1901. Since that time I have been practising law in association with William W. Gurley at Chicago and have been constantly busy and comfortably successful.

Address: 1011 Electric Railway Chambers, Winnipeg, Manitoba, Can.

I SPENT the years 1896-99 in the Graduate School of Harvard University; 1899-1902 with General Electric Company, Schenectady, N.Y.; 1902-03 with the Montreal Light, Heat and Power Co., Montreal, P.Q.; 1903-07 with the Boston & Northern Street Railway and Boston Elevated Railway; 1907-10 with various contractors on construction work; 1910-14 practising as consulting engineer in Winnipeg, Manitoba; 1914-15 nominally at Winnipeg, as a matter of fact out of work as a result of the war and putting in time in the country in the province of Quebec. After a few months spent in 1916 making shells in a Montreal munition factory (running a lathe, wearing overalls, and working ten hours a day) I have returned to Winnipeg for a time in connection with the engineering work on a large terminal to be built at Vancouver, British Columbia, for the Canadian Northern Pacific Railway — a Mackenzie and Mann property.

The future is very uncertain in every way on account of war conditions. The outlook for construction work in this part of the world is not bright and I may have to make extensive changes

in my place of living — the manner thereof, etc.

HAVEN EMERSON

Born at New York, N.Y., Oct. 19, 1874.

Parents: John Haven, Susan Titus (Tompkins) Emerson.

School: Morse's School, and Sach's Collegiate Institute, New York, N.Y.

Years in College: 1892-95.

Degree: A.B.; A.M. and M.D. (Columbia Univ.) 1899. Married: Grace Parrish, June 15, 1901, Radnor, Pa.

Children: Ethel, May 25, 1902; Robert, Nov. 4, 1903; John Haven, Feb.

5, 1906; Ruth, Oct. 20, 1910; Ralph, April 19, 1912.

Occupation: Physician.

Address: (business) 139 Centre St., New York, N.Y.; (home) 120 East

62nd St., New York, N.Y.

FOUR years at the College of Physicians and Surgeons of Columbia University, and two years at Bellevue Hospital prepared me for private practise in 1901. From the beginning I found much pleasure in my profession, and enjoyed all of the work that came my way. I taught at the College of Physicians and Surgeons in physiology and in physical diagnosis from 1902 to 1914. In 1912 I began teaching in courses on public health at the Teachers' College. Laboratory research and clinical studies followed by sundry reports and publications filled spare time. Dispensary and hospital attendance in various general medical and special tuberculosis services continued throughout these years.

I was out of commission because of illness for two periods of six months each, but found plenty of work and opportunity to seize upon my return. More and more the preventive and public health side of medicine appealed to me, and by associations formed with various civic activities I became familiar with some of the aspects of medicine not taught in schools or hospitals. The prevention of infant mortality by control of municipal milk supply, the prevention of tuberculosis, and the general field of municipal sanitation took a large toll of work and time. In 1914 I was invited to associate myself with the New York City Department of Health, and on April 1st was appointed Sanitary Superintendent and Deputy Commissioner by the Municipal Civil Service Commission, and assumed the position at once. It was apparent almost from the beginning that private practise, teaching of medicine, and hospital attendance would have to be sacrificed to serve the new position in the best way.

On November 1, 1915, I was appointed to the position of Commissioner of Health and President of the Board of Health of New York City by Mayor Mitchel to succeed Dr. Goldwater, who retired at that time. As Commissioner of Health and mem-

ber of the Board of Health, my functions are legislative, executive, and judicial, and the opportunities and responsibilities are such as to make me wish for forty-eight hours in every day. So far as my experience extends, the present administration of New York City is absolutely non-political, and with the exception of a few of the laboring group, the entire force of the Department of Health (3300) is on a civil service basis. It is indeed a privilege to work under such conditions.

SAMUEL ADAMS ETTELSON

Born at Chicago, Ill., Nov. 19, 1874.

Parents: Benjamin Joseph, Flora (Phillipson) Ettelson.

School: West Division High School, Chicago, Ill.

Years in College: 1892-93.

Unmarried.

Occupation: Lawyer; Corporation Counsel, City of Chicago.

Address: (business) 511 Ĉity Hall, Chicago, Ill.; (home) 3659 Michigan Ave., Chicago, Ill.

FTER leaving Harvard, I took up the study of law at the A Chicago School of Law, the Law Department of the Lake Forest University. I graduated in 1897 and was admitted to practise law before the courts of Illinois in the same year. For two years following my admission. I clerked in a law office, securing the practical experience I deemed necessary before embarking in the practise of law on my own account. In 1899 I opened a law office and practised alone until 1906, when I became a member of the law firm of Schuyler, Jamieson & Ettelson, composed of the late Daniel J. Schuyler, former Judge Egbert J. Jamieson, Daniel J. Schuvler, Jr., and Charles Weinfeld. The firm engaged in the general practise of law, making a specialty of corporation work. On the death of Daniel J. Schuyler and the retirement of Judge Jamieson, the firm was re-formed under the name of Schuvler, Ettelson & Weinfeld, and continued to do business under that name until November 8, 1915, when I was appointed Corporation Counsel of the City of Chicago. I withdrew from the law firm on this date and the firm was re-formed under the name of Schuyler & Weinfeld.

I was first elected to the Illinois Senate in 1906. I have since been twice reëlected. I represent the Third Senatorial District and have always been affiliated with the Republican party. One of the important Illinois laws which I advocated is the one providing for the regulation of private banks. I fathered the law for cheaper school books in the public schools, and was the author

of the law requiring the State Treasurer to pay interest to the

state on state funds deposited in banks by him.

I am a director of the Chicago Home for Jewish Orphans, a member of the Chicago Bar Association, Illinois State Bar Association, and the American Bar Association. My clubs are the Hamilton, Illinois, Athletic, Metropolitan, Press, Players, and Harvard.

Long Island, N.Y.

TN 1896 there were two industries then just coming into promi-■ nence which seemed to present opportunities to the engineering graduate, one the automobile industry, the other the telephone industry. I chose the latter and have since been engaged in that most interesting line of work. I first took up construction work in Boston, Providence, and Springfield with the American Telephone and Telegraph Company, later going to New York, as assistant general inspector. In 1900 I entered the engineering department in New York and had charge of power plant design and development studies. Later I took up transmission problems involving phantoming, loading of long lines, and the use of the telephone repeaters. This line of work has recently resulted in the great extension of the distance of telephone transmission, making possible conversation between Boston and San Francisco and the use of an all underground cable circuit between Boston, New York, and Washington. I am now engaged in plant engineering work for the superintendent of plant of the Eastern Division of the Long Lines Department in New York.

PROFESSIONALLY, there is no change since the last bulletin. Although never apprehended, I am still dealing in the queer. My psychiatric experience, now in its bitter sixteenth year, makes it every year more difficult for me to pass a belfry without

discovering bats in it. Sociologically and zoölogically the last five-year period has wrought changes in my estate. I managed to live through the fourth class report as a biped. Soon, however, I became a quadruped, — and we are now a hexapod. In 1911 I was inadvertently married, and in 1914 the extra pair of pedals made their appearance. That same month the European war also broke out. That's how I remember it. Occupationally I am now lecturer in abnormal psychology in Princeton University, member of the staff of the New Jersey State Hospital at Trenton, consulting neurologist at Mercer Hospital, also in Trenton, N.J.

BUSY learning how to dye, chiefly making others believe I know, and selling them German products. Two terms of know, and selling them German products. Two terms of study in German factories — trips to German mills and English bleacheries to study textile conditions. Have been with Cassella for sixteen years. After three inspections of Florida and three of California, I bought a small ranch (200 acres) at Encinitas, thirty miles north of San Diego. Last July, after being cut off for months from anything to sell, Brainard's demands to do something for him became so numerous that even Dick Storey's smile when he got a bargain in rare postage stamps ceased to compensate, and as I heard that Milliken had cornered all the dyes in the country, I went to the ranch and learned beans (limas), sunk wells, shot all the snakes I could see! and am now looking forward to "The Day" when I can retire permanently to the land of sunshine and fleas. At present am president of the Granular Metal Co., Roxbury, Mass., doing some business in rare foreign and U. S. stamps, fussing with some bits of real estate, and looking forward to the next Republican Convention. I attended the last two as a guest of the Connecticut delegation.

I am a member of the Harvard Club of Boston, Vesper Country Club, Hartford Club, Stafford Club, Aleppo Shrine — Wareham Chapter, Boston Commandery, and Boston Philatelic Society.

A FTER leaving college I, like a number of the members of Ninety-Six, tried a number of positions until I became associated with the Simplex Electrical Co. of Cambridgeport, Mass. Taking a fancy to this industry I later joined the Stuart-Howland Co. of Boston for three years and then in 1904 became connected with the Wagner Electric Manufacturing Co. of St. Louis, Mo., of which I am district manager. There is little of interest that I can write you, but as the years go by I feel contented with a reasonable degree of prosperity, good health, and a most happy family life.

FTER graduation I stayed at Cambridge for a couple of - years doing graduate work in History with Professors Gross and MacVane. The next two years I spent with a bicycle in Europe seeing the things most worth while in France and Germany, and incidentally studying two semesters at the University of Paris and two at the University of Berlin. I spent a summer in the archives at Hanover collecting material for my Ph.D. thesis on Frederick the Great's Fürstenbund. In 1910 I returned again to Berlin to gather material for a biography of Frederick's great-grandfather, the "Great Elector" of Prussia, at which I am now at work. From 1900 to 1902 I was again in Cambridge teaching History at Harvard and Radcliffe. In 1902 I was called to Dartmouth College as Assistant Professor (later Professor) of History and taught there a dozen years. There also I married, built me a home, served as Clerk of the Congregational Church 1904-14, and as member of the School Board 1908-14. In 1914 I was drawn to Smith College as Professor of European History by the prospect of more advanced work in teaching, better library facilities, and other considerations.

Aside from the books indicated below my writing has consisted chiefly in numerous articles and reviews in the American Historical Review, the American Economic Review, and the New York Nation. At present also I am editor of a new quarterly published by the Department of History here — Smith College Studies in History. I hope classmates who may send their daughters to Smith will look me up in Northampton.

Occupation: Attorney and Real Estate.

Address: (business) 25 West 45th St., New York, N.Y.; (home) 4 West

77th St., New York, N.Y.

In pursuing the practise of law I became interested in New York City real estate, and have devoted practically all of my time since my graduation from Law School to the purchase and sale of desirable parcels of real estate in this city. For this purpose I formed a company with my law partner, James T. Lee, and incorporating it under the name of Century Holding Company, have improved some of its holdings with buildings which we believe are a credit economically and architecturally to our company and to the city. Owing to the fact of my having been in mourning for a good many years, I have not had much inclination to do very much except to attend to my business affairs, with the exception of following my one hobby, that of thoroughbred racing. In this line I have been singularly successful, for in spite of owning only a modest string of racers, I have scored some important victories, notably at the amateur meetings, particularly when I won the Harbor Hill Cup at Piping Rock with "George Eno" in 1912.

FOR three years after graduation I worked for the Pennsylvania Railroad in Philadelphia, Pittsburgh and New York, after which I came back to Boston to take a position in the transportation end of the Planters Compress Company, a concern which had a brilliant but brief existence. After this I got into the real estate business and am still in it today with two Cabots and Paul Hamlen of our class. I live in the country all the year round on my own place, commute every day with occasional breaks, have a wife and four children and have nothing to complain of.

MY life since the last report has had little to register. I am engaged in mill design and construction. Data concerning my wife and family I have already reported. During my western residence since leaving college I have renewed acquaintance with very few Harvard men. Last summer I had the enjoyment (to me) of a great event in meeting at the San Francisco fair, A. S. Hyde, '96, whom I had not seen since college days.

THE summer of 1896 I spent in a trip on foot — barefoot at that — with A. H. Howland, '96, through Cape Breton Island, and in feeding fish on the Atlantic Seaboard with Howland and Hamilton Welch. I put my weight against a job with R. H. Russell in the publishing business in the fall of that year; was in turn a printer's devil, a devil of a printer, traveling salesman, and finally rested quietly next the boss. All this excitement filled about six years.

At this time I was married and since you ask for a list of honors or trusts, I refer you to the above card index of the family. You have them all there, honors, trusts, and, I may add, *some* responsibilities.

In 1903 Pitts Duffield, '92, and I formed a publishing company of our own. After two years I left the company to Duffield's tender mercies and I spent the winter in Asheville, N.C., preparatory to the only real work I ever did. This was

FOUR YEARS ON THE FARM

(Here Fox gives an account of fighting nature and a rough farm in the hills of Westchester Co., N.Y. It is sad reading, mates, and we take the liberty of cutting it out. — Ed.)

In 1909 I handed the farm to a man who wanted it more than I did and bought a seat on the New York Stock Exchange. Here was the other side of the shield with a vengeance! For six years all the members had to do was to go down at ten o'clock and sit until three and then go home. Nothing whatever disturbed our serenity until the great war broke, the Exchange closed, and we had no place to go.

Since last December, when the Exchange reopened, the war brides, war babies, and even the staid old investments began to give us a run for our money and I have taken a new lease on life. All troubles for the time are forgotten, and I am looking forward to wearing a smile when I see you in June.

A PURELY humdrum story of having gone through the College of Physicians and Surgeons, Mt. Sinai Hospital, Sloane Hospital, and a Wanderjahr abroad, then settling down in New York and plugging away.

Since 1906 I have been connected with the Attending Staff of Mt. Sinai Hospital in the gynecological department. I have been guilty of writing the usual number of technical articles expected of a medical man, and have in consequence become a member of a goodly number of medical societies.

I SPENT 1896-1902 studying philosophy in Germany; 1902-1903, psychology and kindred subjects at Harvard; then abandoned this career. A few months in charity work, a few years in the insurance business, six years in a stockbroker's office, and since 1912 exporter and importer, — this summarizes my achievements to date. I am not a club member, have not written any books, do not hold any offices of honor; am not living with a

view to furnishing subject matter for a biographer present or to come. Daily preoccupations of immediate personal interest consume all my time. I am trying to lead a reasonably decent life, and believe I am fairly successful.

Born at Jamaica Plain, Mass., Nov. 23, 1873.

Parents: William A., Olivia (Chapman) French.
School: Hopkinson's School, Boston, Mass.

Years in College: 1892-94.

Married: Ethel Clifford Dorr, June 2, 1902. Cambridge, Mass. Children: Olivia, July 20, 1903; Ruth, March 20, 1906.

Died at Belmont, Mass., Feb. 5, 1916.

HE had been associated for several years with J. M. Huber of New York, dealers in printing inks, etc., and was in charge of the Boston office of this concern at 133 Pearl Street, up to the time of his death. He died after a very short illness.

for the care of delinquent and dependent children. During this service of two years, I became interested in social service and have given much time to it ever since. Such statutes as our Child Labor Law of 1911, the 1911 law limiting the hours of employment of women, and a number of other statutes relating to social and industrial conditions, were drawn by me. By appointment of the Governor, I served on a commission to consider legislation on the subjects of workmen's compensation and employers' liability, and have taken an active part in advocating such legislation.

In 1907 my name was placed on the tickets of both political parties to fill an unexpired term of two years on our School Board. at that time a bi-partisan board. At the expiration of my term, in 1909, the Board of Education made me its attorney and it continued to be one of my clients until the summer of 1915. In the course of employment by the Public Service Commission of St. Louis, I compiled and annotated all franchise statutes and ordinances affecting public service corporations doing business in St. Louis. Upon invitation from the Missouri State Bar Association, I delivered an address at its annual meeting in July, 1910, on "Some Reasons for the Growing Disrespect of the Law." My address was published in the January-February, 1911, number of the American Law Review. Agitation for reform in our judicial system and judicial procedure has had much of my attention. I drew up for the St. Louis Bar Association a bill for a municipal court system similar to that of Chicago, but our Legislature has failed to enact it into law. During the national campaign of 1912. I was invited to serve the Democratic National Committee as its assistant treasurer, and, in such capacity, had charge of the finances of the western headquarters at Chicago. I have served two terms as treasurer of the Missouri State Bar Association and have been actively engaged in various capacities in civic organizations. All these years I have enjoyed a constantly growing general practise.

SHORTLY after leaving college I started in business under the name of "The New York Co-operative Society" which was originally intended to be patterned after The Harvard Cooperative Society in Cambridge, members paying a nominal fee for the privilege of buying merchandise, more particularly books, at discount prices. The business prospered from the outset and gradually grew into a retail business, when not only books but a general line of pictures and autograph manuscripts were carried in stock. I continued in this line until 1909 when at the request of my father-in-law, Mr. Isaac Stern, I gave it up to go into the department store of Stern Brothers, of which he was the senior member. After about a year my father-in-law died, and our interest in the business having been sold to other interests, I retired to look after his estate. The following year, 1911, I started a new firm — Arthur H. Hahlo & Co., to deal in etchings, engravings, and paintings, in which business I am still engaged — with satisfactory success, I am glad to say.

Address: (business) 112 Water St., Boston, Mass.; (home) Brush Hill Road, Readville, Mass.

ON July 1, 1896, I began working for the Lord Electrical Co., electrical contractors, with offices at present in New York and Boston. About five years later I was made a partner in the concern and have been with it ever since. A description of the work which we do would not make very interesting reading. The electrification of the New York State Barge Canal, completed a few months ago, is the largest contract we have ever undertaken.

My philanthropic activities have been confined to the Boston Children's Aid Society, and the Perkins Institution and Massachusetts School for the Blind, of which I was made a trustee in 1914.

Address: 3 Bath St., Brunswick, Me.

THE uneventful life of a pedagog usually offers little material for a chronicle that could interest anybody. But to meet the imperious demands of our energetic secretary, who is determined to make his historical roll complete, I will record that since 1901 I have been teaching at Bowdoin College with the exception of two years (1907–1909), which I spent at Trinity College, Hartford. Since 1909 I have been professor of German here. From '96 to '99 I studied at Harvard and at Berlin. From '99 to '01 I taught French and German in a preparatory school at Ithaca, N.Y. This year I expected to take a sabbatical year (with some emphasis on the "bat"); but my good friends the Germans with their characteristic efficiency have made this impracticable, and so I am looking forward to the reunion in June.

A FTER graduation, I entered my father's office, that of a trustee, and remained with him until his death in 1904. I was principally occupied in the care and management of real estate. I succeeded my father in his trusteeships and some

little time later became a partner in the firm of Cabot, Cabot & Forbes, where I now am, joining with them in a general real estate business. Management, etc., of properties in a city necessarily keeps one very much at home and as I have not filled any public position, I have nothing of interest to relate. I spend my winters in Boston, and usually pass the summer in Wayland, Mass., a town about sixteen miles west of here where members of my family and I have a large and very pleasantly situated farm.

P to the outbreak of the war I was associated with S. H. P. Pell & Co. as a cotton expert. This firm failed at the outbreak of the war and carried me down with the crash. Since then I have had no permanent business connection. The midday of life finds me not much of a success in a financial way, but as a family man, as a husband and father (though I have but one child) I am way up in the Phi Beta Kappa class. These are the offices of honor and trust which I have held and hold now.

HEMAN ANDREW HARDING

Born at Chatham, Mass., Feb. 6, 1871.

PON leaving the Law School, I returned to my home in Chatham, where I have since resided. Then a member of the School Committee of that town I so continued during the years 1898–99; I served as selectman, assessor, and overseer of the poor in that town during the years 1898–99, being chairman in 1899. In 1903 and 1904 I was a Representative to the General Court of Massachusetts, serving on the Ways and Means Committee. In 1905 and 1906 I was Senator from the Cape District, serving on Ways and Means, Harbors and Public Lands, Constitutional Amendments (chairman), and Fisheries and Game (chairman) Committees. In 1908 I was appointed to the Board of Harbor and Land Commissioners of this Commonwealth and served until 1911, sitting also on several joint commissions, including the Four Joint Board consisting of Harbor

and Land Commission, Railroad Commission, Metropolitan Park Commission, and Rapid Transit Commission, which during 1909 and 1910 considered the necessities of Boston particularly in the matter of harbor and railroad facilities. I practised law but little until 1906 when I opened an office in Barnstable, where I have continued ever since, except as the holding of the above offices interfered. I am getting gray and stout, but am still active, and have received a fair measure of success at the bar. While it is good for the soul to serve community and commonwealth, I have found it far better for my pocket-book and my family to work at the law.

A FTER leaving college, I entered the office of Frank Miles A Day & Bro., architects, in Philadelphia. In 1898 I went abroad and spent a year in Italy and Greece, studying in the American School at Athens for a short time. In 1899 I formed a partnership for the practise of architecture with F. E. Newman and H. G. Woodman under the firm name of Newman, Woodman & Harris. On the death of Woodman the firm was continued, as it is to-day, as Newman & Harris. Our main office we moved to New York in 1906. We have placed a number of interesting buildings "on the map" during our career; and we have a goodly number of both "public and domestic" memorials to our account.

In 1908 I married Miss Elizabeth Stevenson of New York. and both being wanderers, we have spent a great deal of our married life in Europe, Africa, and traveling over our own country. We have two children: our oldest, a little girl, starting on her foreign travel at the age of two and a half: James, Jr., our son, has done little, being ten days old to date. I defy any man of '96 (or Harvard University either) to show a happier family than that of Harris, '96.

IN December, 1896, I entered the employ of the Boston and Maine Railroad with the idea of learning the railroad business. I started work in the engineering department and during the period of seven years was transferred to the various other departments and thus acquired a knowledge of the inside of railroading. By this time the novelty had worn off, and as the future did not appear bright I gave up the railroad and in January, 1904, formed the firm of Hayes & Welch for the transaction of a real estate and insurance business, handling city and country properties. I have lived in Dedham for the last fifteen years and find the position of Class Secretary interesting.

Member Charities Endorsement Committee (eight years); director Charity Organization Society (seven years); president Social Service Conference of Pacific Northwest; director Washington State Conference of Charities and Correction (two years); executive committee National Conference of Charities and Correction (two years) and of American Society for Organizing Charities (three years).

The only breaks into the monotony of the past five years were a trip to Cleveland in 1912 to get for Seattle the next meeting of the National Conference of Charities and Correction — incidentally I saw for the first time since graduation several classmates who were in Chicago for the Republican National Convention and an enjoyable visit in 1913 to Tahiti, one of the Society Islands, teeming with the romance of the South Seas. That long vacation, part of which was spent in California, while pleasant in itself was enforced by a serious illness from which I have not entirely recovered. Prior to August, 1914, we on this coast had for years been making extensive plans for the shake-up in the world's commerce to be caused by the opening of the Panama Canal; and I had been giving special attention to the social problems incident to the expected arrival of a large number of European immigrants on direct steamers. Now those steamers are government transports, or are interned, and the immigrants who might have been opening up new lands for their own and our economic betterment are dead by the hundreds of thousands. We have the docks and warehouses, and later we shall get the steamers and the commerce; but I doubt if in our generation we shall see many Europeans tilling the fertile soil of the Pacific Coast.

Your hurry up call has spurred me to a superhuman effort. Partly through bashfulness I have delayed writing the story of my life so full is it of achievement (?) and successes(?). Seriously, there is nothing much to add to my last report of myself so I will not inflict further details of an uneventful life on those conscientious fellow graduates who may feel called upon to read all of the four hundred autobiographies more or less that the report will contain.

In his last report he said: "Since leaving Harvard in 1899 I have passed more or less time in travel beside winters in Philadelphia, Passaic, N.J., and Newport. My occupations have

been of a desultory nature and I have never married."

Occupation: Lawyer.

Address: (business) 1617 Land Title Bldg., Philadelphia, Pa.; (home) Strafford, Chester Co., Pa.

T TPON obtaining degrees from the Harvard and University of Pennsylvania law schools in 1899, I started in the general practise of law in Philadelphia, and have been faithfully courting that jealous mistress ever since. For more than the last ten vears I have been a member of the firm of Duane. Morris & Heckscher. The variety of problems of great human interest encountered in legal practise have been as engrossing to me as those of a more strictly legal or economic nature. I have taken considerable interest in the problems of constructive charity in large cities, and for the last two years have been president of the Philadelphia Society for Organizing Charity (Associated Charities). I am also serving on the committee of the reorganized Chapter of the Red Cross for Eastern Pennsylvania, and am chairman of the committee on the Memorial Buildings at Valley Forge. The National Security League have impressed me into service in making addresses on "Preparedness." I have found that Fate can deal some heavy blows, but I have also found those rare souls whose example and inspiration make life worth living.

WINSLOW HOBART HERSCHEL

Born at Boston, Mass., Aug. 28, 1873.

Parents: Clemens, Grace Darling (Hobart) Herschel.

School: Roxbury Latin School, Boston, Mass.

Years in College: 1892-96.

Degree: A.B.

Married: Cornelia Augustus Feuerlein, April 17, 1906, New York, N.Y. Children: Grace Dorothy, July 22, 1907, died Dec. 1, 1907; Kenelm Winslow, Dec. 14, 1915.

Occupation: Oil Engineer.

Address: (business) U. S. Bureau of Standards, Washington, D. C.; (home) 6305 Florida St., Chevy Chase, Md.

FROM 1896 to 1904 I was engaged in surveying and hydraulic work in the vicinity of New York City. In the latter year I went to Zürich, Switzerland, as technical correspondent for the Allis-Chalmers Co., to study the design of hydraulic turbines and centrifugal pumps both at the Zürich Polytechnikum and at the shops of Escher Wyss & Co. In May, 1905, I entered the

for the care of delinquent and dependent children. During this service of two years, I became interested in social service and have given much time to it ever since. Such statutes as our Child Labor Law of 1911, the 1911 law limiting the hours of employment of women, and a number of other statutes relating to social and industrial conditions, were drawn by me. By appointment of the Governor, I served on a commission to consider legislation on the subjects of workmen's compensation and employers' liability, and have taken an active part in advocating such legislation.

In 1907 my name was placed on the tickets of both political parties to fill an unexpired term of two years on our School Board, at that time a bi-partisan board. At the expiration of my term, in 1909, the Board of Education made me its attorney and it continued to be one of my clients until the summer of 1915. In the course of employment by the Public Service Commission of St. Louis, I compiled and annotated all franchise statutes and ordinances affecting public service corporations doing business in St. Louis. Upon invitation from the Missouri State Bar Association. I delivered an address at its annual meeting in July, 1910. on "Some Reasons for the Growing Disrespect of the Law." My address was published in the January-February, 1911, number of the American Law Review. Agitation for reform in our judicial system and judicial procedure has had much of my attention. I drew up for the St. Louis Bar Association a bill for a municipal court system similar to that of Chicago, but our Legislature has failed to enact it into law. During the national campaign of 1912. I was invited to serve the Democratic National Committee as its assistant treasurer, and, in such capacity, had charge of the finances of the western headquarters at Chicago. I have served two terms as treasurer of the Missouri State Bar Association and have been actively engaged in various capacities in civic organizations. All these years I have enjoyed a constantly growing general practise.

AM in the active practise of the law, and, since the publication of the last class report, my personal life has been and is so involved and absorbed in my professional activities that the story would be too technical to be interesting.

SHORTLY after leaving college I started in business under the name of "The New York Co-operative Society" which was originally intended to be patterned after The Harvard Cooperative Society in Cambridge, members paying a nominal fee for the privilege of buying merchandise, more particularly books, at discount prices. The business prospered from the outset and gradually grew into a retail business, when not only books but a general line of pictures and autograph manuscripts were carried in stock. I continued in this line until 1909 when at the request of my father-in-law, Mr. Isaac Stern, I gave it up to go into the department store of Stern Brothers, of which he was the senior member. After about a year my father-in-law died, and our interest in the business having been sold to other interests, I retired to look after his estate. The following year, 1911, I started a new firm — Arthur H. Hahlo & Co., to deal in etchings, engravings, and paintings, in which business I am still engaged — with satisfactory success, I am glad to say.

Address: (business) 112 Water St., Boston, Mass.; (home) Brush Hill Road, Readville, Mass.

ON July 1, 1896, I began working for the Lord Electrical Co., electrical contractors, with offices at present in New York and Boston. About five years later I was made a partner in the concern and have been with it ever since. A description of the work which we do would not make very interesting reading. The electrification of the New York State Barge Canal, completed a few months ago, is the largest contract we have ever undertaken.

My philanthropic activities have been confined to the Boston Children's Aid Society, and the Perkins Institution and Massachusetts School for the Blind, of which I was made a trustee in 1914.

THE uneventful life of a pedagog usually offers little material for a chronicle that could interest anybody. But to meet the imperious demands of our energetic secretary, who is determined to make his historical roll complete, I will record that since 1901 I have been teaching at Bowdoin College with the exception of two years (1907–1909), which I spent at Trinity College, Hartford. Since 1909 I have been professor of German here. From '96 to '99 I studied at Harvard and at Berlin. From '99 to '01 I taught French and German in a preparatory school at Ithaca, N.Y. This year I expected to take a sabbatical year (with some emphasis on the "bat"); but my good friends the Germans with their characteristic efficiency have made this impracticable, and so I am looking forward to the reunion in June.

March 15, 1909.

Occupation: Real Estate.

Address: (business) 60 State St., Boston, Mass.; (home) 32 Gloucester St., Boston, Mass.

A FTER graduation, I entered my father's office, that of a trustee, and remained with him until his death in 1904. I was principally occupied in the care and management of real estate. I succeeded my father in his trusteeships and some

little time later became a partner in the firm of Cabot, Cabot & Forbes, where I now am, joining with them in a general real estate business. Management, etc., of properties in a city necessarily keeps one very much at home and as I have not filled any public position, I have nothing of interest to relate. I spend my winters in Boston, and usually pass the summer in Wayland, Mass., a town about sixteen miles west of here where members of my family and I have a large and very pleasantly situated farm.

P to the outbreak of the war I was associated with S. H. P. Pell & Co. as a cotton expert. This firm failed at the outbreak of the war and carried me down with the crash. Since then I have had no permanent business connection. The midday of life finds me not much of a success in a financial way, but as a family man, as a husband and father (though I have but one child) I am way up in the Phi Beta Kappa class. These are the offices of honor and trust which I have held and hold now.

Chatham, where I have since resided. Then a member of the School Committee of that town I so continued during the years 1898–99; I served as selectman, assessor, and overseer of the poor in that town during the years 1898–99, being chairman in 1899. In 1903 and 1904 I was a Representative to the General Court of Massachusetts, serving on the Ways and Means Committee. In 1905 and 1906 I was Senator from the Cape District, serving on Ways and Means, Harbors and Public Lands, Constitutional Amendments (chairman), and Fisheries and Game (chairman) Committees. In 1908 I was appointed to the Board of Harbor and Land Commissioners of this Commonwealth and served until 1911, sitting also on several joint commissions, including the Four Joint Board consisting of Harbor

and Land Commission, Railroad Commission, Metropolitan Park Commission, and Rapid Transit Commission, which during 1909 and 1910 considered the necessities of Boston particularly in the matter of harbor and railroad facilities. I practised law but little until 1906 when I opened an office in Barnstable, where I have continued ever since, except as the holding of the above offices interfered. I am getting gray and stout, but am still active, and have received a fair measure of success at the bar. While it is good for the soul to serve community and commonwealth, I have found it far better for my pocket-book and my family to work at the law.

AFTER leaving college, I entered the office of Frank Miles Day & Bro., architects, in Philadelphia. In 1898 I went abroad and spent a year in Italy and Greece, studying in the American School at Athens for a short time. In 1899 I formed a partnership for the practise of architecture with F. E. Newman and H. G. Woodman under the firm name of Newman, Woodman & Harris. On the death of Woodman the firm was continued, as it is to-day, as Newman & Harris. Our main office we moved to New York in 1906. We have placed a number of interesting buildings "on the map" during our career; and we have a goodly number of both "public and domestic" memorials to our account.

In 1908 I married Miss Elizabeth Stevenson of New York, and both being wanderers, we have spent a great deal of our married life in Europe, Africa, and traveling over our own country. We have two children: our oldest, a little girl, starting on her foreign travel at the age of two and a half; James, Jr., our son, has done little, being ten days old to date. I defy any man of '96 (or Harvard University either) to show a happier

family than that of Harris, '96.

IN December, 1896, I entered the employ of the Boston and Maine Railroad with the idea of learning the railroad business. I started work in the engineering department and during the period of seven years was transferred to the various other departments and thus acquired a knowledge of the inside of railroading. By this time the novelty had worn off, and as the future did not appear bright I gave up the railroad and in January, 1904, formed the firm of Hayes & Welch for the transaction of a real estate and insurance business, handling city and country properties. I have lived in Dedham for the last fifteen years and find the position of Class Secretary interesting.

Member Charities Endorsement Committee (eight years); director Charity Organization Society (seven years); president Social Service Conference of Pacific Northwest; director Washington State Conference of Charities and Correction (two years); executive committee National Conference of Charities and Correction (two years) and of American Society for Organizing Charities (three years).

The only breaks into the monotony of the past five years were a trip to Cleveland in 1912 to get for Seattle the next meeting of the National Conference of Charities and Correction — incidentally I saw for the first time since graduation several classmates who were in Chicago for the Republican National Convention and an enjoyable visit in 1913 to Tahiti, one of the Society Islands. teeming with the romance of the South Seas. That long vacation, part of which was spent in California, while pleasant in itself was enforced by a serious illness from which I have not entirely recovered. Prior to August, 1914, we on this coast had for years been making extensive plans for the shake-up in the world's commerce to be caused by the opening of the Panama Canal: and I had been giving special attention to the social problems incident to the expected arrival of a large number of European immigrants on direct steamers. Now those steamers are government transports, or are interned, and the immigrants who might have been opening up new lands for their own and our economic betterment are dead by the hundreds of thousands. We have the docks and warehouses, and later we shall get the steamers and the commerce; but I doubt if in our generation we shall see many Europeans tilling the fertile soil of the Pacific Coast.

Address: (business) 321 Chestnut St., Philadelphia, Pa.; (home) Jamestown, R.I.

YOUR hurry up call has spurred me to a superhuman effort. Partly through bashfulness I have delayed writing the story of my life so full is it of achievement (?) and successes(?). Seriously, there is nothing much to add to my last report of myself so I will not inflict further details of an uneventful life on those conscientious fellow graduates who may feel called upon to read all of the four hundred autobiographies more or less that the report will contain.

In his last report he said: "Since leaving Harvard in 1899 I have passed more or less time in travel beside winters in Philadelphia, Passaic, N.J., and Newport. My occupations have been of a desultory nature and I have never married."

BENJAMIN HUNTRESS HEALD

Occupation: Lawyer.

Address: (business) 1617 Land Title Bldg., Philadelphia, Pa.; (home) Strafford, Chester Co., Pa.

PON obtaining degrees from the Harvard and University of Pennsylvania law schools in 1899, I started in the general practise of law in Philadelphia, and have been faithfully courting that jealous mistress ever since. For more than the last ten years I have been a member of the firm of Duane, Morris & Heckscher. The variety of problems of great human interest encountered in legal practise have been as engrossing to me as those of a more strictly legal or economic nature. I have taken considerable interest in the problems of constructive charity in large cities, and for the last two years have been president of the Philadelphia Society for Organizing Charity (Associated Charities). I am also serving on the committee of the reorganized Chapter of the Red Cross for Eastern Pennsylvania, and am chairman of the committee on the Memorial Buildings at Valley Forge. The National Security League have impressed me into service in making addresses on "Preparedness." I have found that Fate can deal some heavy blows, but I have also found those rare souls whose example and inspiration make life worth living.

WINSLOW HOBART HERSCHEL

Born at Boston, Mass., Aug. 28, 1873.

Parents: Clemens, Grace Darling (Hobart) Herschel.

School: Roxbury Latin School, Boston, Mass.

Years in College: 1892-96.

Degree: A.B.

Married: Cornelia Augustus Feuerlein, April 17, 1906, New York, N.Y. Children: Grace Dorothy, July 22, 1907, died Dec. 1, 1907; Kenelm Winslow, Dec. 14, 1915.

Occupation: Oil Engineer.

Address: (business) U. S. Bureau of Standards, Washington, D. C.; (home) 6305 Florida St., Chevy Chase, Md.

FROM 1896 to 1904 I was engaged in surveying and hydraulic work in the vicinity of New York City. In the latter year I went to Zürich, Switzerland, as technical correspondent for the Allis-Chalmers Co., to study the design of hydraulic turbines and centrifugal pumps both at the Zürich Polytechnikum and at the shops of Escher Wyss & Co. In May, 1905, I entered the

employ of the Providence Engineering Works, of Providence, R.I. in a similar capacity, remaining in Zürich, but devoting my attention to steam turbines. After my return to the United States in November, 1905, I was for five years in charge of the steam turbine work of the Providence Engineering Works until they sold out to the United States Motors Co. and discontinued the building of steam turbines. The next three summers, 1911-13, I spent in Pittsburgh, as inspector on the lock gates and chain fenders for the Isthmian Canal Commission. I went to the University of Maine in the fall of 1911, and in 1912 was promoted from Assistant to Associate Professor of Mechanical Engineering. The nine courses which I gave included machine design and related subjects. In December, 1913, I came to Washington as Assistant Physicist at the U.S. Bureau of Standards. As "oil engineer" I act as adviser, in lubricating matters, to the General Supply Committee, who make contracts for supplies used by the government departments in Washington. I am also engaged in investigating the physical properties of lubricating oils, in order to obtain the information necessary to write specifications for the purchase of these oils. Government hours are from 9.00 to 4.30, and this leaves time available to cultivate a back-vard vegetable garden as an aid to health, and to a lesser extent, wealth.

I am a member of the Society for the Promotion of Engineering Education, and American Society for Testing Materials. I have written the following articles which have been published: "Tapered connecting rods for high speeds"; "A slide rule for calculating helical springs"; "Offsetting cylinders in single acting engines"; "Testing turbines with a water brake"; "The relation of the steam turbine to modern central station practise"; "A graphical method for calculating stresses in a connecting rod"; "Size of engine for a given power"; "Slide rule for calculating helical springs"; "The technical director"; "Shopwork for engineering students": "Table for estimating weight to be deducted for open rivet holes"; Discussion of "Energy and pressure drop in compound steam turbines"; "The study of modern languages in technical schools"; "Scientific ranking systems"; "Scientific grading and the Reed College system"; "Most economical vacuum for steam turbines"; "Determining the equation of a curve"; "Correlation between tensile and bending tests of cast iron."

In the year 1904, or possibly 1905, I do not now recall which, my brother went abroad, and after traveling about for several months, settled down in Switzerland, where he made his head-quarters at either Geneva or Berne most of the time for ten years, during which time he was engaged in research work along different lines. He has been in this country on four or five different occasions — the last time was in 1914–15. In February, 1915, he and his wife sailed for France, for work with the Whitney Hospital at Juilly, France, where he remained for about eight months, returning to Switzerland late last autumn."

JOHN SWIFT HOLBROOK

Born at Boston, Mass., March 4, 1875. Parents: Edward, Frances (Swift) Holbrook.

School: Callisen's School, New York, N.Y.

Years in College: 1892-96. Degree: A.B.

Married: Grace Morgan Sinclair, April 11, 1908, New York, N.Y.

Occupation: Manufacturer.

Address: (business) Gorham Mfg. Co., Providence, R.I.; (home) 25 Cushing

St., Providence, R.I.

AFTER graduation in June, 1896, I entered Columbia in September of that year as a regular in the Freshman Class of 1900, School of Architecture, studying particularly for Landscape Gardening. In my second year I went into special standing, taking 2d, 3d, and 4th year courses, and left at the end of

second year. In October, 1898, I went abroad and settled in Paris, being attached to the French service of Parks and Gardens of the Paris Exposition in 1900. Through application of the U. S. Commissioner's Office I served as U. S. Government attaché in this service until the close of the exposition, having in the spring of 1900 charge of my own gang of men and a superintendent's position. In November, 1900, I left Paris, going to Italy, Sicily, Egypt, and Germany, and returning to Paris the latter part of June, 1901. In July, 1901, I went to England for the purpose of studying the principal gardens and places, spending considerable time at Kew Gardens, outside of London. I returned to the United States in October, 1901, and formed the partnership of Brinley & Holbrook with John R. Brinley, a graduate of Columbia University, Nov. 1, 1901, for the practise of landscape architecture and engineering. I practised until May, 1906, when the firm

was dissolved by mutual consent.

My father, president of the Gorham Mfg. Co., had difficulties with his vice-president. I was invited by the stockholders of the company to enter this business as vice-president, and took office in March, 1906. I have been connected with this business continuously ever since, first at the New York office, then transferred to the Providence factory in October, 1908. Since 1908 my headquarters have been at the Providence factory and I have resided here continuously. I was abroad for a brief trip in 1908 and again in 1911, each time about eight or ten weeks. I am still vice-president of the Gorham Mfg. Co. and of The Silversmiths Co., and director in several of the affiliated concerns; treasurer of the National Protection Co. and of the Venturi Alarm Co., and director in several of the affiliated concerns: treasurer of the Maiden Lane Realty Co. and in charge of the construction of the Silversmiths Building belonging to them, in New York City: director of the Bigelow Kennard Co., Boston. In February, 1913, I was appointed by the Governor of this State a member of the Rhode Island State House Commission. which has entire charge of the Rhode Island State House and grounds, and am still a member of that Commission. In December, 1914, I was elected president of the Providence Chamber of Commerce, an organization having about two thousand members. and was unanimously re-elected in December, 1915, for a second term. We held our annual meeting in January, 1916, at which I presided, and turned out about four hundred members.

At present I am ranking officer in charge of Gorham Mfg. Co. Eventually I shall probably be transferred to the New York end, but there is no immediate prospect of this. My particular duties

consist of factory administration, having general charge and supervision over the factory and the New York office. I am obliged to make frequent trips to New York and occasionally see some of my classmates. This company made an important exhibit at the Panama-Pacific Exposition, so I was in San Francisco during most of May and part of June, 1915. In consideration of the fact that the design of the pavilion was suggested by me, the Exposition awarded me personally a gold medal as collaborator.

Publications: Article on "Lych-Gates," published in American Architect, 1898; "Silverware for the Dining Room — Selected Periods." Have given several lectures, one on the "History of Landscape Architecture," Feb. 29, 1904, before the Brooklyn Chapter, American Institute of Architects; lecture on "History of Silverware," given before the New York School of Applied Design for Women, 1913; and also before the Handicraft Club of Providence, same year.

MY history has just begun now that I am back in good old Boston. For the past few years I have been on the Pacific Coast and as soon as it was possible to get the long green in a large enough bunch I cut my halter and made for home and Mother. It is a wonderful country out there, BUT—

Now I am up on Boylston Street helping to make the wheels go round by dispensing tires that will go farther than any other kind if you are kind to them. Now for the sake of the old days I want to help all the boys run around and joy ride and I won't tell. Otherwise there is nothing of moment to relate.

I was then transferred to the Division of Forestry, now the Forest Service, where I served till December, 1903. My more important pieces of field work were in New York, Maine, and California. From December, 1903, to August, 1914. I was Territorial Forester of Hawaii, my principal work being the organization of a forestry service in that Territory, the creation of a forest reserve system, now aggregating 798,000 acres, and the carrying on of a general campaign of education in forestry and conservation. In September, 1914, I was appointed Professor of Forestry and head of the Department of Forestry of the New York State College of Agriculture at Cornell University. From 1908 to 1914 I was chairman of the Territorial Conservation Committee of Hawaii, and from 1907 to 1914, vice-president of the Board of Regents of the College of Hawaii. My chief avocation during my residence in Honolulu consisted in acting as secretary of the Harvard Club of Hawaii, organized in 1907, and in doing what I could to promote the interests of Harvard University. FILLING out this form is almost as bad as making an income tax return. Since about 1897 I have been located here in central Iowa. I was in the stone quarry business, but the Chicago & Northwestern R.R. Co. was finally induced to take over most of that. I am now interested in raising a family of mostly boys, and if you think it's a snap you ought to know them. They will be ready for army service in about fifteen years when the United States will say to all the other nations on earth, "YE SHALL KEEP THE PEACE." Incidentally I have a very good garden that keeps me out of mischief and helps to keep down the high cost of living.

AS I have already written for previous reports, my life from graduation, I shall recite only my misdemeanors since the last report. About four years ago I gave up my general medical practise and went abroad to study the diseases of children. On my return I was appointed to the staff of the Infants' Hospital, Boston. On the opening of the new hospital I was made assistant visiting physician, serving in that capacity for two years. I

am now associate physician of the Infants' Hospital and assistant in pediatrics in the Harvard Medical School. My time is occupied with hospital work, teaching, and practise in and about Boston. My four months' old daughter cheers for '96 every three hours when her bottle arrives. At present writing I am renewing my youth by having an attack of scarlet fever and am now "peeling" furiously.

Several short papers on various medical subjects have been published in medical journals.

AFTER leaving college I took charge of my father's horse and cattle ranch in Billings County, western North Dakota, and managed it for twenty years. When the farmers came in to settle the country we sold our horses, cattle, and all our land holdings in the West. I then came East to manage a farm which we now have in Crawford County, Pennsylvania. This farm extends for three miles on the west side of Conneaut Lake. We have it stocked with Percheron horses and short-horned

cattle. My farm did not occupy all of my time during the winter months, so a few years ago I bought an Oil and Gas Production, in Lawrenceville, Illinois, and last winter I spent most of my time near Tulsa, Oklahoma, leasing and drilling for oil and gas.

Address: (business) St. Clair and West Third Sts., Cleveland, O.; (home)

11808 Lake Shore Boulevard, Cleveland, O.

I HAVE led a desultory railroad life since leaving college. I left the Big Four Railroad, as superintendent, in 1907 to go to the Lake Shore and Michigan Southern as assistant general superintendent; being merged in the New York Central R.R., January 1, 1915, I am now general superintendent of that company. I have been very fortunate in keeping my residence in Cleveland.

The only office of honor or trust I have held was president of The Harvard Club of Cleveland when we entertained the Associated Harvard Clubs in 1910.

I expect to be on in June for the celebration. Unfortunately, my oldest son David got in with a bunch of hockey players at St. Paul's School who are going to Yale and he is going with them this fall. This makes me somewhat ashamed to show up in June. I suppose this is better than the Mexican trenches.

FTER graduation at Cambridge, the "call of the wild" A youth of the high schools brought me positions in Lebanon, Pa., Decatur, Ind., and Bushnell, Ill. Tiring of this valuable experience. I found my way into the University of Wisconsin as a graduate student, then to Cornell University as assistant in Botany, and finally I anchored in the faculty of the University of Michigan where I fill my little place as the gods permit. My special interests have led me into the field of Mycology and Plant Pathology in which I have endeavored to add a little to the world's knowledge and to help others to the same end. My latest perpetration has been an extensive manual of the mushrooms and toadstools of the State of Michigan, comprising descriptions and illustrations of some nine hundred species. If perchance this work should be read and used by my brethren of the class of '96, and should be the means of saving even one of them from an early death from "toadstool" poisoning, I should feel that my life had been well spent.

JOHN LEWIS KETCHAM, Jr.

Years in College: 1892-96.

Degree: A.B.

Address: (last known) 216 North Delaware St., Indianapolis, Ind.

THE following information about Ketcham was forwarded to the secretary by a member of the class:

"I notice in your list of lost people you include John L. Ketcham, Jr., of Indianapolis. I strongly believe that he is dead. He had a very dramatic history after he left college. He went to Cuba first and joined the Cuban Bushwhackers and subsequently joined the United States Army; finally he went to Manila and was discharged from the army with the rank of captain, incapacitated because of wounds. Subsequently he had a very wandering career. At one time he even stoked his way across the Atlantic a couple of times, but his main ability was acting as strike breaker wherever the fighting was fast and furious. I became acquainted with his history because several times he consulted me. The last I heard of him he was leaving to assist in breaking a railroad strike in Texas or New Mexico. His family state they have no knowledge as to his whereabouts and as he used to communicate with me pretty regularly and I have not heard from him for a number of years I imagine that he probably got into some fatal difficulty. The large amount of experience which he had in the army and in his favorite pastime of strike breaking, coupled with his somewhat oriental imagination and gifted flow of language, made him one of the most entertaining narrators of near facts that I ever listened to."

FREDERICK WILLIAM KIESEL

Born at Corinne, Utah, Feb. 11, 1874.

Parents: Frederick J., Julia (Schansenbach) Kiesel. School: Greylock Institute, South Williamston, Mass.

Occupation: Cashier California National Bank of Sacramento.

Address: (business) 331 J St., Sacramento, Cal.; (home) 1236 N St., Sacramento, Cal.

FTER leaving college I engaged in commercial lines of busi-A ness, coming to Sacramento, Cal., in 1894. My first venture here was in the planting of vineyards and the manufacture of wines. I sold out this business in January, 1905. Previously I had, however, interested myself in banking and entered the service of the California State Bank of Sacramento, on April 1, 1898. I have been in this bank continuously since the above date, climbing all the various rounds of the ladder from bookkeeper to cashier. This bank has since my entry become a national institution and is now known as the California National Bank with assets of nearly \$12,000,000. I have also engaged extensively in farming, reclamation work, and stock raising; am now farming 1150 acres of rich river bottom soil and breeding pure blood Holstein-Friesian cattle. In addition I am interested in the Sutter Basin Company which is reclaiming 60,000 acres of swamp land, and in the Natomas of California, a corporation which has finished the reclamation of 90,000 acres, is in addition planting 20,000 acres to orchards, and operating sixteen large gold dredgers. I am also interested in companies subdividing 25,000 acres south of Sacramento City. I am a director of the California State Life Insurance Company, vice-president of the West Sacramento Company, which has reclaimed 11,000 acres of land, and director of several smaller companies, most of them engaged in handling lands. I am kept busy every day in the year for about fourteen hours per day and consequently have no opportunity for anything else but business: but some day I hope to cut loose long enough to go back and visit the old stamping ground in Cambridge. My record at college was by no means a brilliant one. I never could get interested in Latin, Greek, and other dead things and only find live ones interesting now; but nevertheless I save a dear spot in my heart for old Harvard and hope to take part in the very next class reunion and to see a good game of football or baseball.

I have taken a whirl at various things — have written more or less on wild and domestic birds and animals, also on breeding the same, - have managed every thing in the amusement line except a circus, - have been interested in exploration especially of our own southern states, about which very little is known to ninety-nine per cent of our population. Spend four months out of every twelve in the South. My principal business has been and is the management of properties — real. Have participated in athletics and have won in running, wrestling, putting the shot, tennis, golf, trap shooting, etc. Have bred field dogs for years and have won consistently in the field trials and on the Take great interest in photography — nature photography. Have been more or less successful but have had experience and apparently my health is still good so omit "more or less."

Address: West Upton, Mass.

NOTHING especially different in my life has happened since the last report. As general manager of the factory of William Knowlton & Sons, manufacturers of straw goods, I find myself more closely confined each year, owing to added duties and responsibilities and increased competition. Outside of my business, I am interested in the social and, to some extent, in the political life of my town and county. At present I am much interested in the cause of "Preparedness" and have been able to enroll over one-half the voters in my town in the National Security League. I am also a member of the Worcester Business Men's Military Training School. I am a strong believer in some kind of compulsory military service. If something is not done at once, our twenty-fifth reunion may be in Heaven or Hell.

THERE is very little change in my general condition, occupation, and habits since my last report. I belong to social clubs, commercial clubs and business associations. I always draw an unsalaried directorship in all. I have gone a little more into the mining industry and agricultural land, but am not as yet a bloated capitalist. I have left that up to Percy Haughton, who has made Hell, Yale's destination — my hope in '96; my realization now. Let's watch Percy's "Braves" scalp the National League! Saw some of the leading Bar "lights" of our class this summer, at National Bar Association banquet held at Hotel Utah, Salt Lake City, in August, 1915. You see, Hayes, old top, we are a long way from the Campus out here, and our opportunities to see "the bunch" are rare and far between. I'd like to be present at our twentieth reunion. Perhaps I'll be there, unless we're forced to fight Mexicans. In the meantime — Peace to 1896.

SINCE leaving Cambridge at the end of my Sophomore year I have devoted my entire time in a vain endeavor to make a fortune. Net results show me a genteel competency, enough to live on and something to spare. I am at present endeavoring to raise one right end for the football team of 1932 and the baseball captain for 1934 and a high private for Vassar, 1931. The realization of this dream will complete the work of my life along these lines. Circumstances over which I have no control may, however, change all this (see next report).

CHARLES NEWTON LATHROP

Degree: A.B. Unmarried.

Occupation: Clergyman, Rector of the All Saints' Cathedral.

Address: 637 Marshall St., Milwaukee, Wis.

FOR three years after graduation I went to Western Theological Seminary, Chicago. I spent one year in Arizona, riding and camping. From January 1, 1901, to August, 1915, I was at the Church of the Advent, San Francisco. In April, 1906, the earthquake shook my church and parish well to pieces and the fire helped to make the demolition more complete. What was left, however, having been tried as by fire, made a solid foundation

to build on. Five years were spent in this building.

Continuing my history since the last volume, I remained as rector of the Church of the Advent, San Francisco, until August, 1915. At that time I offered my services to the Commission for Relief in Belgium to work in that unhappy country. My request was accepted and singularly enough I received the cablegram announcing appointment while I was on an excursion in Alaska. I journeyed from Seward, Alaska, to Liege, Belgium. I began my work in August, and remained there as delegate for the Commission for Relief in Belgium until the first of January, 1916. On my way I accepted the position as Dean of All Saints' Cathe-

dral here in Milwaukee, to begin work on the 15th of January, 1916, succeeding Dean Delany of my class in college. I reached here the first of February after an interesting experience, and I am now regularly installed as Dean of the Cathedral.

THIS latest appeal for a personal account of myself finds me. for the first time since graduation, where I was five years earlier. There is little to tell, beyond that fact, excepting steady work on and on; which for me is two-fold: on the one hand the commending of religion to university men, students and faculty both; and on the other hand, the gradual enlightening, by the injecting of university truths, of the unthinking current religion of townspeople. This has meant considerable general study. more reading, and much more pondering of underlying contemporary facts and forces, the results of which have appeared in a few articles as. "The Classification and Evolution of Miracle" (American Journal of Theology, Oct., 1911); "The Evil One: a Development" (Harvard Theological Review, July, 1912); "The Modern Man's Religion" (Harvard Theological Review, January, 1914); and "The Old and the New Denominationalism" (Biblical World, August, 1915). My indulgent congregation has had printed a book of sermons, thinly disguised as essays, under the title, "The War Within." As for "offices of honor or trust," I have been president of our City Library Board for the past two years, and am a member of the Board of Directors of the Colorado Conference of Congregational Churches. As for my history previous to 1911, that remains as it was in the Fourth Report of this class, published in 1911. Hearty regards to those few who remember me, and best wishes to all!

I N September, 1896, I started in my profession by entering a law office in Chicago. After three years I began the practise of law on my own account. The health of my wife made necessary a change of climate and in March, 1902, I moved to Muskogee, Indian Territory, not through choice but because Indian Territory did not seem so very far from Chicago, to which place I hoped soon to return. I was appointed United States Commissioner for the Western District of Indian Territory, a position much different from that of United States Commissioner in the "States." At that time there were only two classes of courts in the Indian Territory: the United States Commissioners' Courts and the United States District Courts, each with jurisdiction in civil causes and in criminal causes from gaming to murder. In February, 1906, I became Assistant United States Attorney and served until statehood in November, 1907. I was reappointed to serve after statehood but resigned in June. 1908, to become special assistant to the Attorney-General of the United States for the purpose of instituting some thirty thousand suits in equity in which the Government sought to set aside invalid conveyances of Indian lands. After the main questions in these suits were decided in favor of the Government by the Supreme Court of the United States I resigned my position, and since November, 1912, have devoted myself to the practise of the law and various business interests. At the San Francisco meeting of the Associated Harvard Clubs I was elected vice-president for the Southwestern section.

Address: New Ipswich, N.H.

I ENTERED upon my career by teaching one year, 1896–97, in the Brewster Free Academy, Wolfboro, N.H., as substitute assistant in the classics. The next two years I spent as assistant in the classics in the Highland Military Academy, Worcester Mass. From December 1899 to November 1902, I was principal of the high school, Essex, Mass. From November 1902 to January 1906 I was principal of the high school, Littleton, Mass. In January, 1906, I came to my present position, principal of New Ipswich Appleton Academy, New Ipswich, N.H. I have served here just a decade, and am beginning to feel that my wanderjahre are over.

I am at present chairman of the school board and president of the New Ipswich Historical Society, Inc. I am also engaged in various other civic and social duties. In fact, I have grown so thoroughly into the life of the community here that to me New Ipswich spells Home in the finer sense of the word. With the famous Marshal MacMahon I may say: "J'y suis, j'y reste." Whether or not I am a loval son of Harvard may be judged from the one emphatic criticism that the Superintendent of Public Instruction of the State of New Hampshire ever passed upon the institution of which I am the head. He once wrote me: "Your academy seems to be permeated with the spirit of cramming for Harvard." The said superintendent is a Dartmouth man. Of course my children are embryonic alumni of Harvard College. I have found my life work in the educational regeneration of a small community. That community is appreciative, generous, and loval, and the rewards for serving it are beyond material estimate.

WRITES nothing for this report, but for the fourth report he wrote:

"In filling out the circular for the fourth class report I left blank that part of it calling for a 'connected narrative covering the period since you left Harvard.' I have no doubt a number of others pursued the same course I did, but our secretary seems to think we all must say something about ourselves, and has returned the report to me for that purpose. If I knew him personally I would tell him what I think of him for putting some of us in such an embarrassing position.

"Soon after leaving Harvard I entered a bank, but after a few years had to give it up to look after my father's affairs. In 1904 he died and since then my principal business has been farming, cattle feeding, and breeding horses. For the latter I have the Kentuckian's weakness, but am glad to say I am almost

'out' without having been burnt very badly.

"Under 'offices of honor or trust,' all I have to mention is my connection with a number of small corporations in which I have served in the capacity of president, secretary, and director. Politics I have kept out of, never having held but one office, and I can't get rid of that. I live in a beautiful little city of six or eight thousand inhabitants, and the town council, of which I am a member, serve without pay, thus doing away with the incentive of the office seeker. In this way we get our best citizens to serve, consequently we have a well and economically governed city.

"To my brother automobilists I will say that the roads in central Kentucky are good (though my town is dry), but if any of the Class of '96 happen this way and will look me up I will see

that they do not suffer in the 'liquid refreshment' line."

I ENTERED the office of Messrs. F. S. Smithers & Co., New York City, in the fall of 1895 and was with them until April of the following year, at which time I went with my father at 38 Wall Street, who was in the time loan business. In May, 1905, I formed with Charles A. Bill and James D. Pell, the firm of Mann, Bill & Co., which existed until July, 1907, at which date our firm was increased by the addition of Leonard E. Ware. '99, and Wm. F. Timlow, and the name was changed to Mann, Bill & Ware, to carry on the same business. In December, 1914, Leonard E. Ware died, and in July, 1915, the name of the firm was again changed to Mann, Bill & Co., and my partners are Charles A. Bill, James D. Pell, William W. Peake, and Walden Pell. I have three boys, two of whom are now at St. Mark's School and the third I hope will go next year. There is nothing of interest to my classmates that I can relate as I have been actively engaged in business since graduation and have had little time for other pursuits.

AM practising law at 53 State Street, Boston, my firm being Mansfield & Whalen. Subsequently, on returning to Boston, I became a member of the firm of Vahey, Innes & Mansfield. I took an active part in the case of Commonwealth v. Childs L. Tucker and in the case of Commonwealth v. Percy D. McLoud, the so-called "Annie Geary Dress Suit" case. After resigning from that firm, I became a partner of Judge Joseph C. Campbell of San Francisco, with branch office at 2 Rector Street, New York City, where I had charge. As general counsel for the Cineguita Copper Company I went to Sonora, Mexico. I subsequently returned to Boston. My practise is of an advisory nature, my clients being mostly lawyers.

LEFT college at the end of the second year on account of lack of funds; secured a position as assistant chemist with the Boston Woven Hose and Rubber Co. until May, 1897, when I became chief chemist of the Revere Rubber Co., retaining the latter position until January, 1898. I came to Akron, O., as superintendent of the Diamond Rubber Co., became vice-president in 1902, also president of the Northwestern Rubber Co. of Liverpool, England; president of the Pan-American Rubber Co. and the International Process Co. After the purchase of the Diamond Rubber Co. by the B. F. Goodrich Co., I became vice-president and general manager of the latter. Still in harness at this writing but willing to let somebody else do the work. I am interested in tennis, golf, fishing, and yachting. I have had serious illness in recent years and have yielded up some small portion of my anatomy to the surgeon's knife but have retained all the essentials so far. I am now fat and healthy. Have managed to keep out of jail, have never violated the Sherman law, and recollect no thrilling or interesting experiences.

ERNEST WILMER MARLOW

Born at Washington, D. C., July 17, 1874.

Parents: Walter Henry, Mary Eliza (Turner) Marlow.

Douglaston, Long Island, N.Y.

In the fall of 1896 I returned to the Law School and in 1899 I received my LL.B. Shortly thereafter I went to New York, where I have been ever since. After the usual discouraging

experiences of a novitiate at the law in a strange city, I formed a partnership with two of my former employers in 1907, which firm by a process of evolution has become Churchill, Marlow & Hines. My activities outside of my profession have been limited. I have managed to escape notoriety in most of its forms and generally I have led a busy but peaceful existence.

ELIAS JOSEPH MARSH

Address: (business) 24 Church St., Paterson, N.J.; (home) 308 Eighteenth Ave., Paterson, N.J.

EXCEPT for my marriage and its consequences, recorded above, I have done so little in the last five years that can be written down that in spite of the secretary's very cordial invitation to write a "complete account of yourself since graduation," I hardly feel justified in burdening the next class report with a virtual reprint of my "piece" in the last, to which all seekers after truth in this particular are respectfully referred.

JOHN HILLYER THAYER MARTIN

Born at Woodbridge, N.J., March 22, 1875.

Parents: Joseph H. T., Lillie (Freeman) Martin.

School: Rutger's Preparatory School, New Brunswick, N.J.

Years in College: 1892-96. Degrees: A.B.; LL.B. 1898.

Married: Edna Boice, Feb. 28, 1906, Camden, N.J. Children: Carol, Dec. 25, 1906; Doris, June 8, 1908.

Occupation: Lawyer.

Address: (business) 434 Prudential Bldg., Broad St., Newark, N.J.; (home) 216 Rahway Ave., Woodbridge, N.J. To avoid confusion with another person of the same name address mail to J. H. Thayer Martin.

DURING 1896-97 I took the second-year course of the Harvard Law School, having taken the first-year course during my Senior year at college. The following year I had leave of absence from the Law School and studied at the Columbia Law School, returning to Cambridge in June to take the Harvard

examinations for the degree of LL.B. From January, 1898, until November of 1898 I resided in New York City. I passed the New York Bar examinations in the fall of 1898, and was then admitted to practise. I entered the employ of the law firm of Lindabury, Depue & Faulks, in Newark, New Jersey, in 1898 and continued there until May, 1901. I returned to New Jersey to live in November, 1898. In November, 1899, I was admitted to practise law in New Jersey. In May, 1901, I entered the employ of Frederick F. Guild, with offices in the Prudential Building, Newark, New Jersey, and in June, 1902, formed a partnership with him, under the name of Guild & Martin, which firm is still in business at the same address. In November, 1902, I was admitted to practise as a counsellor-at-law in New Jersey. In November, 1904, I was elected a member of the House of Assembly of New Jersey (the lower House of Legislature), and was re-elected a year later.

After my marriage, I resided in Newark, New Jersey, for a little over a year, and until May, 1907, when I returned to Woodbridge, New Jersey, where I still reside. I held the modest office of Township Attorney of the Township of Woodbridge for several years, there being no other Republican attorney in the township; but of late years Republicans have not been in demand in that vicinity. I was secretary and treasurer of the Harvard Club of New Jersey during the years 1909 and 1910. I have accomplished nothing else of public interest or importance, except to build up a sufficient law practice to support a family modestly.

FRANCIS MASON

Born at Brooklyn, N.Y., May 13, 1875.

Parents: Albert, Elizabeth Ann (Frothingham) Mason.

School: Polytechnic Institute, Brooklyn, N.Y.

Years in College: 1892-96.

Degrees: A.B.; C.E. (Columbia) 1898.

Married: Helen Tremain Martin, Sept. 27, 1902, Albany, N.Y.

Children: Harding Tremain, Aug. 19, 1903; Thomas Frothingham, June 5,

Occupation: Engineer and Contractor.

Address: (business) 17 Battery Place, New York, N.Y.; (home) 1125 Madison Ave., New York, N.Y.

IMMEDIATELY after leaving Cambridge, I spent two years at Columbia doing postgraduate work in engineering and received the degree of C.E. in 1898. After a summer abroad, I secured a job in the engineering department of the New York

Central Railroad and, during my four years service with them, acquired a variety of experience assisting in the preparation of the plans and the supervision of the construction of some of their larger improvements in the vicinity of Albany and New York. The outlook for the future was not promising, so in the spring of 1902 I switched to the Pennsylvania Railroad which was just starting the preliminary work for its tunnels and station in New York. For three years I worked on the surveys, plans, and estimates of the project, and then after construction started I put in four years more in charge of the driving of two of the tunnels under the East River and across town. This work in compressed air and also under the city was intensely interesting. and at that time a somewhat unique experience. On completion of the tunnels. I took a short vacation in the West, and then in 1910 organized a contracting company (Mason, Hilton & Co.) of which I have since been president. We have more or less specialized in heavy masonry and difficult foundations for railroads, power developments, and sanitary work, with a little professional engineering on the side.

For the past five or six years, my spare time during the summers has been spent at Sharon, Conn., where I have played a good deal of tennis and in reprisal have been made a governor of the Golf Club. Other activities have largely centered around the University and engineering, in which combination I have been particularly interested. Service on the Visiting Committee to the School of Engineering has been thrust upon me for the past three or four years. I have also been president of the Harvard Engineering Society of New York, and am now president of the Association of Harvard Engineers, having assisted in the formation of both these organizations. As to literary efforts, they have been confined solely to a few contributions to technical publica-

tions.

Address: (business) 125 Genesee St., Auburn, N.Y.; (home) 47 Chedell Pl., Auburn, N.Y.

A FTER graduation I worked two years as a tutor and then took three years at the Law School. Have the kindest recollections of the efficiency of the instruction and the generally studious atmosphere of the Law School. Ames, Gray, and "Jerry" are refreshing memories. Returned to Auburn, N.Y., my home town, and tried to build up a practise. Found it slow work and nearly starved getting started. The going is better, now. My professional life has been, I fancy, about like that of most of our men who have chosen a small city for their work. There are included the advantages of living in a beautiful part of the country, where one can readily get out for a day with his gun and dog or with his boat, and where one can know his neighbors and they can know him. Clients drop in and talk over family affairs as well as business — and so waste your time. As a friend of mine said, "Just as you get comfortably settled in your chair to 'practising law' some damned client comes in and wants you to do something."

In my poverty-stricken days I was lucky enough to marry the right woman, a Vassar 1903 girl, whom I consider one of the brightest women I ever knew. We have worked along up together and got a lot of fun out of adversity. Our troop of children, we frankly admit, are the handsomest, healthiest, and brightest young cubs in our acquaintance. We are feeding B. C. Jr. on bear-meat in the hope that some day he may make the eleven and help beat Yale. My obsession is "preparedness," and my avocation National Guard service. Am captain of the company here and have had my little part in making it one of the good outfits in the State. Some day I want to challenge Capt. Osborn's outfit to a competitive drill and rifle match. Have never gone in much for politics, preferring to claim my soul as my own. The summers I spend out on our nearby lake and let the kids swim and boat and live in the open. Winters, I shut myself in and, between earning a living and playing the National Guard game, find I work pretty hard. And all the time I thank God I went to Harvard.

LOUIS GUY MEAD

Born at West Acton, Mass., Oct. 3, 1873.

Parents: Oliver Warren, Lucy (Emery) Mead.

School: Concord (Mass.) High School.

Years in College: 1892-96. Degrees: A.B.; M.D. 1900.

Married: Mary Isabelle Temple, Oct. 1, 1914, Dorchester, Mass.

Occupation: Physician.

Address: 259 Beacon St., Boston, Mass.

SINCE the last report I have married and am still industriously looking for more patients at the same old stand. I am a visiting physician to out patients at The Massachusetts General Hospital but not a very productive member of its staff. I am happy and contented and belong to enough clubs to give and obtain an occasional drink.

After graduating with A.B. in 1896, I spent four years at the Harvard Medical School and graduated with the degree of M.D. in 1900. In August of that year I entered the Massachusetts General Hospital as house pupil, spending the years 1902–03 abroad, studying chiefly in Vienna, and starting the practise of medicine in September, 1903, at 259 Beacon St., Boston, where I still am. Soon after returning to Boston I was appointed to a junior position on the Out Patient Staff of the Massachusetts General Hospital and, as I have said, am now physician to Out Patients at that institution. For one year I was assistant in medicine in the Harvard Medical School and have been visiting physician to several small institutions in Boston, all of which I have given up.

I am not a very productive member of the class, being the author of only a few unimportant contributions to medicine.

The SPENT the six years after graduation in study and travel—two at Harvard, the other four in Europe—principally at Oxford, but also in Berlin and Paris. Since 1902 I have been an instructor and assistant professor of history here at Harvard. My life has been very happy, and on the whole uneventful, save for last year (1914–15) nine months of which I spent with all my family in England and France. I worked as a "volontaire" in the American Embassies in Paris and London during several fairly critical weeks of the war. I gave one of the series of Harvard

lectures at the French Universities, and had the great privilege of visiting the French front near Nancy on March 16, 1915. If any one desires a fuller account of what I saw there he can find it in the "War Notes" in the Graduates Magazine of September, 1915. I have nothing to add to what I said in the last report about my life here at Harvard, save that it is increasingly busy and unceasingly interesting. I was chairman (usually pronounced "choreman" in this University) of my department for four years, and am at present trying to help inaugurate the new "General Examination" (totally independent of and additional to the regular course examinations) which is henceforth to be required for the A.B. degree from all men who take the bulk of their work in History, Government or Economics. It is one of a number of reforms which are combining to render the college work of the Harvard undergraduate more interesting and more useful than it has ever been before; and I don't think that any '96 man who comes back to visit the University can fail to be impressed with the immense progress that has been made in this and other directions since our day.

Degree: A.B. Unmarried.

Park Lane, Highland Park, Ill.

HAD two operations in the summer of 1896, so spent the winter of 1896–97 on a ranch in Southern California to recuperate. In the summer of 1897 I began work with the Pennsylvania Railroad Company in Chicago as rodman on their track elevation work. I was transferred to Pittsburgh, then to the

Grand Rapids and Illinois Railway at Grand Rapids, Mich. I left the railroad in the fall of 1898 to go with The Peoples Gas Light & Coke Co., Chicago, with whom I remained in their engineering and operating departments until the fall of 1901. In November, 1901, I went with The Brown Hoisting Machinery Co., Cleveland, O. I started in the engineering department; then got into sales work, later became a department manager and assistant to the president. In October, 1911, the company opened a Chicago office putting me in charge and there I have been up to the present writing.

MY present report is much a duplication of the previous one. I am still with the Boston Transcript, writing many news stories, doing an occasional mild editorial, writing magazine stories now and then, both for my paper and others, with some correspondence for papers in New York and Philadelphia, and a growing amount of press-agent work. For several years I have made up the Harvard Class Day and Commencement pages for the Transcript. I have likewise continued my connection with the Harvard Alumni Bulletin, and have edited several class reports for the Harvard Alumni Association. (I suggest that if all men who write "lives" will put them in typewriting, it will save much time and labor — and I think Jack Hayes will agree with me.) Previous to coming with the Transcript, in 1904, I was successively with the University Press, Cambridge, the Cambridge Tribune, the Advertising Department of the Chicago, Burlington & Ouincy Railroad in Chicago, and briefly in the Advertising Department of the Library Bureau. The newspaper "game," while not being highly remunerative, is highly entertaining and varied — and every job, presumably, must be regarded with a due amount of philosophy. I have all my hair, and most of my teeth, and, on the whole, feel quite as young and energetic as I did twenty years ago.

AFTER graduating, I remained two years at Harvard studying philosophy, and a third year as docent and instructor at Radcliffe. In 1899 I went with my family to the University of California where I taught philosophy four years. We came to Columbia in 1903 where I have taught ever since. I have been vice-president of the American Philosophical Association and have been interested chiefly in the problem of the relation of mind and body and in the philosophical aspects of current radicalism. I have worked for the suffrage socialist movements and am on the advisory council of the Rand School. I was a member of Upton Sinclair's Cooperative Colony at Englewood, N.J., and enjoyed the experiment though I lost everything in the fire that ended the undertaking. My elder son has passed some of his examinations and will, I hope, enter Harvard in another year — my younger son two years later.

A FTER graduation I went into the leather business, and A remained in it for two years. I then suddenly determined to study law, returned to the Harvard Law School, and graduated three years later. Curiously enough, the practise of law led me back to business, and I am now president of the John S. Cheever Co., dealing in paper and twine, at the same time keeping the law office open. During the years since graduation I have married. established my home in Dedham, and am bringing up three children, one of them born in France where we were spending the winter. When my daughter was four weeks old I showed her the "Last Supper," and the Milan Cathedral, which, I should say, was a record. I was once elected a member of the Boston School Committee, an experience which ended any political ambition I might have had. To be a good politician one must at least be willing to sit up all night, talk endlessly about nothing, and be forever on the lookout for some ulterior motive behind every act. No one of these requirements being to my liking, I determined never again to enter the political arena. I am a trustee of a large savings bank, a member of its investment committee, and enjoy the problems thereby presented.

IT is not modesty that prevents me from saying something more about myself; it is only laziness. In the previous reports I have given such accurate information in regard to the offices of honor and trust which I have held or now hold, that it is too much of a burden to repeat them or to add to them at this time. Suffice it therefore to say that I am at present engaged as vice-president of the St. Louis South Western Railway Co. and in earnestly continuing a career worthy of the Class of 1896.

As I have carefully concealed from my family and friends all books, articles, and plays which I have written or translated, I do not feel that the time has yet arrived where I can divulge this information. Could you not wait until the class has been graduated at least twenty-five years before expecting a definite answer to this question?

Years in College: 1892-96.

Degree: A.B. Unmarried.

AFTER leaving college I was teacher seven years in my father's school. During the last two years of this period the school had changed its name to the "Morse & Rogers School," with Mr. I. Lothrop Rogers and myself as partners. My father and Mr. Rogers both retiring then, I chose not to continue the school alone. I entered the employ of R. Hoe & Co., remaining with this firm two years. This experience I shall never regret, not only because a few ideas acquired there seem to have stuck and blossomed out a little, but because it taught me that teaching was the only work I cared for or at which I could earn a living. I went for a short term as teacher in the Irving School, then as associate headmaster of the Nathan Hale School, — finally for the past six years out here in Englewood, where I have kept going a school, small but my own.

The summer of 1914 struck me as a good time to visit Europe, with the result that I was shut up in Paris during the first few weeks of the war. An interesting Paris at that time, from President Poincaré escorted by a troop of horse to my landlord getting into his ill-fitting regimentals. It was also necessary to take a look at the first flag captured from the Germans, and to drop in at the little office in the Palais Royal where Americans were enthusiastically enlisting in the Foreign Legion. Our train to Havre passed endless trains of Belgian refugees. At Havre, where I waited three days for my steamer to leave, French and English troops were arriving and leaving at all hours; including five hundred English wounded, and some Belgian regiments from Namur which we got out of bed to cheer at about 2 A.M., and went down into the street to shake hands with and talk to some of these fellows.

Apart from winning a chess match the other day, I am afraid I have no further "history" to report. It was only a chess problem tourney, anyway.

In the fall of 1896 I entered the Harvard Law School. My father wanted me to be a lawyer but I preferred mechanical work of some kind. One year at the Law School was agreed upon as a compromise. As a result of this experience I felt more firmly convinced that I would not be successful as a lawyer and I then decided to take a two years, postgraduate course at the Columbia School of Mines and specialized on the metallurgy of iron and steel. At the end of this course I went to Chicago and entered the employ of the Illinois Steel Company. About five years later I returned to Boston and entered the employ of the Massachusetts Steel Casting Company as treasurer. In 1912 I became treasurer of the Rivett Lathe and Grinder Company and I hold that position at the present writing.

I ENTERED the Harvard Law School with the class of 1899, but dropped out at the end of the first year, as I found that I did not care for the profession. I then associated myself with the Springfield Iron Works, at Springfield, Ohio, as secretary-treasurer. The business was discontinued in 1901, on account of my father's poor health, and I returned to Boston. After holding a number of clerical positions, I became a member of the staff of Harvey S. THE end of the last installment of my life's history, Volume I, I so to speak, left me with the Board of Water Supply of New York City, as an assistant engineer on the Catskill Aqueduct project. After eight years of service in this line of endeavor, I resigned January 1, 1914, to take the presidency of a construction company organized with the laudable idea of building homes of concrete for the harassed commuter. Quite a number of "homes" were built, but just about this time the "Great War" opened up to a full house on each side of the Atlantic, and the aforementioned commuter showed a preference for portable houses rather than concrete ones. In the ensuing readjustment I found my path of endeavor led into manufacturing, in which I am now engaged. At this stage of the story, it would be very pleasant to be able to bring in something about "war orders" making a fortune, and living happily thereafter. As a matter of hard cold fact however, nothing "making a noise like that" has happened up to date. But the author of this personally conducted biography is still hopeful and perhaps in the third or fourth installment may be able to chronicle joyful events of this character. A long and careful search of the archives reveals no offices of honor or trust yet held, although it is the biographer's private opinion that if anything he may be a little too trusting himself for this work.

Publication: "An Island God."

I WAS admitted to the New York Bar at Rochester, January, 1900, practised law six years, and forestry four years. The remaining ten years since 1896 were spent as a student at the Harvard Law School and Yale Forest School and in recovering from a severe breakdown which occurred in 1904. Was deputy assistant district attorney New York County from January 1, 1902, to August 15, 1903; field assistant, collecting data for report of special commission on Taxation of Woodland (Connecticut) in 1912; scout and field assistant U. S. Bureau of Entomology, March 15 to September, 1913; assistant in forest management, October 1, 1913 to date — office in Boston. For the past three years my work has been to conduct experiments in forest management in New England in the region infested with the gipsy moth to determine whether this insect can be controlled economically by removing its favorite food plants.

In 1897 after five years service in the Naval Brigade, M.V.M., I was discharged as Ensign. While in New York I served a total of three years as a private in Squadron A, Cavalry, National Guard New York, and am still interested in "preparedness" to the extent of having served another year as a private in Battery A, Field Artillery, M.V.M., of which I am still a member. In October, 1901, in New York City, I served as secretary of the Committee on Watchers of the Citizens Union, which organized a force of 600 men, chiefly volunteers, who served at the polls when Mayor Low and District Attorney Jerome were elected. In the election of 1903, I served on the Law Committee of the Citizens Union which organized a corps of lawyers who attended

all courts on election day.

Publications: I have written: "Abstracts of Decisions on Residence, Domicil and Place of Abode," 1905; "Management of Typical Woodlots infested with the Gipsy Moth in the White Pine Region," 1916.

VERNON MUNROE

Born at Englewood, N.J., Nov. 24, 1874.

Children: David Hoadley, Nov. 27, 1902; Vernon, Jr., Dec. 15, 1908; Louisa Sprague, Oct. 14, 1911.

Occupation: Manufacturing.

Address: (business) 252 West 64th St., New York, N.Y.; (home) Englewood, N.J.

THE first fifteen years after graduation I spent in what appears now to have been largely education, although at the time it seemed little better than pot-boiling. I tried the export business, the import business, insurance in two forms, and while I made no failures. I met with no success sufficient to tempt me to remain permanently with any of those with whom during that period I was associated. Outside of the ordinary business, I served as supercargo on a tramp steamer to the West Indies and up the Orinoco; as a private with Troop A, New York Volunteer Cavalry in the Porto Rican campaign; for six years in Squadron A, N. G. N. Y., and as secretary of a chaotic hospital in my home town of Englewood, N.J. The hospital connection, indirectly, led to my being nominated by the Democrats of Englewood for Mayor, to which office I was elected in November, 1911, and two years later re-elected for a second term — the only Democrat returned in a Republican landslide.

During 1911 I entered the manufacturing business as secretary of the Saurer Motor Company. This company was later absorbed by International Motor Company, of which I am now president. The number of business experiences that have been crowded into these five years have been many and eventful and the opportunity for development has, in consequence, been proportionately large. My terms as Mayor being over, I have just been elected president of the Englewood Hospital, with which I was formerly associated. Two of my children will, I

hope, go to Harvard at the proper time.

AFTER graduating from Harvard, I entered the Columbia Law School at New York City, and while there I was a member of the Columbia Varsity Glee Club and of the Columbia Varsity swimming team. Immediately after graduating from the Columbia Law School, I took my New York State Bar examinations, in June, 1899, and was admitted to practise in that state. In the fall of 1899, I began my clerkship in the law office

of Wallach & Cook at 44 Wall Street, and after two months, because I desired to associate myself with an office having a litigated practise, I became a clerk in the office of Hayes, Greenbaum & Hirshfield, at 141 Broadway. I clerked for six months and then began to practise law on my own account as a member of the firm of Franc, Neuman, Frank & Newgass. This firm continued until 1903, when Mr. Frank retired. My firm continued under the name of Franc, Neuman & Newgass until July 1, 1911, when we dissolved our partnership, and Mr. Neuman and I have continued to practise law as copartners under the name of Neuman & Newgass ever since. My professional obligations and business interests have been so engrossing during recent years that I have had little time to devote myself to other matters.

AM still living happily with my wife and children at Buffalo, my native city. The other and less important facts of my

life may be briefly summarized.

After leaving college I prepared for the Bar in the Law School of the University of Buffalo, was admitted to practise in 1898, and have ever since been engaged in the general practise of law, my present firm being O'Brian, Donovan & Goodyear. For many years I have taken more or less active part in the affairs of the University of Buffalo, having been one of its trustees during most of that time, and only recently I resigned from the law faculty after fifteen years of service.

In 1906 I was elected a member of The Assembly, one of the houses of the New York Legislature, and served there during the first three years of the Hughes Administration. Needless to say I was an active partisan in advancing the policies of Governor Hughes. In 1909, by appointment of President Roosevelt, I became United States Attorney for the Western District of New York, and occupied that office throughout the Taft Administration and during the Wilson Administration until my resignation in December, 1914.

In the fall of 1913, the local committee of One Hundred independent citizens nominated me for Mayor of Buffalo, but in the

three-cornered fight which followed I ran second, being defeated by the Democratic candidate. In 1914, as a candidate on the Republican State Ticket, I was elected one of the fifteen Delegates-at-large to the Constitutional Convention. In that convention I was acting chairman of the Committee on Rules and was also chairman of the Committee on County Government. The product of our earnest labors was rejected by the people at the November election.

Although this record on its face is against me, I still adhere to my original ideals in matter of government, — and still have friends. One of the things for which I feel most grateful is that Ward, Lord, and Pratt are in Buffalo and among my friends and advisers.

JOHN FREDERIC OSBORN

Born at Cambridge, Mass., Jan. 24, 1873.

School: Cambridge (Mass.) Latin School.

Occupation: Mill Engineer.

Address: (business) 201 Devonshire St., Boston, Mass.; (home) 314 Harvard St., Cambridge, Mass.

A FTER graduation I spent two years as an assistant in the Lawrence Scientific School. I enlisted with the 8th Mass. U. S. V. and served with the regiment in Matanzas, Cuba: was mustered out in April, 1899. From that time until January 1. 1903, I was with the Planters Compress Company, in Boston, Texas, and other places. From January 1, 1903, until May 1. 1907, I worked with various companies on special machinery and inventions, a work which proved of the greatest interest to me. On May 1, 1907, I entered the employ of Chas. T. Main, engineer, where I have been ever since. As assistant engineer to Mr. Main on the design and erection of industrial plants, I have been fortunate in having had charge of a large variety of important work, and so absorbed have I become that it is hard to believe now that it is "all out for the twentieth." The last five years have gone too fast; I have been too busy, and too contented, I am afraid, to notice it. Busy — as those can testify who, in that time, have had an addition to the family; who have experienced these ever increasing calls on one's time outside of business and home: who have bought a farm in New England, and tried to make it pay; and who are holding down a commission as Captain in the National Guard, under the watchful eye of the war department, and trying to earn a living at the same time. I am contented and thankful because I have managed so far to keep out of trouble; because my little family, growing more and more interesting every day, are in good health; because each year from June 1 to October 31 we get back to nature and the simple life on the farm, where I manage to mix with my work a little play, in the shape of motor boating, motoring on the Cape, or taking a shot now and then at the birds. This all seems a little selfish no doubt, but I have been asked to tell the class about it. Voilà.

The only articles I have written are specifications and reports, which have had no extensive circulation.

FRANK ROOSEVELT OUTERBRIDGE

57th St., New York, N. Y.

A FTER graduation, I traveled in Europe for three months. A On my return to New York I obtained a position with the late John B. MacDonald then contractor building the Jerome Park Reservoir for New York City. In the spring of 1897 I joined my father, a merchant in New York of the firm of A. E. Outerbridge & Co., and there I have remained making a comfortable and decent living. In May, 1898, I enlisted in Troop A. New York Cavalry, U. S. V., serving in Camp Black, Camp Alger, Newport News, and Porto Rico. Was mustered out in November, 1898, when I returned to business. I served in Squadron A., N. G. N. Y., from about December, 1897, until August, 1914, from private up. I resigned after four years as captain. My sports are principally with the horse, having dabbled in polo and riding to hounds, a little big game hunting and many miles of road hikes. As Irvin Cobb says, "Speaking of Operations," I have had my share — the latest being the loss of part of my right foot. I am now getting about and hope soon to be lively enough for one of my years. Am looking forward with pleasant anticipation to our reunion.

CINCE graduation in 1900 from the Episcopal Theological Seminary at Cambridge, I have lived and worked at my job — two years in New York City, nine years in Dorchester, and the balance here at St. Paul's Church, New Haven. Next to Harvard comes Yale. It certainly is a fine college and the men Al. I meet a number of the undergraduates every year; have six of them teaching in my Sunday School now, and the champion wrestler at Sheff. bossing one of my basket ball teams. I see a great many of the professors, especially at the New Haven Lawn Club where I play tennis with them. I should bet on the Harvard undergraduate, but on the Yale professor. I have had a pretty good time these last four years in connection with football, contrasting agreeably with my years at Harvard when Yale gave us a yearly trouncing. My two boys attend the Hopkins Grammar School which, after the Boston Latin and the Roxbury Latin, is the oldest school in the country. They are destined for Harvard. Anson Phelps Stokes, secretary of Yale, is on my church's preaching staff and my regular assistant, Olmstead, is another Yale graduate. We are all "Pacifists" and live together in harmony.

I am the president (this year) of the Alumni Association of the Theological School; chairman of the Social Service Commission of the Diocese of Connecticut, and member of the Commission of the Province of New England; president of Neighborhood House, a large and very successful Settlement among the many Italians of this city; and trustee of Atlanta University, and Utica Normal and Industrial Institute, Miss.: two institutions which I commend to the generosity of all who are interested in

the education of the negro.

JOHN GORHAM PALFREY

Born at Belmont, Mass., Oct. 2, 1875.

Parents: John Carver, Adelaide Eliza (Payson) Palfrey. School: Browne & Nichols' School, Cambridge, Mass.

Years in College: 1892-96.
Degrees: A.B.; LL.B. 1899.

Married: Methyl Oakes, Oct. 3, 1905, Auburn, Me.

Children: Margaret Germaine, Oct. 7, 1906; Elizabeth Howland, Jan. 14, 1909; Mary Ann, March 6, 1911; Sarah Hammond, Sept. 18, 1912; Joanna Oakes, Jan. 30, 1915.

Occupation: Lawyer.

Address: (business) 84 State St., Boston, Mass.; (home) 152 Mt. Vernon St.,

Boston, Mass., and Walpole St., Sharon, Mass.

N leaving college I entered the Harvard Law School, and graduated in due course in 1899. In the Law School I did very little except law, and law work connected with the Harvard Law Review, of which I became chief editor. On leaving the Law School I spent a year in Washington as secretary to Mr. Justice Gray of the Supreme Court of the United States, after which I began the practise of law in Boston in the office of Brandeis. Dunbar & Nutter. In 1904 my present firm was formed, consisting, besides myself, of Albert Boyden, '94, Edward C. Bradlee. '94, and Howland Twombly, Yale, '96, and boasting of the simple name of Boyden, Palfrey, Bradlee & Twombly. We do a pretty miscellaneous law business — with what success it is not for me to say. My own part is in dealing with law questions, court work, and business law rather than with jury trials and the more physically active parts of the law practise. From time to time I find pleasure, though little profit, in acting as arbitrator, auditor, or master in cases referred to me by agreements of litigants or by the courts.

The family live in Boston during the winter months, but we make our principal abode and spend the longest season on the farm in Sharon, Mass., eighteen miles south of Boston. Our first farm was in Norfolk, Mass., but it was absorbed in 1911 by an institution for dipsomaniacs, and we moved to Sharon. Aside from family and business, I think I can fairly say that my farm, my nondescript trees, and forestry matters generally are my principal avocations. I have held no public positions, and have had no important political activities, although I have kept somewhat in touch with things political and with public affairs. I suppose I am a Republican, but doubt if all my Republican friends would agree with me. I voted for Roosevelt in 1912, and should be glad of a chance to do so again. My literary efforts have been confined to occasional articles in law periodicals. I have retained a connection with the University by lecturing, in alternate years, at the Law School on Massachusetts Practise.

LAWRENCE PARK

Born at Worcester, Mass., Dec. 16, 1873.

Parents: John Gray, Elizabeth Bigelow (Lawrence) Park. Schools: Fish's and Dalzell's Schools, Worcester, Mass.

Years in College: 1892-96.

Married: Maria Davis Motley, Nov. 16, 1905, Groton, Mass.

Children: Charlotte Elizabeth, Sept. 14, 1906, died Sept. 14, 1906; John Gray, Sept. 15, 1908; Thomas Lawrence Motley, April 3, 1911; Eleanor, June 8, 1914.

Occupation: Architect.

Address: (business) 8 Beacon St., Boston, Mass.; (home) "Scottowe," Groton, Mass.

A FTER leaving college I entered the Drawing School at the Boston Art Museum where I remained until June, 1897. In the autumn of that year I entered the office of Messrs. Shepley, Rutan & Coolidge, architects, in Boston, where I remained until July, 1901, when I opened an office at 8 Beacon St., Boston, for the practise of architecture, with Robert R. Kendall as a partner, under the firm name of Park & Kendall. This partnership was dissolved in May, 1910, my partner removing to Constantinople, and I have since continued alone the practise of my profession at the Beacon Street address. In the summer of 1906 and the following winter I devoted much of my time to making plans for, and superintending the construction of, enlargements and alterations of my grandfather's house in Groton where, since October, 1907, I have lived. I have been for some years much interested in certain phases of American history, particularly in reference to the early houses of the American colonies and their methods of construction, and especially in early American portrait painters and their works, and in the work of American silversmiths. I hold some minor offices of trust in Groton: since 1910 have been secretary of the Groton Historical Society. and in 1915 was made a trustee of the Society for the Preservation of New England Antiquities which was established by our classmate, Sumner Appleton, and in which he remains the moving spirit. I have for the past few years been compiling data in regard to the works of Gilbert Stuart which I sometime expect to publish and I shall be glad to have any classmate who is fortunate enough to own a Gilbert Stuart portrait communicate with me in regard to it.

NOTHING new or exciting has happened to me since the last Report was published. My wife and I have taken three trips to the West Indies, in the last five years, and found the tropics delightful, especially the Island of Jamaica, where we passed some weeks at Port Antonio. On another trip we visited Cuba, Porto Rico, and Bermuda. We enjoyed still another trip to Panama, after the Canal had been built and filled with water but before it was formally opened. We have spent our summers at Cotuit, on Cape Cod, and find the quiet and simplicity of the Cape very charming — with warm water and balmy breezes.

Since 1909 he has been a member of the General Board of the Naval Militia Association of the United States. This board has prepared, and after many years' work, has secured the passage, through Congress, of the national legislation which puts the Naval Militia in practically the same relation to the Navy Department as the National Guard bears to the War Department. This national law has been of great benefit to the Naval Militia and has been so administered by the Navy Department, that up to date there has been no evidence of the controversies which apparently exist between the National Guard and the War Department. The General Board of the Naval Militia Association has been more or less in constant consultation with the Navy Department, and in conjunction with the National Naval Militia Board, is working out the problems presented by the recent

national legislation.

Practically all my time is devoted to practising law, though I find time for a little amateur soldiering and charity organization work.

HAVING completed one year's study of the law at Harvard, during senior year, (although not registered in the Law School) I entered the second year class of Cincinnati Law School (later for a time a department of the University of Cincinnati) and graduated in June, 1898; was admitted to Bar (prior to graduation) October 11, 1897; became a member of law firm of Peck, Shaffer & Peck, from July 1, 1898, and have been actively engaged in practise ever since, particularly the trial of cases, and the examination of the legality of proceedings pertaining to the issuance of municipal bonds, in which the firm has specialized.

TRIED literature for two years after leaving college, then took up the oil business, going with the Waters Pierce Oil Company. Worked generally at more or less menial jobs without salary for one year and a half and in the spring of 1898 was put on salary as assistant to the manager of the Lubricating Oil Department. In the spring of 1899 was made assistant treasurer and in April, 1905, acting president; in June, 1905, was made president, which position I have since held, the Waters Pierce Oil Company meanwhile being sold to the Pierce Oil Corporation.

I have taken part to some extent in outside businesses, having been a director for several years in the Mexican Central Railway and the National Railways of Mexico and being at present a director in the Tennessee Central Railway. Also a director in the National Bank of Commerce in St. Louis and first vice-president of the Pierce Investment Trust Company.

I have held official positions and directorships in one or two other minor concerns; like Work but prefer Golf; would rather write books which cannot sell than make oil which can; am still convinced that this is generally a hard life but am fairly successful in getting some pleasure and profit out of it.

Publications: "Pot-pourri of Poetry and Prose"; "Kufu, A Song of Southern Seas"; several other books that have not yet seen the light and probably never will.

I HAVE been practising law in New York City since graduating from the Columbia Law School in 1899. During all this period I have been connected with the firm of Sullivan & Cromwell, first as a clerk, and for the last ten years as a partner. It is an old saying that the law is a jealous mistress. Nowhere and at no time has she been more jealous than in New York during the past score of years. I have tried, however, to use such surplus time and energy as the law has left me in aiding the work of various civic organizations.

I SPENT four years at Harvard followed by two years and a degree at Massachusetts Institute of Technology; then a brief period of slaving for others; and in 1900 I took the final plunge into business on my own account. In 1902 I formed an offensive and defensive alliance with Allen H. Cox of "Tech." and the

Beaux Arts, and since then have fought in the trenches, steadily, in spite of temporary setbacks, gaining ground. Today we are thoroughly equipped, prepared, and organized to withstand the onslaught of anything from a thousand dollar spinster to a committee of a billion dollar hospital for the maimed and wounded of the Harvard reunions.

In 1911 Mr. Andrew Freedman put me into the Shubert Theatrical Company to report to him concerning its finances, and after he sold out his interests, I still remained with the Shuberts. In February, 1914, they bought a half interest in the Tyson Company, the largest of the New York theatre ticket agencies, and they put me there to look after the finances. They sold out their holdings in September, 1915, but I have remained with the Tyson Company in the same position. I have written a few plays, but have had nothing produced yet.

New SPAPER work, teaching in high schools, a state normal, and the State University, in Minnesota, were mere stepping stones to this webfoot shore and my present exalted role of lord high punctuator of official publications in the Oregon State Agricultural College. Here, surrounded by a wilderness of good fishing, sea beaches, and snow-capped mountains, to say nothing of the showy China pheasant, I break the Oregon statutes every day by putting in over eight hours wrestling with the split infinitives and other enormities of our college and station scientists. Incidentally I am amassing a library of my own de luxe publications anonymously issued under such captions as Dignifying the Industries, The Enrichment of Rural Life, The Life Career, The Trail Blazers, etc. These are issued in limited (to 30,000) editions, and all classmates should hasten to put in a prepaid order (a post card) before the supply is exhausted.

DURING my Senior year at college, I also attended the Law School. After graduation I returned to my home town, Northampton, Mass., and prepared for the bar in the office of John B. O'Donnell and was admitted to the Hampshire County Bar in the fall of 1897. Soon after I took up my residence at Hartford, Connecticut, was admitted to the bar there, and have made my home there ever since. In May, 1898, I enlisted for the war with the First Connecticut Volunteer Infantry. My rank was Corporal. There were twenty college men in my company and the personnel was excellent generally, so that while the tedious, inglorious routine at sun-baked Camp Alger seemed a tragedy then, I can not look back at the whole business of flooded sinks, fly-specked, unsanitary food, with a pleasant feeling of patriotic pride.

After recovering from the regulation typhoid fever and malaria resulting from service at Camp Alger, I continued for about fourteen years to take part in military matters in connection with our local National Guard Regiment. I had a week of "strike duty" at Waterbury, Connecticut. I have participated in nearly all the army maneuvers held on the Atlantic seaboard, notably the maneuvers at Manassas, Virginia, and those held in Eastern Massachusetts. When I retired from the National Guard I

was Captain in command of a company of infantry.

Out of doors my favorite diversion has been horseback riding. For some years I owned the fastest running horse in the county.

I was married in March, 1914, to Miss Laura Eaton Wheeler. She is a pupil of Ysaye and Deru, and plays the violin so well that many people know me because I am her husband.

THE drug business seems to have a fascination for me and I still cling to it, though on off days I like to talk railroading, another "Hobby" of mine. The two go together and are not "Incompatibles." However, though I do not meet many of the '96 men in this vicinity, I long to have a chance of associating more intimately with the Old Time Boys.

ON leaving college I started to work on the Kansas City Times. In 1898 I went to the St. Louis Republic. Two years later, finding gold had greatly appreciated in value, I endeavored to open up some new fields in Nicaragua but the gold was too much mixed up with soil and scenery. Returning, I worked on newspapers in St. Louis and Seattle, but finally decided to get into business. The first job obtainable was copying deeds at the city hall. This led to a place keeping books in a trust company. After another stay on the Pacific Coast, I found a vacancy in the Union Fuel Co. By attending regularly to business and filling each vacancy as it occurred I eventually became general manager and have so far prevented any vacancy occurring in that office.

About a year ago I took up golf. This has caused me to hold a very modest view of my own abilities and has made me very tolerant of all human failings. No political honors or offices have been thrust upon me, no lodges carry my name, no colleges have conferred degrees upon me. But at least I have written no books.

HOW I spent the greater part of ten years looking through a microscope and what resulted therefrom has been duly set forth in earlier reports. During that period I was for a time an assistant in the University in Botany 1 and Zoölogy 3 and for eight years Master of Science at the Browne & Nichols' School for Boys. But my chief interest was concentrated on research in comparative neurology. I then believed it was my mission to learn how we think, — that is, to do something toward analyzing exactly the neurological processes which result in thought. The Carnegie Institution for Scientific Research was imposed upon to allow me annual grants of \$1000 the last two years. Such scientific papers as I put forth with much labor interested an increasingly diminished audience, until finally there were only a Russian, a Pole, and a South African who knew what I was doing, — and I question if they did. I haven't the slightest doubt myself but

that the discoveries I made at this period were of epochal importance, but I am equally certain that no one else thought the same. Still I have not wholly gotten over a certain pride at having in that period unraveled the history of the development through some millions of years of a single anatomical and physiological unit of the vertebrate nervous system, working out fairly completely its origin, functions, and modifications. After eleven years of residence in Cambridge, I finally escaped with only a slight attack of Cambridgitis, from which I believe I have fully recovered.

Since 1904 I haven't once looked through a microscope but have been getting another vision of things, telescopic rather than microscopic. In the ten-year period following, I spent five years in Europe and the alternate five years in trips round the world, visiting almost all places of interest from the point of view of the development of civilization, religion, and art. During that time I contracted an interest in these fundamentals, of which I understand today one may learn something at Harvard. The aesthetic in me that had lain dormant, almost unsuspected, under this stimulating and varied environment developed like a mushroom. Worse than that, I acquired a taste for Eastern art and wasted my substance accumulating all kinds of junk. -Oriental paintings, porcelains, prints, and a collection of Oriental textiles that will compare at least favorably with any that I know. During these ten years I took with me in the aggregate one hundred and twenty promising young Americans in the last two years of preparation for college, together with assistants. who continued their tutoring so that they were able to take the college entrance hurdles in the scheduled time. More interesting to me however was my endeavor to imbue them with some comprehension of European political and social systems, of Buddhism, the Sienese primitives, Indian architecture, Sung art, and other civilizing tendencies. Just as the Travel School had become well organized so that it could almost run itself and I was hoping to settle down and put into books something of what I had learned the previous ten years, the Czar and the Kaiser interfered with my plans and temporarily at least displaced all popular interest in the subjects I wanted to write about. So, left without a job, in the past two years I have turned to making trouble for the people immediately about me, and incidentally have become a publisher.

In spite of the strenuous protests of school masters and mistresses of the private schools, some of whom interpreted the word "private" in a way I didn't see fit to accept, I published, with the assistance of about a hundred public-spirited educators, in the spring of 1915, a guidebook to the best private schools. The critical treatment of the schools, telling many things never before put in print, came too near the truth to please some of the school people, but on the whole the book was most cordially received and 8000 copies distributed. A new edition of 640 pages, considerably enlarged and improved, appeared in May, 1916, under the title "A Handbook of American Private Schools." Incidentally I edited and published in 1915 "Miscellaneous Moods," a book of verse by Elihu Vedder, and "A History of Kinran and Nishiki Brocades" by Shojiro Nomura, both friends of my

wanderjahre.

During the past year my chief interest has been in preparing a Handbook of New England, the purpose of which is to give human interest information on town and country along the routes of automobile travel. This, too, has not been a one man book but has required a staff of twenty writers and has been made possible by the contributions of over a thousand local authorities, the correspondence with whom has involved the use of some 50,000 postage stamps. The attempt has been to make a sort of humanized Baedeker. Here, too, in my policy of telling a little more of the truth than is strictly conventional, I have run up against some difficulties which have given zest to the task. While the effort has been generally appreciated, some have reasoned: "Why tell anything about our town if you can't say something good?" And there has been difficulty in meeting the ebullience of some of those local boosters who insist that "Our new \$20,000 gas plant" ought to be expatiated upon. However, the atrocities have been committed and some 800 pages of it all published (ready in May).

These few things have kept me so occupied that I haven't anything interesting to report except that my youngest son has

four teeth.

Occupation: Physician and Surgeon.

THE month of October, 1896, found me entering the first year class of the Harvard Medical School. In the summer of 1898 I worked at the McLean Lying-in Hospital (Boston) in maternity work. During two summers of the medical course I worked in the hospitals as assistant, and during the fourth year of my course I became the clinical assistant of Dr. John Lovett in orthopedic surgery. The following summer, that of 1900, found me on the Boston Floating Hospital. Completing my medical course I graduated from the South Department of the Boston City Hospital and later from the New York Hospital for Infants and Children. Desiring to make the diseases of infants and children my lifework I spent several months in Vienna as assistant to Professor Alois Monti, at that time a great authority upon these diseases. Coming after this to New York in 1904 I began humbly the practise of medicine and surgery. The first three vears were quiet ones. I slept in my office and patients were not numerous or remuneration much. To fill up time I worked as assistant in the children's department of the Cornell Medical School. I gave this up to go as instructor and assisting visiting physician as well as chief of clinic to the Post Graduate Medical School and Hospital. About this same time I became chief of clinic and visiting physician at the St. Mark's Hospital, and consulting specialist at the Nassau Hospital, in Mineola, Long Island. I am a member of many medical associations, a Fellow of the Academy of Medicine, a member of the American Medical Association, of the Harvard Medical Society, of the County and State Medical societies, of the Greater New York Medical Association, of the West Side Clinical Society, of the Medico-Jurisprudence Society, of the New York Mutual Aid Association, of the New York Economic League, of the New York Physicians Association, of the Harlem Medical Society, of the Bronx Medical Society: other non-medical societies are the Vereinigung alter

Deutschen Studenten, the New England Society, the Chi Psi Alumni Association, the Vermont Society. A few monographs from my pen are: "Nuts and Fruits, their value in the diet of children": "Adenoids in Infancy, Personal Experiences": "Achondroplasia, Chorea Minor, etiology and treatment in children": "Entero-colitis in Infants": "Fruit Addition to the Diet of the Growing Child"; "The Value of Fruit Juices in Infant Feeding": "Headaches in Children"; "Modern Infant Feeding: Some personal observations"; "Nasal Diphtheria in Infants"; "The Passing of the Nursing Mother": "The Value of Pertuscis Vaccine": "Petit mal: Cessation through Removal of Adenoids": "The Menace of Acute Traumatism in Children and its Treatment": "Scurvy in Infants: Importance of its etiology." I have been at my present location nearly eight years. In consultation work and for pleasure I use a modest Reo runabout having graduated some time ago from a Ford. Motor runs about here are beautiful and the roads usually excellent. Summers, that is, during July or August, I usually spend in a very rural community in Vermont walking, motoring, and fishing. However, one summer before the war I spent at the English lakes at Grassmere boating, seeing new faces, and hearing new kinds of English.

My weight, although dangerously near two hundred pounds, does not prevent my enjoying a stiff game of tennis, dancing, swimming, and walking. I believe that, at least after forty years, a low animal proteid diet is the secret of health in many instances particularly in sedentary workers. It is always a great pleasure to hear of the "doings" of some brilliant minds of our class. Such stimulate, add zest to life but make me disparage my own feeble efforts. Won't it be luxury after a hard day's work to sit in an easy chair with a pipeful of fragrant tobacco in our favorite "jimmy pipe" and read the letters of our classmates, our old friends whom we have not seen in many years?

STEPHEN FAUNCE SEARS

Born at Brookline, Mass., Aug. 7, 1874.

Parents: William Barnas, Emily Adeline (Faunce) Sears.

School: Brookline (Mass.) High School.

Years in College: 1892-96.

Degrees: A.B.; A.M. (Columbia) 1898.

Unmarried.

Occupation: Educator.

Address: Washington State College, Pullman, Wash.

THE year 1916 finds me in my fifth year of residence in the state of Washington, assistant professor of English in the State College of Washington, a resident of Pullman, where the college is located, and an enthusiast with respect to the attractions of the Northwest. In the fall of 1896 I was appointed instructor in English, French, and German in the Montclair Military Academy, Montclair, New Jersey. In 1897 I made my first trip west, making a six months' tour of the country, -New York to California and back; and in the fall of that year entered Columbia University as a graduate student in literature under Professors Woodberry and Brander Matthews. the degree of A.M. in 1898. I continued as President's University scholar until the fall of 1899, setting out then for the Middle West as instructor in English at the University of Cincinnati. Here I remained for two years, rising to be second man in the department and correcting from 400 to 500 themes a week, in addition to regular class room and conference work, for the munificent salary of \$600 a year, until an unexpected opening in my father's business in Boston called me east again. After six years of successful business, the West and the old profession called again, - this time to the University of Illinois, where I remained as instructor in English for four pleasant years and was advanced to the position of secretary of the Harvard Club of Eastern Illinois. As this position, however, added no butter to the bread, I resigned from Illinois to accept this place as assistant professor of English at the State College of Washington at a sixty per cent increase of salary over what the state of Illinois had contributed, which, in its turn, was still far better than what Ohio had allowed. In the struggle for existence the rims of the bowl of our country continue to appeal the most to me; and teaching, as has often been said, is an excellent occupation as long as one can afford it.

Marks of distinction are few. I have had the honor to be a member of the Athletic Committee and of the Athletic Council of this college in our greatest athletic year, when the football team defeated Brown University at Pasadena decisively, and developed indisputably into the best football team in the Pacific West and, by a reading of comparative scores, a rival to Harvard. I am a member of the Spokane Club, the Spokane Amateur Athletic Club, and am president of the University Club of Pull-

man.

A FTER graduation, I spent four years in the Medical School of Columbia University, receiving the doctor's degree in 1900. From June, 1900, until January, 1903, I served on the surgical side of Mt. Sinai Hospital of New York. I then spent a year abroad and returned in February, 1904, to St. Louis, Mo., where I started in to practise, limiting my work to surgery. I was attached to the teaching staff of St. Louis University as instructor in surgical pathology, was advanced in three years to assistant professor, and then transferred to the surgical department, as professor. The surgical game has been difficult from a material point of view, but of unlimited interest from the academic research side. I have turned out some thirty odd pieces of scientific work and am affiliated with the following organizations: American Medical Association, American Association for the Advancement of Science, American Association for Cancer Research, Western Surgical Association, Southern Surgical and Gynæcological Association, visiting surgeon to the St. Louis City Hospital, and visiting surgeon to the Jewish Hospital.

SINCE graduation I have devoted my time to cotton manufacturing. I should like very much to tell how I am president of this, treasurer of that, and director in something else but when the next report comes out there may be no this, that, and something else. So if any members of the class of '96 are interested in knowing what I am doing let them come to Lowell and I will be glad to show them all there is to show. In regard to marriage and children I will say, "Please refer to the last report."

Dear Jack: Why do you ask again That I take up my fountain pen To emphasize confessions
That have heretofore been made!
I've not of late increased my tribe,
And I prefer not to describe
My financial possessions,
Which by millions do not grade.

My lawyer classmates all would know To claim big clientage for show Would be so very foolish That I dare not take the chance. Authorship and fame evade me, Drudgery and worries jade me, My guardian angel's ghoulish, — So I'll do a song and dance,

Like This:

Whistle, March winds, crackle, fire, Mount ye flames, up higher, higher, Glow my lamps, 'neath silken fringe, (Now my little devils cringe), Scenes in paints attract my eyes, Lead my thoughts where white-flecked skies Arch the mountains, valleys, brooks; Turn me now to shelves of books,

Mines of wisdom, souls encased,
Some erotic, many chaste;
Comes my friend with cheer and song,
(Gone the imps where they belong);
And all conspire to stimulate
Th' illusion of men's hearts made whole,
"I am the master of my fate,
"I am the captain of my soul."

THE Secretary finally persuaded Sheriff to write something Here it is:

"The longer I live in Chicago the better I like it. Residence of twenty years exceeds the limit of experiment and takes the character of permanence. Professionally, my connection with the firm of Sheriff, Dent, Dobyns & Freeman, of which I have been the head for nine years, will terminate on May 1st, 1916, when the partnership will dissolve, and thereafter I shall continue to practice law with a number of competent assistants, in the quarters now occupied by the firm at 1060 The Rookery, while my withdrawing partners will locate elsewhere. Since our decennial I have enjoyed no increase of progeny, nor have I written any book, or held public office. Perhaps this sounds rather atrophied, but any one whose anxiety may be touched will have plenty of chance for personal investigation in June."

SUPPOSING that this report was to be confidentially submitted for circulation among classmates only, I had expected "to make my story as personal as I liked." Startled, however, at our secretary's disclosure of the publicity which our fifth volume will receive, I suddenly determined to confine my remarks to the simple statement that my principal occupation has been that of private secretary and special assistant to bankers.

I worked as a hardware salesman for five years; manufacturers' agent for two years. Since then I have been associated with George L. Hill as Hill-Smith Metal Goods Co. We make motor repair parts particularly for the Ford car — pioneers and successful so far. I have worked every day but Sunday for the last few years; stay alive by walking twenty-five miles every Sunday — I use government maps and don't ask questions. As I am afraid of dogs every Sunday is a thrilling adventure. I take my children or anyone else who will go but go if I have to go alone. I have held no offices of honor or trust nor of any other sort except that I am treasurer of the Hill-Smith Metal Goods Co. Ah! yes, I had forgotten - I have been singled out for membership in the Framingham Country Club and also in the Appalachian Mountain Club.

IT is a fortunate thing for me and posterity, that Hayes keeps bobbing up demanding a life history. I should forget some of the marvelous things I have done, some of the strange places I have lived in, and many of the distinguished offices I have held. if my memory were not jogged in behalf of Ninety-Six. Shocked by the sins of the times (as for instance, exhibited at the Freshman Glee Club concert at Providence, when I was the only one who thought himself sober), I entered the ministry. I got some more shocks there and the final one sent me flying into the arms of a bucket shop guy. I got another shock, along with some of my trusting friends, and slowly recuperated as I sold soap, egg beaters, and what not. Fearing I should disgrace Ninety-Six. I quit that humble line and sold beautiful lots out near Hotel Gramatan, Bronxville. All the profits did not come to me, and as I wanted to get rich quick, I went back into the ministry. They have let me stay a whole year and haven't got onto me vet. In 1911 I spoiled my eyesight and had apoplexy from reading a book I got for nothing, "The Ninety-Sixer." I never attended a reunion, even the dead-head one, as I am a poor walker. I am now well, happy, and much beloved in this quiet hamlet by the sea. I have a cat, a duck, two pullets, and four roosters. I killed my dog. If any Ninety-Sixer will drop in on me between now and 1920 I'll kill one of the roosters, maybe two. Some day "'96" will hear from me. It will never be by way of the treasurer.

THOMAS GREELY STEVENSON

Later I accepted a position in a trust company in St. Paul. After two years I went into the claim department of the Chicago, Burlington & Northern Railway. I began the study of law and graduated from the University of Minnesota in 1900. I practised for four years and then became associated with the wholesale house with which I am still connected — i.e., E. A. Young Mercantile Co., western wholesalers of bargains in clothing and general merchandise, St. Paul, Minn.

When I became secretary of the company I assumed further responsibilities and married. I have since acquired a family of three, innumerable white hairs in a beard that was once red, and

a rapidly thinning thatch.

I left college twenty-three years ago. Most of that time I have been in St. Paul and always a member of the Minnesota Harvard Club.

from the Harvard Law School. I was admitted to the Philadelphia Bar in June, 1899, and was associated with the late Samuel B. Huev. Esq., until his death in 1901, after which I continued with his office successors until March, 1904. On April 1 of that year I came to New York and have since been actively engaged in the general practise of the law. Since May 1, 1910, I have been practising alone. I was a tenant in the Equitable Building at the time of its destruction by fire in January, 1912. Immediately afterwards I located in the National City Bank Building, at 55 Wall Street, and remained there until 1914 when I went abroad with a friend, a physician from Philadelphia. We were in Berlin when the European War began and this made a change of itinerary necessary. Instead of continuing into Austria as planned, we journeyed to Munich, and when we were notified that our presence there was undesirable, proceeded to Switzerland where, with thousands of other Americans, we were marooned for more than two weeks. We finally managed to get through France, but with great difficulty, and reached London in September. Our trip from there to New York was accomplished without any discomfort. Upon my return home I resumed practise at 59 Wall Street, where I am now located.

Friendship Heights, Bethesda, Md.

THE Department of American Archæology and Ethnology at Harvard was given separate recognition in the college catalogue the year before I entered, and I determined to take up this new line of study. I planned my undergraduate work accordingly and spent several vacations in actual field research. After graduation I continued the same line of investigation in the graduate school, and took the degree of A.M. in 1897 and that of Ph.D. in 1900. I was at Cambridge from the fall of 1896 until the spring of 1898, except for a part of the summer of 1897 which I spent at Madisonville, Ohio, assisting in the exploration of an Indian burial site. During a part of the spring and summer of 1898 I was with an expedition from the American Museum of Natural History, New York City, exploring in the ruins of Pueblo Bonito, New Mexico, and in the fall I moved to New York, where I spent the two following winters, dividing my time between work at the American Museum of Natural History and attendance on lectures at Columbia University under the direction of Professor Franz Boas. I spent part of the summer of 1899 in linguistic work among the Dakota Indians on the Rosebud Reservation, South Dakota. In the summer of 1900 I took the Civil Service examinations and on September 1 was appointed Assistant Ethnologist in the Bureau of American Ethnology of the Smithsonian Institution, Washington, D.C. The entire winter of 1900 to 1901 I spent on the Oueen Charlotte Islands, British Columbia, and in neighboring parts of Alaska, in an investigation of the Haida Indians. From the time of my return until December, 1903, I was engaged in the further study of the material collected there and in preparing it for publication. In 1903 I was appointed full Ethnologist. On December 16, 1903, I married and combined business with pleasure by taking my wife to Alaska, where I spent the first four months of 1904 in ethnological work among the Tlingit Indians. The next two years were taken up with the study and publication of the material collected there. Immediately afterward I turned my attention to the Indians formerly occupying the territory of our southern states. and between 1907 and the present time have made repeated visits to their descendants living in Louisiana and Oklahoma in search of ethnological and linguistic information. In 1913 I was awarded the second Loubat prize, which is bestowed every five years for publications of merit in American ethnology, archæology, and history. I am a member of the American Anthropological Association, the American Folk-Lore Society, the Anthropological Society of Washington, and the American Sociological Society. I was president of the American Folk-Lore Society in 1909 and am president of the Anthropological Society of Washington for the present year, 1915-16. I am also on the Council of the first three, and belong to the local Council of the National Economic League. My principal lines of investigation have been the philology of the American Indians and the sociology of primitive peoples. This latter interest has expanded, however, into an interest in sociology and economics in their broader aspects. But here I will stop, as my opinions on those subjects might jar the susceptibilities of members of our class connected with Wall Street. They may be had by private application.

Publications: "Contributions to the Ethnology of the Haida Indians"; "Haida Texts and Myth"; "Tlingit Myths and Texts"; "Indian Tribes of the Lower Mississippi Valley and Adjacent Coast of the Gulf of Mexico"; "The Biloxi and Ofo Languages"; "Social Condition, Beliefs, and Linguistic Relationship of the

Tlingit Indians."

4 Benty Bolmes Thaver

Born at Worcester, Mass., Nov. 25, 1873.

Parents: John R., Lora Charlotte (Holmes) Thaver. Schools: Fish and Dalzell's Schools, Worcester, Mass.

Years in College: 1892-96. Degrees: A.B.; LL.B. 1899.

Died Nov. 28, 1912, at Worcester, Mass.

TENRY HOLMES THAYER died at Worcester, Mass., on Thanksgiving Day, November 28, 1912, of acute angina pectoris. He was thirty-nine years of age. His death was very sudden, as he had not been ill for years, and had no warning that he was suffering from any ailment whatsoever. He appeared to be in very good health, and his death was very sudden and unexpected.

"Every member of our Bar felt a keen personal loss in the sudden death of Henry H. Thayer, Thanksgiving Day, 1912. We were all his friends, attracted to him by the charm and straightforwardness of his manner. We knew his ability and were confident that he deserved and would have a distinguished career. I would here record our great sorrow at his early death. We lost a good companion and associate, the community lost an exemplary citizen." (Abstract from Historical Address by Thomas Hovey Gage, Esq., at Festival of the Worcester County

Bar, June 29, 1915.)

After graduation from the Law School Mr. Thayer had been located at Worcester, practising his profession. His father and Hon. Arthur P. Rugg at the time he came into the office had a well-established practise. For the first few years Mr. Thayer did the usual drudge work. In 1906 Mr. Rugg was appointed a Justice of the Massachusetts Supreme Judicial Court at which time Mr. Thayer joined with his father under the firm name of Thayer & Thayer. His father was a Member of Congress and for six years Thayer saw a good deal of the political situations in Massachusetts from the inside.

Address: (business) Johns Hopkins University, Station N, Baltimore, Md.; (home) 1527 Bolton St., Baltimore, Md.

THE year after graduation I spent at the Lawrence Scientific School, as assistant in mechanical drawing, and in the fall of 1897 began engineering work with the Old Keystone Bridge Works (long since absorbed by the American Bridge Company), at Pittsburgh. That was the beginning of some seven years of active professional work in civil engineering in Pittsburgh, Boston, a short time in Wisconsin, and finally in New York City,

where for three years I was assistant engineer in the employ of the Rapid Transit Railway Commission which built the first large subway system in that city. In the fall of 1903 I went to Cornell University as instructor in Civil Engineering, and in February, 1905, in the middle of the academic year, I went to the University of Michigan in the same capacity. The delightful town of Ann Arbor was our home for nearly nine years, during all of which time I was on the faculty of the Department of Engineering. The last two years, 1911 to 1913, I was head of the Department of

Engineering Mechanics, with the rank of professor.

Early in 1913 I was offered the chair of Civil Engineering here at the Johns Hopkins University, in the new department which the University had at that time just established. In September of that year we moved to Baltimore, and look upon this city now as our home. Although my work is primarily in education, I have always kept in touch with the more active side of professional life by doing whatever consulting work happens to come my way. Here at the Hopkins there is much new construction going on, as the University is gradually moving from the old site in the heart of the city to its new location near the city limits. I have been a full member of the American Society of Civil Engineers since 1913, and have served on some of its committees. Various other technical and scientific societies have my name on their membership rolls to the end, chiefly, that they may diminish my income yearly by the amount of their "dues." I have published a dozen or more articles, etc., chiefly of a technical nature.

4 Edward Pelson Tober

Born at Milbury, Mass., July 16, 1871.

Parents: Edward, Sarah Eddy (Sawtelle) Tobey.

School: Pittsfield (Mass.) High School.

Years in College: 1892-96.

Degrees: A.B.; M.D. 1901; A.M. 1906.

Died Aug. 16, 1915.

EDWARD NELSON TOBEY, '96, M.D. '01, of St. Louis, lost his life during a hurricane in the Gulf of Mexico, on August 16, 1915. He was on the way to British Honduras on a scientific expedition for the study of tropical diseases. A sorrowful sequel of his death was his mother's refusal to believe the reports of it, and the discovery on November 10, 1915, that she had died alone in the house in which she had lived with her son. Dr. Tobey's work in matters of public health in St. Louis had been of high value.

"It was his special interest in tropical diseases which led Dr. Tobey to consent to go on a scientific expedition to British Honduras, leaving St. Louis on July 19 with Rev. Alphonse Schwitalla, S.J., and Rev. John Cooney, S.J., of St. Louis University. At Belize, British Honduras, the three scientists were to be joined by Richard R. Rooney, S.J., a scholastic. All but Dr. Tobey returned safely to St. Louis, having taken passage on another

boat." (St. Louis Republic Nov. 11, 1915).

Tobey practised medicine at Nantucket and at West Somerville, Mass. At the Medical School he had made a special study of pathology, bacteriology and protozoölogy. For this he received the degree of Master of Arts. He was appointed demonstrator and research assistant at the Liverpool School of Tropical Medicine in May, 1906. In September, 1907, he was appointed assistant in bacteriology, Harvard Medical School. In July, 1908, he gave the first course in tropical medicine ever given at Harvard. His work resulted in five articles on bacteriological and protozoölogical subjects. While at Runcorn, England, six more came out, and later he published three research articles and three articles advocating the establishment of a department of tropical medicine at Harvard. One of these latter entitled "The Need for a School of Tropical Medicine in the United States." which first appeared in the Journal of the American Medical Association, was later reprinted in the Journal of Tropical Medicine, London.

E. M. Grossman writes: "Tobey was a quiet, unassuming fellow who did exceptionally fine work in the bacteriological laboratory. He was of a retiring nature with the result that he was not very well known, but my information has always been to the effect that his work for the city (St. Louis) along the lines of public health was of great value and won for him the praise of those whose official duties brought them in contact with him. You will notice that he was engaged in a humanitarian project at the time he met his death. I am sorry that Tobey died before public distinction came to him."

C. F. Atwood writes: "I have recently conferred with the United Fruit Co. and learn the Marowijne without doubt went down with all on board probably by collision with a sailing vessel during the hurricane. Tobey was a dutiful son, a faithful friend,

a thorough student. A good man has passed beyond."

The following clippings give the details of his death:

"Loss of the St. Louis University Expedition. At the beginning of the summer a medical party was sent by the St. Louis University to British Honduras for purposes of research. One

member of the party, Mr. Edward Nelson Tobey, was a passenger aboard the fruit steamer, Marowijne which was wrecked in a hurricane on Friday, August 13, 1915, in the Caribbean Sea. He has not been heard from since and is believed to have perished. He was a lecturer in the medical department of the University and assistant bacteriologist of the city of St. Louis." (Boston

Medical and Surg. Journal).

"Edward Nelson Tobey, M.D., Harvard Med. School, 1901, aged 44, a member of the Massachusetts Medical Society; instructor in tropical diseases in the St. Louis University since 1914; demonstrator and research assistant in the Liverpool (Eng.) School of Tropical Medicine in 1906–07; assistant in bacteriology in his alma mater from 1907 to 1911; instructor in tropical medicine in the Harvard Summer School of Medicine from 1908 to 1910; instructor in pathology in St. Louis University from 1911 to 1914 and thereafter instructor in tropical diseases; assistant city pathologist and bacteriologist of St. Louis: who had been making an investigation of tropical fever in British Honduras, is believed to have been drowned when the steamer Marowijne of the United Fruit Company's Line, in which he sailed from Belize, Aug. 13, was lost at sea during the hurricane of Aug. 16, 1915." Years in College: 1893-96.

THREE years I spent in graduate study, part of a year at the Harvard Graduate School, the rest of the time in Germany at Leipzig and Greifswald. I have served about sixteen years as teacher or principal in various schools of Maine, New Hampshire, and Massachusetts, (plus some teaching in Germany);—this sums up the story. No honors or financial returns worth mentioning; plenty of fighting all along the line; something of joy and something of friendship gained through work accomplished. The present year is my eighth year of continuous service as acting head of the Department of Classics in the New Bedford High School.

DAVID TOWNSEND

Born at South Natick, Mass., May 6, 1873.

Parents: George James, Lucy Mariah (Richards) Townsend.

School: Boston Latin School, Boston, Mass.

Years in College: 1892-96.

Degrees: A.B. (1897); M.D. 1901.

Married: Mary Bacon Cruikshank, Nov. 1, 1902, London, England. Occupation: Physician, Superintendent Tuberculosis Sanatorium.

Address: (business) River Glade, N.B., Canada; (home) 9 Irving St., Brook-

line, Mass.

AFTER leaving the Medical School I spent a year in England, Germany, Vienna, France, and Switzerland in hospital work. On my return to the United States, I started in the spring of 1902 in general practise at Brookline, Mass. In the fall of 1902 I again went to England where I was married in London, returning in December. From 1902 to 1905 I continued in general practise and in hospital work, chiefly at the Children's Hospital and Boston Dispensary, preparing myself for the work I took up later. From July to October, 1905, I had charge of the "Day Camp for Tuberculosis," operated under the auspices of the Boston Association for the relief and control of Tuberculosis. This was the first camp of its kind in America.

The winter of 1905 and 1906 I spent studying the various sanatoria for tuberculosis in U.S. and England, Scotland, Germany, France, and Switzerland. During the summer I continued my general practise. In the winter of 1906 and 1907 I spent the time doing laboratory work, in further preparation for my later work. In June, 1907, I again assumed charge of the "Day Camp for Tuberculosis" serving until February, 1908. In July, 1908, I assumed the position of "resident physician" of the Boston Consumptives' Hospital, at Mattapan, moving to Boston shortly after and to Mattapan in the fall of 1909. I served in the above capacity until April, 1910, when ill health required me to give up my work. I then went to New Hampshire staying there until September, 1911, save for two or three months in the winter of 1910 and 1911 when I attempted to resume my work and found I was unable to do so. In October, 1911, I accepted the position of superintendent of the Jordan Memorial Sanatorium, at River Glade, New Brunswick, Canada. This sanatorium is a provincial one supported by the Province of New Brunswick and, is for cases of pulmonary tuberculosis in its early stages only. I assumed my duties on November 1, 1911, and have been here ever since. A lovely country with lots of good hunting and fishing right at my door. The institution is situated on the banks of a river and in the midst of a wooded country. Although our winters are cold, yet it is a dry cold and one does not feel it nearly so much as in Boston. We have salmon and trout in the river and moose, deer, partridge, bear, and woodcock in the woods.

For several months previous to my giving up work in 1910, I was actively engaged in tuberculosis work, delivering lectures in various places in Massachusetts, on tuberculosis, before all sorts of audiences. This I have continued here, as part of our

educational campaign.

From 1903 to February, 1911, I served as assistant physician to the orthopedic department, assistant physician and physician to the Department of Pulmonary Diseases of the Boston Dispensary; also as chief of the district physicians of the Boston Dispensary, for about four years. I have also served as secretary-treasurer of the Brookline Medical Club and as one of the directors of the North End Diet Kitchen and on committee of arrangements of Massachusetts Medical Society.

Member: Massachusetts Medical Society; American Medical Association; National Association for Study and Prevention of Tuberculosis; American Sanatorium Association; American Hospital Association; Canadian Association for the Prevention of Tuberculosis; Canadian Medical Association; New Brunswick Medical Association; Boston Medical Library; University Club and Harvard Club, Boston; Union Club, St. John, N.B.; City Club, Moncton, N.B.

For publications, I have written several articles on the "Day Camp"; reading a paper on same before the International Congress for Tuberculosis in Washington, in the fall of 1908; I also read a paper on the "Early Diagnosis of Tuberculosis," before the Canadian Medical Society, at St. John, N.B., in July, 1914. This paper was later published.

HAVE practised law in New York for sixteen years and have held, at various times, the position of Deputy Attorney General and Assistant District Attorney. Until the formation of my present firm (Perkins & Train), January 1, 1916, I have been rather consistently employed in the prosecution of political, commercial, and other crimes and suppose that, so far as I have any professional reputation, it is associated with this fact. Naturally, during the eight or ten years in which I have held public office, I have been engaged in a great many criminal trials and in the course of that time I have tried almost every variety of person, for every conceivable kind of offense. Probably the case which attracted the widest attention was that of Henry Siegel, the dry goods merchant and banker, who was indicted in New York County and tried before a jury of Genesee farmers in the old court house adjoining the ancestral home of the Wadsworths. The preparation for the Siegel trial took six solid months and the trial itself cost New York County about \$40,000. My more interesting criminal prosecutions I have written up in a book called "True Stories of Crime"; and I have written other books based on my experience in the Criminal Courts, one of which, "The Prisoner at the Bar," has been well received. It is customary to assume that the practise of criminal law is more interesting than the practise of civil law, largely for the reason that crime is more largely made the basis of fiction than civil law suits. For every book like William Warren's "10,000 a Year," there are several hundred detective novels based on the pursuit and prosecution of murderers, counterfeiters, and bank robbers.

In my experience, however, I have found my civil cases not only more interesting but more thrilling than any criminal prosecution. The criminal cases are, as a rule, poorly defended and the issue is simple and obvious, and there ought, as a rule, to be but one result. The prosecutor, if he is sober and reasonably industrious, ought to have things his own way. The civil practitioners, being engaged in a competitive effort actually to earn their living by their professional efforts, are apt to prepare and try their cases better than holders of public office, who are merely reaping a well deserved harvest after sweating in the field through the burden and heat of the political day. So I am glad to be back in an antiseptic office, overlooking the harbor, engaged in the practise of my profession, with agreeable partners, under healthy conditions, and surrounded by all modern improvements.

Following the injunction to "make your story as personal as you like," I can only say that my home life has been unusually happy and satisfactory, and that I have had a lot of fun writing short stories and novels, outside of my semi-serious works dealing with the practise of law and the prosecution of crime. I have no doubt many of the Class have read some of my effusions in the Saturday Evening Post and have followed the experiences of "The Man Who Rocked the Earth" with pleasure or disgust, as the case may be. The book that has given me the greatest return has been "The Goldfish," which was published anonymously, and, to my sincere surprise, widely read and favorably criticised. Of course, it is not strictly autobiographical, but it is an accurate picture — and a conservative one — of a certain class of so-called "successful" men in New York City, and even those of us who do not make the income which "The Goldfish" did are just as susceptible to the temptations and tendency to become materialists as he was.

Generally speaking, it seems to me that a man's real character and ability must be pretty well known by the time he has been out of college twenty years. The American public is extraordinarily acute in "getting the number" of the holders of public office, and I think this is equally true in private life. The man who fakes successfully for ten years is generally shown up by the end of fifteen. So far as I am able to observe, moderate intelligence and hard work are usually rewarded, but the "plums" fall when they get ready and where the wind blows them.

Looking around the Riding Club the other night at the '96 Dinner in New York, I was struck by the youthful appearance of almost all the men. There were a few gray-headed badgers, but the gray ones did not seem to have wrinkles, and I attribute their

appearance to congenital reasons rather than age or dissipation. I think we ought to get together oftener and I have no doubt we have a great deal to learn from each other's experience. My only regret, so far as the Class is concerned, is that I have met so few of them, which, in view of my career as a public prosecutor, may on the whole have been a good thing for everybody.

WITH diplomas from the Bridgewater (Mass.) Normal School and the Massachusetts Normal Art School, and holding the college degrees of S.B., A.M., Ph.D., I have continued my work as Master of the Russell School in the classical city

of Cambridge since my last report. This is my nineteenth year of service in the position with no cause of complaint upon my part and with some degree of satisfaction to the members of my constituency, I trust. As a teacher I have served in the Highland School, Bridgewater, Mass.; the Central School, Woburn, Mass.; the North School, Randolph, Mass.; the Oliver School, Lawrence, Mass.; the Adelphi Academy, Brooklyn, N.Y.; the Russell School, Cambridge, Mass. In all of the above situations I have received that greatest of all rewards to the true teacher, i.e., the satisfaction of feeling that one is helping others to help themselves. The hundreds of friendships which are formed in this profession bring great happiness to me with the passing years. Financially, I am not rich of course, as the work of instructing youth would not make and foster me as a malefactor of great wealth.

Member: Harvard Teachers' Club, Cambridge Teachers' Club, Cambridge Masters' Club, Massachusetts Schoolmasters' Club; Associations: Bridgewater Normal Alumni, Wooster University Central Alumni, Middlesex Teachers' County Association, Lawrence Scientific School Alumni, Cambridge Public School Association, American Institute of Instruction, Massa-

chusetts Teachers' Federation.

I have not traveled much but my life in Cambridge has kept me in touch with Harvard and her men, both the younger and older, without much exertion upon my part. The Harvard University of today is abreast of the times in educational matters and I feel that she offers more and better opportunities to her students today than she did in 1896.

Address: 17 East 41st St., New York, N.Y.

MY real home is in Connecticut. There I have worked very hard improving a country place, whither I hope to retire. Unexpectedly elevated to the command of one of the four Manhattan Infantry Regiments, I can now seldom leave New

York City. Personal sacrifice — useful public service — no thanks expected (or to be had). Yet there is a terrestrial reward — development of character and capability.

SINCE the last report in 1906 I have continued the practise of medicine in Boston. In 1908 I gave up my association with Dr. Edward Reynolds and have been in practise for myself since then. In 1912 I moved to a suburb of Boston to live, keeping an office in Boston, and have found this change to have interfered not at all with practise and to be a much pleasanter mode of life than living in the city. I am still connected with the Free Hospital for Women in Brookline as surgeon to outpatients, am a member of the governing committee of the Boston Medical Library and belong to several medical societies, including the recently organized American College of Surgeons.

MY world-startling bomb has not yet exploded; though it may burst before the expiration of another twenty years. In 1898 I accepted a position as instructor in the Mount Tamalpais Military Academy at San Rafael, Cal. My purpose was to raise a portion if not all of the Golden State to a higher intellectual

plane. The purpose miscarried and I returned to my native soil the following year. Here I at once started a fierce flirtation with the goddess of fortune, and also with a very charming young lady. I captured the latter and am still in pursuit of the former.

Leaving the rest of the world to attend for a time to its own intellectual advancement I began in 1900 to carve out my fortune as a contractor for team-work. I had it only partly carved when the news came that an almost forgotten civil service examination had blossomed into an appointment in the Custom House. I served first at Pueblo, then at Cañon City, and finally (1907) became stationed permanently at Denver. Here I have remained ever since, swinging occasionally to a higher limb. My family is of the same size and composition as it was at the last report, namely, one wife and two boys. The latter have been wiser than their father for a long time. It is expected that they will be ready to enter Harvard in two and four years respectively, where I hope they will be brought down to the paternal level.

At present I am about to burst forth in a new place,—the field of literature. The text of my first book is nearly complete. Modesty forbids me to extol its merits as they really deserve. Suffice to say that another such work has probably never been published. When it comes out, if it ever does, let us hope that its readers and the author may not raise their hands with the silent prayer and yow "never again."

AFTER leaving Harvard I spent three years in the General Theological Seminary, New York. After graduation I was ordained Deacon and the next year Priest in the Episcopal Church, and spent three years in charge of St. Stephen's Parish, Buffalo. In 1902 I became Rector of Grace Parish, Buffalo, and have so remained up to date. It is a very interesting work with people who have some religion. Some outer signs of progress are the purchase of a new site and erection of a Parish House in 1912, and the plans we are now making to build a new church. As to personal matters, I wish to record that the people of the Parish gave me an Overland runabout for a Christmas present. I have not yet run over any Harvard men. I have just been appointed Chaplain of the 74th Infantry, National Guard, which is a congenial position for a humble follower of T. R. in the battle of preparedness.

WITH apologies for keeping you waiting; I find, on looking over past records, that I have been secretary of the Ampere Electro-Chemical Co., trustee of the Crocker-Wheeler Beneficial Association, secretary of the Crocker-Wheeler Club, member of the Mosaic Club of East Orange, the Ampere Improvement Association, the Citizens' Union of East Orange, the Roseville Golf Club, the New York Electrical Society, the Harvard Engineering Society of New York, and the Harvard Club of New Jersey. As works manager of a concern that manufactures electric generators and motors in competition with General Electric Co., Westinghouse and a host of smaller fry, many things have occurred of intense interest to me but which, if related, would simply cause my classmates to skip more rapidly to John Wheeler's report. Am still living in Glen Ridge where we can match no kiddies with some of the rest of you but where we can talk about yours and some other things and where the latch string is always out for Harvard men and especially for '96ers.

It seems hardly possible that twenty years have elapsed since the members of the Class of '96 were let loose upon a helpless world. Most of us, however, feel as young as we did in those remote days, and good for a great many more decades. The subject of this sketch has spent these twenty years in the modest role of a teacher, trying to be of service to those young men who are constantly surging on to college or entering the activities of business life. The most satisfactory reward that has come to me during this time is found in the many letters and expressions that I have received from boys to whom I have tried to give some of the concepts of life and service as I see them. I spent two years in the Bloomington (Ill.) High School teaching German; eight years at the State College of South Dakota teaching French and German; eight years in the St. Paul Academy teaching French, German and History; and am now in my second year as head of the Modern Language Department of Shattuck School.

In the way of professional preparation, I spent a year, 1895–96, in Paris and at Leipzig University; a summer, 1901, at the Alliance Française in Paris, and studied two years (1907–09) at the University of Minnesota. During this time the game of my boyhood, tennis, has been my avocation and I have won many honors throughout the Northwest. I am at present president of the Northwestern Branch of the National Lawn Tennis Association. I also hold the Southern Minnesota and Head of the Lakes Tennis Championships.

BOUCK WHITE

Formerly CHARLES BROWNING WHITE

Born at Middleburg, N.Y., Oct. 20, 1874.

Parents: Charles Addison, Mary (Bouck) White.

School: Middleburg (N.Y.) High School.

Years in College: 1894-96.

Degree: A.B. Unmarried.

Occupation: Clergyman.

Address: 165 West 23d St., New York, N.Y.

↑ FTER graduation Bouck White became reporter on the A Springfield Republican. It was while in Springfield that there came to his soul the call of the ministry. Yielding to that inner Voice he gave up his career in journalism and took up his ministerial studies, first in Boston Theological Seminary, and later in the Union Theological Seminary in New York City. His first ministerial duties were in the Ramapo Mountains back of West Point. From there he came to New York and took a position as head of the Men's Social Service Department in Holy Trinity Episcopal Church, Brooklyn, Here he remained five years. A work from his pen entitled, "The Book of Daniel Drew," was published while he was at Holy Trinity. Another book written by him during his work at Holy Trinity was "The Call of the Carpenter." These writings, and the study that led up to them, as well as his daily work in caring for the social debris thrown down by the grinding of the economic machine, rapidly brought Bouck White into the Socialist position. He joined the movement, and quickly became one of its speakers. His work soon attracted the attention of the press. He became a target for attack. The vestry of Holy Trinity became alarmed at his uncompromising position, and when he refused to soften his attacks upon the moneyed oligarchy, his resignation was asked for.

Removing to New York, he completed a work partly begun at that time, "The Carpenter and the Rich Man." This is the companion book of "The Call of the Carpenter." Shortly after that another book appeared by Bouck White: "The Mixing: Tale of a Town that Found Itself." The principal work of Bouck White, however, after his removal to Manhattan, was the founding of the Church of the Social Revolution. Shortly after the founding of this church, the Ludlow tragedy occurred in connection with the Colorado Fuel and Iron Company strike wherein one hundred and forty-seven of the miners and their wives and children were shot. Bouck White wrote the pastor of the Rockefeller Baptist Church, suggesting that a joint meeting of the two congregations—that of the Church of the Social Revolution, and the Baptist Church, to discuss the matter from the standpoint of Jesus, might remedy our social afflictions. He stated that he would visit the Rockefeller Church the following Sunday to extend to them this invitation. Receiving no reply,

he visited the church, as announced. It was found then that the congregation was thickly strewn with plain clothes men and police. He said: "As the pastor of a neighboring church, I am come ——" But he got no further. He was seized by the officers, cast into jail, and sentenced to six months on Blackwell's Island. Privilege of appeal was denied him. On the 13th of May, 1914, he was sentenced; six months later he was released. It was while in prison that Bouck White wrote "A Message to the World." He is also the author of "Crowd Songs; Hymn Book of the Folk Upheaval."

This coming summer Bouck White will give a series of lectures on the Chautauqua platform. His last book is: "Letters From

Prison; Social Revolution A Spiritual Sunrise."

Married: Josephine Elizabeth King, Sept. 21, 1910, Westfield, Mass.

Occupation: Physician.

Address: Maple St., Granville, Mass.

I CAME to this town in 1912 at the request of my wife and the local town clerk. My predecessor was Dr. Horace Moran, a brother of John B. Moran, Democratic nominee for Governor of Massachusetts. My life is characteristic of any physician in a New England village and need not be given in detail. I am a member of the Westfield Medical Club, the Hampden County Medical Society, and the American Medical Association. I have been a Granger and Odd Fellow and am still a member of the Masons, which fact is brought to my notice at least once a year on receipt of the annual dues. I was reappointed Auditor of the town at the last election by a careless and unsuspicious constituency, otherwise I have escaped public notice.

Occupation: Business Manager.

Address: (business) c/o U.S. Light and Heat Corporation, Charles River Road, Cambridge, Mass.; (home) 147 Park Ave., Arlington Heights, Mass.

CENERALLY speaking, modesty is one of the most striking characteristics of my nature. For purposes of a Class of '96 Report, however, I would wish to include every office of honor or trust to which I have been raised by admiring fellow-citizens, enumerating the entire list of Nobel prizes, etc., and let my remarkable record speak for itself. It is not, therefore, because I feel like shrinking from the subject that a long tabulation of degrees, titles, and honors does not follow—but merely on account of the fact that said admiring fellow-citizens seem to have been backward, as in no case to date have they sought me out and conferred any such tokens of their esteem and regard. Nothing of interest to classmates has occurred in my peaceful existence since graduation. If anything does happen that I am proud of, I will certainly telegraph the details at once to the Class Secretary.

SINCE the publication of the last class report I have changed my residence from Brookline, Mass., to Garden City, L.I., N.Y., and my business from the Library Bureau, Boston, to The Thompson & Norris Co., Brooklyn. For three years, while Mr. Garcelon was treasurer of the Harvard Athletic Association I had charge of the distribution of the football tickets — a thankless job as everyone claimed they had rotten seats. However I can vouch for the absolute fairness with which the allotments were made and for the fact that speculators had fewer Harvard tickets for sale than ever before. My present hobby is Irish terriers. I have raised over thirty puppies, some of them very promising dogs.

THE most real honors of the minister are of such an intimate I relation that they cannot be spoken of. The quack in religion as in medicine boldly rushes in where angels fear to tread. Succoring the helpless may appear to be a very easy thing but it is my experience that only the Master can fill one with His spirit of service to such an extent that one is willing even to endure ingratitude for the sake of serving humanity and divinity. It is a great thing to put a church on its feet financially and spiritually, and it is a great thing to help build a town in its smaller and larger interests, and it is a great thing to read papers before religious associations and help people by it, and it is a great thing to be elected adviser of bodies of young people, but these are as nothing unless we can help to lighten peoples' lives and fulfil the spirit of the Master's words in no priggish spirit but in a real spirit. "Come unto me all ye that labor and are heavy laden and I will give you rest. Take my yoke upon you and learn of me for I am meek and lowly in heart and ye shall find rest unto your souls, for my yoke is easy and my burden is light."

I TAUGHT geology at Harvard University until 1902, and at Dalhousie University, Halifax, Nova Scotia, from that time until 1909; since then in New York University. In Nova Scotia, I practised the profession of mining geologist, in part for private corporations and in part for the provincial and federal governments. Since coming to New York my private practise has been largely in engineering geology, and at present my interest is directed to the applications of geology to military science. Scientific society membership entails obligations that eat up

leisure, and a little research nearly consumes any that may be left. The Harvard Club of New York is a most convenient haven of rest at odd times. The Progressives never weaned me from Republican enrollment, even if I did vote for some of them once. Tennis and mountain climbing are about the only outdoor recreations at present.

Y year as an undergraduate in Harvard was essentially a VI part of my graduate study of psychology, which I continued at Harvard during the following year. I then took a year of physiology in the Harvard Medical School, being assistant in the laboratory. The following year, 1898-99, I was Fellow in psychology in Columbia University, and took the degree of Ph.D. For three years thereafter I was instructor in physiology in the University and Bellevue Hospital Medical College in New York City, and I then spent a year at Liverpool University, at first as Fellow and later as demonstrator of physiology. I was then appointed instructor in psychology in Columbia University, beginning in 1903; and there I have remained since that date. being appointed adjunct professor in 1905, and professor in 1908. In 1911 I became executive head of the Department of Psychology, which I still remain. I have at different times held several offices in scientific societies: vice-president of the New York Academy of Sciences, vice-president of the American Association for the Advancement of Science, president of the American Psychological Association, and (at present) president of the New York Society for the Study of Mental Defectives. I have published a number of scientific papers in the psychological and physiological journals, and three books of similar character: "Le Mouvement," Paris, 1903; "Elements of Physiological Psychology" (with Professor G. T. Ladd), New York, 1911; "The Care of the Body," New York, 1912.

THREE requests were required to bring a detailed account of my exciting career from A.D. 1896 to 1916, entitled "Twenty Years After." I entered for the law, then tried to become a merchant, and finally degenerated into a stockbroker in New York. I have attained this eminence without any assistance from wife or children. As to offices of honor, I might mention that I was a high private at Plattsburg last summer.

FOLLOWING the admonition at heading of the blank against being at all modest in telling about oneself, I give here what my publishers have to say about me in their circular advertising my latest book now in press. When one has been as much before the public as I have, he becomes more or less indifferent to what is said in print, finding what is written as abuse and is meant

as praise just about offset each other:

"Bruce Wyman, we assume, needs no introduction to the legal profession in this country. Since the publication of his work on Public Service Corporations, he has been recognized generally as the master of this subject; and his experience recently in handling rate cases for railroad systems renders him particularly well qualified to write on any matter connected with carriers. He thus speaks in respect to any matter relating to transportation not only with the authority of one who has long been a student of the subjects in the department connected with his work as a professor and writer, but also from the experience of one who has had as a lawyer in practise much to do in hundreds of cases with various phases of the problems which he is discussing.

"He is author of 'Railroad Rate Regulation,' 'Public Service Corporations,' 'Administrative Law,' 'Control of the Market,' 'Restraint of Trade,' 'Mortgage Securities,' 'Engineering Contracts,' 'Jurisdictional Limitations upon Commission Action,' 'A Solution of the Trust Problem,' 'State Control of Public Utilities'; 'Monopolies,' in Cyclopaedia of Law and Procedure; 'Equity,' in Encyclopaedia of Government and Law; 'Public Service Companies,' in Modern American Law; 'Unfair Com-

petition by Monopolistic Corporations,' in the Annals of the American Academy; and various articles in the Harvard Law Review, Yale Law Journal, Columbia Law Review, and the Green

Baq.

"Bruce Wyman has within a few years returned to his practise at the Massachusetts Bar, to which he is now devoting the whole of his attention; having previously confined his activities as an attorney at law, while he was for ten years a professor in the Harvard Law School, primarily to those of consulting counsel in corporation matters. In the course of his career he has not only had charge of many courses on the subjects in which he is known as an expert in the Law School of Harvard University, the Chicago University Law School, the Department of Economics at Harvard, and the Department of Engineering in its Scientific School; but he has also acted as draftsman of a Public Service Commission Bill, as investigator for the Directors of the Port of Boston, as counsel for the National Civic Federation, and as counsel in matters for and against several railroad and other public service corporations."

APPENDIX

LINUS WARD KLINE

[See Records in regular order for other facts.]

ENTERED Harvard to prepare for teaching. After graduation I took further preparation at Clark University where I spent three years. My first service to the state was given to the State Normal School at Mankato, Minn., from 1899 to 1900; two years, then, as teacher and supervisor of the professional work in the State Normal School for Women at Farmville, Va. In the fall of 1902 I began work on the faculty of the Duluth (Minn.) State Normal School in its opening year. My work has been psychology, education, and for the first eight years also the superintendency of the professional department. I am still here on the same job. The officials in 1911-13 grew tired of seeing me around and sent me on a leave of absence. I fully intended to spend the year at European universities, but the memories of the old haunts at Harvard drew me back and I spent a very pleasant year at Harvard, having received an honorary fellowship in psychology. I am member of the American Psychological Association and fellow in the American Association for the Advancement of Science, and am working to become a "rookie" in one of the U.S.A. Training Camps.
